

Formula List	
1st group: detailed knowledge of the formulas: 30 [Most Important] [Name, Origins, Ingredients, Functions, Actions, Indications, Applications, Precautions, Case Studies] • Ma Huang Tang • Gui Zhi Tang • Sang Ju Yin • Yin Qiao San • Chai Ge Jie Ji Tang • Ren Shen Bai Du San • Da Cheng Qi Tang • Xiao Cheng Tang • Tiao Wei Cheng Qi Tang • Xiao Chai Hu Tang • Si Ni San • Xiao Yao San • Ban Xia Xie Xin Tang • Bai Hu Tang • Huang Lian Jie Du Tang • Ma Xing Shi Gan Tang • Long Dan Xie Gan Tang • Qing Hao Bie Jia Tang • Li Zhong Wan • Si Ni Tang • Si Jun Zi Tang • Bu Zhong Yi Qi Tang • Sheng Mai San • Si Wu Tang • Shi Quan Da Bu Tang • Gui Pi Tang • Liu Wei Di Huang Wan • Jin Gui Shen Qi Wan • Suan Zao Ren Tang • Gan Mai Da Zao Tang 2nd group – familiar with the information of the formulas: 30 [Name, Ingredients, Actions, Indications] • San Ao Tang • Hua Gai San • Xiao Qing Long Tang • Jiu Wei Qiang Huo Tang • Xiang Su San • Jing Fang Bai Du San • Da Xian Xiong Tang • Ma Zi Ren Wan • Ji Chuan Jian • Shi Zao Tang • Hao Qin Qing Dan Tang • Tong Xie Yao Fang • Zhu Ye Shi Gao Tang • Qing Ying Tang • Xi Jiao Di Huang Tang • Liang Ge San • Pu Ji Xiao Du Yin • Dao Chi San • Zuo Jin Wan • Xie Bai San • Xie Huang San • Qing Wei San • Yu Nu Jian • Shi Gao Tang • Bai Tou Weng Tang • Da Jian Zhong Tang • Fang Feng Tong Shen San • Shen Ling Bai Zhu San • Zuo Gui Wan • You Gui Wan	3rd group – general knowledge of the formulas: 41 [Name, Ingredients, Actions] • Da Qing Long Tang • Xiang Ru San • Xin Jia Xiang Ru Yin • Shen Su Yin • Cang Er Zi San • Sheng Ma Ge Gen Tang • Da Huang Fu Zi Tang • Xin Jia Huang Long Tang • Jia Wei Xiao Yao San • Hei Xiao Yao San • Da Yuan Yin • Sheng Jiang Xie Xin Tang • Gan Cao Xie Xin Tang • Bai Hu Jia Ren Shen Tang • Xie Xin Tang • Qing Wen Bai Du Yin • Shao Yao Tang • Qing Luo Yin • Dang Gui Liu Huang Tan • Qing Gu San • Xiao Jian Zhong Tang • Dang Gui Si Ni Tang • Wu Zhu Yu Tang • Da Chai Hu Tang • Ge Gen Tang • Ge Gen Huang Qin Huang Lian Tang • Wu Ji San • Yi Gong San • Liu Jun Zi Tang • Xiang Sha Liu Jun Zi Tang • Ren Shen Ge Jie San • Dang Gui Bu Xue Tang • Tai Shan Pan Shi San • Ba Zhen Tang • Zhi Gan Cao Tang • Da Bu Yin Wan • Hu Qian Wan • Er Zhi Wan • Yi Guan Jian • Shi Hu Ye Guang Wan • Qi Bao Mei Ran Dan •

Brief History of CHM Formulas	
Stage 1: Beginning (方剂学) Qin and Han Dynasties (4th Century B.C. to 3rd Century A.D.) [Bamboo Book] - Formulas for Fifty-two Ailments (Wu Shi Er Bing Fang) 403 BC - 221 BC 280 simple formulas w/o formula names, no mention of SE, zangfu, meridians 189 are formulas of 2 or more ingredients, the rest are single herb formulas. Yellow Emperor's Inner Classic (Huang Di Nei Jing) [221 BC-1st/2nd Century AD] 13 formulas, still quite rudimentary. - Outline of the rudiments of a therapeutic strategy based on the tastes of herbs, e.g. acrid disperses, sour retains, sweet moderates, bitter strengthens, and salty softens. [Each taste enters different meridians] - Sets up modern TCM theories [Bible of TCM] - Also some discussion of how the tastes relate to Zang Fu, etc. Discussion of Cold-induced Disorders & Miscellaneous Diseases Han Za Bing Lun written by Zhang Zhong Jing [Most Important Doctor] 150-219 A.D. late Han Dynasty) 314 formulas with names, dosage & method of preparation of herbs & formulas [Classic Formulas] - Established current Format: Patient, tongue & pulse, history, differentiation, diagnosis, treatment principles - True ancestor of all formularies & has had a tremendous influence on CHM throughout East Asia to the present day. Dr. Zhang was the first who completed the system named as Theory, strategy, formulas, and substances (Li Fa Fang Yao). - Edited about 50 years after by Wang Shu He, who divided book into 2 parts Discussion of Cold-induced Disorders (Shang Han Lun): External diseases Essentials from Gold Cabinet (Jin Gui Yao Lue): Internal Disorders. - Detailed system of diagnosis that focuses on the six stages of disease. - Dr. Zhang was first to identify the condition of a patient (differentiation) with a particular formula used to treat that condition, i.e. the name of the formula itself is another way of stating the diagnosis. For example, instead of saying that a patient is suffering from a Shao Yang disorder, one could also describe it as a Xiao Chai Hu Tang (Minor Bupleurum Decoction) disorder. The text does contain rather specific instructions for preparing the formulas, among which are decoctions, drafts, pills, and medicinal wine. Most of the formulas from these works by Dr. Zhang are still in use by many modern practitioners. Liu Wei Di Huang Wan ? Qian Yi ? Stage 2: Booming Jin, Sui, Tang, and Song Dynasties (3rd to 13th Centuries) - Emergency Formulas to Keep Up One Sleeve [Zhou Hou Bei Ji Fang written by Ge Hong (281-341), Jin dynasty] - Features the use of simple and inexpensive, yet effective 101 formulas or so. - Thousand Ducat Formulas (Qian Jin Yao Fang) 30 volumes & - Supplement to the Thousand Ducat Formulas (Qian Jin Yi Fang) 30 volumes written by Sun Si Miao (581-682) around 625 AD Over 6500 formulas collected from minorities, folks, foreign doctors and monks were included in Dr. Sun's books, which have had a major impact on later generations. Many of these formulas are still in use, and many other commonly-used formulas are variations on those which were first devised by Dr. Sun. - Arcane Essentials from the Imperial Library (Wai Tai Bi Yao) 40 volumes compiled in 752 AD (after 20 years hard work in the Library) by Wang Tao (702-772 AD) based on previously-published Chinese works as well as some foreign texts before 8th century - More than 6000 formulas categorized into 1104 according to the type disorder they were designed to treat. Wang Tao, an official of the national library, made a great contribution in keeping record of a lot of formulas from books lost long ago. - Imperial Grace Formulary of the Tai Ping Era (Tai Ping Sheng Hui Fang) 100 volumes compiled and published between 982 and 992 under imperial auspices – 16,834 formulas categorized into 1670 chapters with discussions on diagnosis and pathology of conditions. - Imperial Medical Encyclopedia (Sheng Ji Zong Lu): 200 volumes compiled by a staff of doctors under imperial orders and published about 1111 – 1117 AD. Near 20,000 formulas discussed with etiology, pathology and differentiations under thirteen departments, i.e. internal, pediatric, gynecological, surgical, dermatological, EENT....	- In addition, monographic formula books appeared in this period, such as - Liu Juan Zi Gui Yi Fang (Formulas Left Over by Ghosts written by Gong Qing Xuan, the earliest extant medical book on surgery) - Fu Ren Da Quan Liang Fang (Complete Effective Formulas for Women's Diseases written by Chen Zi Ming) - Wai Ke Jing Yao (Essential of Surgery written by Chen Zi Ming) - Xiao Er Yao Zheng Zhi Jue (Key to Differentiations and Formulas for Children's Diseases written by Qian Yi) - Jing Xiao Chan Bao (Tested Treasures in Obstetrics written by Zan Yin, the earliest book on obstetrics in TCM existing), and so forth. Stage 3: Deepening Jin and Yuan Dynasties (12th to 14th Centuries) Four great figures: Representatives of Jin Yuan Four Schools of Thought Liu Yuan Su (also named as Liu Shou Zhen, or Liu He Jian, about 1120-1200) Cooling School, which propounded that disorders were caused by excessive heat in the body and advocated the use of cold herbs. - He had much influence on the School of Febrile Diseases [4 Greats] in the Ming and Qing Dynasties. Liu's representative formulas: - Fang Feng Tong Sheng San, Shao Yao Tang, Shuang Jie San. Zhang Cong Zheng (also named as Zhang Zi He, about 1156-1228) Purging School [Gong Xia Pai], which propounded that disorders were caused by the pathogens and advocated the use of draining herbs, such as diaphoretics, emetics and purgatives and thus he started the - Started Attacking or Purging School. Zhang's representative formulas: - San Sheng San, Mu Xiang Bing Lang Wan. - Very aggressive, not good for deficient types Li Gao (also named as Li Dong Yuan, Li Ming Zhi, about 1180-1252) Earth Tonifying School, which propounded that diseases, apart from external disorders, were mainly caused by internal injury in spleen and stomach and advocated that treating these internal disorders with tonifying spleen & stomach and boosting Qi. - Li was considered as the founder of the Earth-tonifying School. - His masterpiece was Pi Wei Lun (Treatise on Spleen & Stomach), and representative formulas: - Bu Zhong Yi Qi Tang, Sheng Yang Yi Wei Tang. Zhu Dan Xi (also named as Zhu Zhen Heng, about 1280-1358) Yin Enriching School: Indulgence was the root of all disorders and exhorted the value of Yin tonics in the prevention and treatment of diseases. He advocated that Yang was often in excess while Yin was often in deficiency. He was considered as the founder of Yin-enriching School. - Masterpiece was Ju Fang Fa Hui (An Expounding of the Imperial Grace Formulary of the Tai Ping Era) and Dan Xi Xin Fa (Zhu Dan Xi's Medical Secret), and representative formulas: Da Bu Yin Wan, Hu Qian Wan. - Minister fire always making trouble - In addition, there appeared some books that included the Analysis of Formulas, such as: - Zhu Jie Shang Han Lun (Commentary on Shang Han Lun), - Shang Han Ming Li Lun (Deliberation of Shang han Lun) by Cheng Wu Ji (about 1062-1155). Stage 4: Refining and Developing Ming and Qing Dynasties (14th to 19th Centuries) Zheng Zhi Zhen Sheng (Standardized Patterns and Treatments): Compiled by Wang Ken Tang (also named as Wang Yu Tai or Wang Sun An, 1549-1613), in which Wang developed a synthesis of the approaches of the various schools by utilizing concepts from both Nei Jing & Shang Han Lun. This book included the rich experiences of the previous doctors and classified prescriptions according to six departments (febrile, internal, dermatological, pediatric, obstetrical), and largest circulation of medical books in 17th century. Jing Yue Quan Shu (Jing Yue's Complete Works) in 64 volumes: Written by Zhang Jing Yue in 1624 (also named as Zhang Jie Bin, about 1563-1640), in which all aspects of medicine covered (febrile, internal, gynecological, pediatric, dermatological, herbal, ancient and 2 volume of 186 new formulas), the essence of various schools extracted and analyzed, patterns differentiation along with treatment principles and formulas emphasized. - Classified the formulas into 8 groups under 8 strategies: Bu, He, Gong, San, Han, Re, Gu, Yin. - Zhang advocated theory: "Yang is never in excess, Yin is never sufficient". Thus he tended to use warm and tonifying herbs: Shu Di Huang was among his favorite herbs; His representative formulas are - Da Bu Yuan Jian, Yu Nu Jian, Ji Chuan Jian.

Brief History of CHM Formulas [Continued]	
● Pu Ji Fang (Formulas for Universal Applications): Written by Teng Hong & Liu Chun under the patronage of one of the emperors of Ming Dynasty and issued at the beginning of 15th century. This book was considered as biggest collection of formulas (61,739 formulas with 239 illustrations). ● Analytic Collection of Medical Formulas (Yi Fang Ji Jie) – Written by Wang Ang and published in 1682. The book listed about 700 formulas, classified into 21 chapters such as tonifying, releasing, vomiting, draining, inducing, harmonizing, Qi regulating, blood regulating, wind dispersing, cold dispelling, eye brightening, bug killing.... [Very comprehensive & classified well] ◊ <u>Under</u> each listed formula there were the name, ingredients, indication, explanations and experiences from the practitioners of previous dynasties. ◊ Emphasized relationship between formulas (herbs), zang fu & meridians. ● Treatise on Warm Pathogens (Wen Re Lun) – Lectured by Ye Tian Shi and edited by his disciple in 1746, a book on the diagnosis and treatment for febrile diseases in which the ◊ Developed 4-level diagnostic system [Wei, Qi, Ying, Xue]. ◊ Representative formulas: Yin Qiao San, Sang Ju Ying, Qing Ying Tang. ● Systematic Differentiation of Warm Diseases (Wen Bing Tiao Bian) – Written by Wu Ju Tong (also named as Wu Tang) in 1798, in which Wu expanded on Ye's work by developing the 3-Burner diagnostic system. For example, based on Zhang Zhong Jing's formula zhi gan cao tang, Wu developed jia jian fu mai tang, yi jia fu mai tang, er jia fu mai tang, san jia fu mai tang, and da ding feng zhu series. ● Fu Qing Zhu's Obstetrics and Gynecology (Fu Qing Zhu Nu Ke) – Written by Fu Shan (1607-1684) and first published in 1827. The book consists of 77 chapters plus Postpartum Care including Ob-Gyn's Dx and Tx with easy-understanding language and practical formulas. ● Formula Jingles (Tang Tou Ge Jue) – Written by Wang Ang and published in 1694. Over 300 formulas were included with their names, ingredients, indications, and some modifications in the form of jingle, so that it might be easier for beginners to learn by heart.	● Medical Comprehension (Yi Xue Xin Wu) – Written by Cheng Guo Peng (also named Cheng Zhong Ling) and published in 1732, in which ● Eight Strategies [8 Principles] was first elaborated: han [sweating], tu [vomiting], xia [downward draining], he [harmonize], wen, qing, xiao, bu, and internal, skin, ob-gyn, eent disorders were covered. This book is very concise and practical and consequently referred to by later practitioners. ● Zhong Yi Feng Ji Da Ci Dian: 96, 592 Formulas Jing Fang [经方] Classical Formula School ● Formulas in books by Zhang Zhong Jing, Shang Han Lun and Jin Gui yao Lue, which has been used for about two thousands years and contain fewer ingredients in one formula. ◊ Elegantly formed ◊ Clear methodology ◊ Have to worship & follow the past, the Classic Rules Shi Fang [时方] Latter-day Formula School ● Formulas devised from the Song dynasty onward, and particularly those developed by practitioners of the Warm-febrile Disease School, and usually contain more ingredients in one formula. ◊ Diseases have changed since Shang Han Lun was written ◊ Clinical standards have changed ◊ Effectiveness first Review and Think ● How many stages in the history of development of CHM formulas? ● Who are the major figures, and what are their representative works in CHM formulary history? ● What are the main systems for categorization of the formulas ● What are the common-used forms for administration, and their dis/advantages? ● What are the differences between jing fang and shi fang?

Introduction to Chinese Herbal Formulas	
Developed by Dr. Zhang Zhong Jing in Shang Han Lun	
Diagnosis	Li: Theory [From Sx]
Strategy	Fa: Tx Principle [From Dx]
Formula	Fang: Prescription [From differentiation]
Herb	Yao: Included in formula +/-
Relationship of Formulas to Strategies ● Strategies developed from formulas ● Strategies are guidelines and principles for application of formulas ● Formulas are reflection and verification of strategies ● "The formula is derived from the strategy, and the strategy arises from the differentiation."	
Eight Traditional Strategies (Ba Fa) The 8 methods exist in any single method. Likewise, a myriad of methods exist within the 8 methods.	
● Sweating (Han Fa) ● Vomiting (Tu Fa) [Pathogen above middle jiao] ● Downward Draining (Xia Fa) [Pathogen below middle jiao] ● Harmonizing (He Fa) [Two best friends start fighting] ● Warming (Wen Fa) ● Clearing (Qing Fa) ● Reducing (Xiao) ● Tonifying (Bu)	
Fundamental Treatment Principles in TCM (a quick review) ● Root [Ben] (etiology, pathogenesis) vs. branches [Biao] (manifestation) ● Normal treatment [zheng zhi] vs. contrary treatment [fan zhi] ◊ Treat cold with warm, Treat Heat with Cold [Big symptoms] ● Different treatment for the same disease vs. Same treatment for different diseases ● Treating disease according to the season, environment, and individual ◊ Skinny people: Fire ◊ Obese people: Damp	
Categorization of Formulas [FYI]	
● Seven types of formulas (qi fang)	● Large, small, mild, urgent, odd-numbered, even-numbered, and composite types
● Ten types of formulas (shi ji)	● da, xiao, huan, ji, ji, ou, chong
● Twenty-two types of formulas	● Disseminate (Xuan), Unblock (Tong), ● Tonify (Bu), Drain (Xie), Clear (Qing), ● Weigh Down (Zhong), Bind (Se), ● Lubricate (Hua), Dry (Zao), ● Moist (Shi)
● Our classes are organized in the same manner (19 chapters), with a few modifications.	● Tonify & Nourish, Disperse Exterior, ● Induce Vomiting, Attack Interior, ● Simultaneous Treatment Of Exterior & Interior ● Harmonize & Relieve, ● Regulate Qi, Regulate Blood, ● Dispel Wind, Dispel Cold, ● Clear Summer Heat, ● Resolve Dampness, ● Moist Dryness, ● Drain Fire, Eliminate Phlegm, ● Eliminate & Guide Out Stagnation, ● Preserve & Bind, Kill Parasites, ● Improve Vision, Abscesses & Sores, ● Menstruation & Childbirth, ● Emergencies

Introduction to Traditional Chinese Herbal Medicine	
Developed by Dr. Zhang Zhong Jing in Shang Han Lun (Qing Dynasty) [3rd century AD] Diagnosis □ Strategy □ Formula □ Herb [8 Methods] ● Diagnosis: Comes from analysis & synthesis of symptoms & signs ● Strategy: Based on Diagnosis ● Formula: Under guidance of strategy ● Herbs vary from symptoms & signs ● Identify the patient's problem, treatment strategy, formula that incorporates the strategy □ specific herbs that constitute the formula will naturally follow Eight Traditional Strategies (Ba Fa) The 8 methods exist in any single method. Likewise, a myriad of methods exist within the 8 methods. All 8 Methods are used today, except vomiting. ● Sweating (Han Fa): Induces sweating by stimulating & disseminating the LU Qi, regulating & facilitating the interaction between Ying & Wei Qi, so that the pores open & pathogenic influences in the exterior or other superficial level of the body can be released with sweat. Applied in 2 ways: ◊ Acrid & Warming: Ma Huang Tang ◊ Acrid & Cooling: Ying Qiao San [Honeysuckle] ● Vomiting (Tu Fa): [Pathogen above middle jiao] Stimulates the Stomach so that phlegm, stagnant food or toxic stuff stuck in the throat, chest, or stomach cavity can be expelled through the mouth. ◊ Melon Pedicle Powder [Gua Di San] ● Downward Draining (Xia Fa): [Pathogen below middle jiao] Induces defecation to cleanse bowels & expel substantive pathogenic influences through rectum. This method is very strong, only used for ejecting substantive pathogenic stuff from the body. Applied in 4 ways: ◊ Purge Heat Accumulation: Major Order the Qi Decoction ◊ Warm Yang & Guide Out Accumulation: Rhubarb & Prepared Aconite Decoction ◊ Moistening Intestines & Unblock Bowels: Hemp Seed Pill ◊ Drive Out Excess Water: Ten JuJuBe Decoction ● Harmonizing (He Fa) [Two best friends start fighting] Harmonizes or regulates functions of different levels & Organs. Applied in 5 ways: ◊ Harmonize Shao Yang: Minor Bupleurum Decoction ◊ Vent th Membrane Source: Reach the Membrane Source Decoction ◊ Harmonize GB & ST: Artemisia Annua & Scutellariae Decoction ◊ Harmonize LV & SP: Rambling Powder ◊ Harmonize ST & Intestines: Pinellia Decoction to Drain Epigastrium ◊ Mu Yuan: Special concept in TCM □ Special place where pathogens like to hide	● Warming (Wen Fa): Warms interior & unblocks meridians to dispel cold from interior or meridians □ Restore functions of Yang Qi. Applied in 3 ways: ◊ Warm meridians & disperse cold: Dang Gui Decoction for Frigid Extremities ◊ Warm Middle & dispel cold: Li Zhong Decoction ◊ Restore & Revive Yang: Ginseng & Prepared Aconite Decoction ● Clearing (Qing Fa): Clear Heat & Drain Fire to eliminate Heat, Fire & their associated toxicity from body. Usually applied in 4 ways: ◊ Qi Level: White Tiger Decoction ◊ Clear Heat from Ying Level & Cool Blood: Clear Ying Level Decoction ◊ Clear Heat & Relieve Toxicity: Coptidis Decoction to Relieve Toxicity ◊ Clear Heat from Organs: ▪ Honeysuckle, Forsythia & Puffball San ▪ Drain the White Powder ▪ Clear the Stomach Powder ▪ Drain the Yellow Powder ▪ Jade Women Decoction ▪ Guide out the Red Powder ▪ Gentiana Long Dan Cao Decoction to Drain Liver ▪ Drain the Green Pill ● Reducing (Xiao Fa): Gradually reduces or eliminates clumping or accumulation due to Stagnation of Qi, Blood, fluid, parasites. Applied in 6 ways: ◊ Eliminate Food Stagnation: Preserve Harmony Pill ◊ Reduce Accumulation: Cinnamon Twig & Poria Pill ◊ Transform Phlegm: ▪ Er Chen Tang [Two Cured Decoction] ▪ Warm GB Decoction ◊ Eliminate childhood nutritional impairment: Strengthen Spleen Pill ◊ Kill Parasite: Mume Pill [Mumps: Can cause infertility in men] ◊ Reduce Sores & Disperse Abscesses: Universal Benefit Decoction to Eliminate Toxin ● Tonifying (Bu Fa): Tonifies by enriching, nourishing, augmenting or replenishing weak or deficient aspects of the body. Applied in 4 ways: ◊ Tonify Qi: Four Gentlemen Decoction ◊ Tonify Blood: Four substance Decoction ◊ Tonify Yin: Six Rehmannia Pill ◊ Tonify Yang: KD Qi Pill

Introduction to Chinese Herbal Formulas	
Composition of the Formulas: Principles for making up formulas [4 Ranks]	
Chief (Jun): King, 君 Emperor	The ingredient that is directed against, and has the greatest effect upon principal pattern or disease.
Deputy (Chen): Minister, Associate 臣	Aids the chief in treating the principal pattern or disease; serves as the main ingredient directed against a coexisting pattern or disease.
Assistant (Zuo): Adjutant 佐	Reinforces the effect of the chief or deputy; moderates or eliminates the toxicity of chief or deputy, or moderates their harsh properties; has an opposite effect of the chief and is used in very serious & complex disorders.
Envoy (Shi): Messenger [Gan Cao: Enters all 12 meridians]	Focuses the actions of the formula on a certain channel or area of the body; harmonizes & integrates actions of other ingredients
Composition of the Formulas: Modifications in Composition [Examples]	
Ma Huang Tang 麻黄汤	Ma Huang, Gui Zhi, Xing Ren, Zhi Gan Cao
San Ao Tang 三拗汤	Ma Huang, Xing Ren, Gan Cao, Sheng Jiang
Ma Huang Tang 麻黄汤 (Perspiration)	Ma Huang, Gui Zhi, Xing Ren, Zhi Gan Cao
Ma Xing Shi Gan Tang 麻杏石甘汤 (Clear Lung Heat)	Ma Huang, Xing Ren, Shi Gao, Gan Cao
Hua Gai San 华盖散	Ma Huang, Xing Ren, Gan Cao, Zi Su Zi, Chen Pi, Chi Fu Ling, Sang Bai Pi
Huang Lian, Wu Zhu Yu	Zuo Jin Wan (Left-Metal Pill, For Liver Fire)
Huang Lian, Mu Xiang	Xiang Lian Wan (Middle Jiao Damp Heat With Qi Stagnation)
Huang Lian, Rou Gui	Jiao Tai Wan (For Heart & Kidney Disconnection)
Types of Formulations and Their Advantages vs. Disadvantages	
Decoctions (Tang)	Rapidly Absorbed, Strong, Easy To Modify
Powders (San)	Convenience In Administration, Lower Cost
Pills (Wan)	Easy To Store, To Take, Less Expensive
Syrups (Tang Jiang)	Sweet Taste, Easy For Children
Medicinal Wine (Yao Jiu)	Good For Chronic Xu, Or Pain Associated With Wind Damp Or Trauma
Tablets (Pian)	Purified, Concentrated
Granules (Chong Fu Ji) Herb Extract Powder	Easy To Store And Absorbed, Smaller Dosage Needed; Expensive
Injections (Zhen Ji)	Fast, Unaffected By Any Interaction With The Digestive System Or Foods

Formula Modifications: Replace bad tasting ingredients with acceptable taste

- Huang lian
- Ku shen
- Wu ling zhi

Special Treatments for Decocting

• Decocted First (Xian Jian):

- ◊ Fu Zi, Chuan Wu, Shi Jue Ming, Cao Wu, Long Gu, Mu Li, Ci Shi, Zhen Zhu,
- ◊ Gui Ban, Bie Jia, Shi Gao, Shui Niu Jiao, Dai Zhe Shi, Si Gua Luo

• Added Near End (Huo Xia) [Aromatics]:

- ◊ Bo He, Mu Xiang, Sha Ren, Bai Dou Kou, Qing Hao, Da Huang

• Decocted In Gauze (Bao Jian) [Nasty Stuff, small seeds, flowers]:

- ◊ Xuan Fu Hua, Che Qian Zi, Liu Yi San, Bi Yu San, Chi Shi Zhi

• Separately Decocted Or Simmered [Expensive Stuff] (Ling Jian, Ling Dun)

- ◊ Ren Shen, Xi Yang Shen, Lu Rong

• Dissolved in the strained decoction (Rong Hua):

- ◊ E Jiao, Yi Tang

• Taken With The Strained Decoction (Chong Fu):

- ◊ Chuan Bei Mu, San Qi, Niu Huang, Zhu Li

Timing and Manner of Administration [Think about Patients]

- Taken about one hour before meals generally
- Take herbs for specific organs at optimal time according to clock
- Ingredients that irritate Stomach: take after meals
- Rich, cloying tonics: take on an empty Stomach.
- Calm spirit: taken before going to bed
- Malarial conditions: take 1-3 hours before an attack on a regular basis if timing is regular
- Releasing Exterior: take while warm
- Taken warm causes nausea or vomiting: take cool
- Patent herbs: take at a specified time as needed
- Ji Ming San: take as soon as one awakens
- Toxic formulas: start with a small dose, slowly increase

Measurement:

- 1 liang 两 = 30 g 克
- 1 qian 钱 = 3 g
- 1 fen 分 = 0.3 g

Dosage:

- Common dosage for most of the available substances: 3-5 qian, [9-15 g].

Formula Modifications: Effects Of Modifying Relative Dosage Of Ingredients				
Chief (Jun)	Deputy (Chen)	Assistant/Envoy (Zuo/Shi)	Formula (Fang)	Indications (Zhu Zhi)
Da Huang 12	Zhi Shi 3 Pieces	Hou Po 6	Xiao Cheng Qi Tang	Heat Clumping (Constipation)
Hou Po 24	Zhi Shi 5 Pieces	Da Huang 12	Hou Po San Wu Tang	Qi Clogging (Constipation)

Formula Modifications: Effects Of Modifying Relative Dosage Of Ingredients					
Shui Zhi	Meng Chong	Da Huang	Tao Ren	Formula	Indications
30 pieces	30 pieces	9	20 pieces	Di dang tang	Shang han xu xue
20 pieces	20 pieces	9	25 pieces	Di gang wan	Mild shang han xu xue

Chapter 1: 汗法 Formulas That Release the Exterior [Sweating]	
Exterior conditions - Fever and chills, head and body aches, and a floating pulse. Also: - Acute and superficial edema (feng shui 风水) - Early stage measles and incompletely expressed rashes - Initial stage of carbuncles, sores and unknown skin conditions accompanied by fever and chills	- Neijing (shu wen Chapter 5): When at the skin level, use sweating to discharge. - Administration: decoction, powder. Usually taken hot after meals. - Preparation: cook for a relatively short period of time due to ingredients in the formulas are light and volatile (too much heat will damage the efficacy). - Precaution: excessive sweating injures Qi and fluids. Formulas should be adjusted to suit the individual's constitution, climate, and season.

Acrid-Warm 辛温 to Release Exterior 解表 wind-cold Wind-cold type: fever and chills (chills predominant), head and body aches, no sweating/fever and chills remain post-sweating; sneezing, stiff neck, clear/white nasal discharge/sputum; a white thin tongue coating,	- Pulse: floating/floating [most important], tight - Tx: acrid-warm formulas to induce sweating to release wind-cold
--	---

Ma Huang Tang 麻黄汤 (Ephedra Decoction)	Source: Shang Han Lun
Actions: Releases exterior cold & arrests wheezing. - Preparation: < 20' [Don't cook for more than 20 minutes] - Administration: taken hot to induce sweating - Indications: - Taiyang shang han/ wind cold exterior shi. Fever & chills w/o sweating Floating, tight pulse. [Exterior Excess] Exterior condition but pores closed □ Can't get rid of pathogen. Not really an excess. Means that pores are closed - Cause: Wind-cold exterior shi 风寒表实 – fever and chills (chills predominant) without sweating, headache, generalized body aches [Wei syndrome], wheezing, thin, white tongue coating, and floating, tight pulse. - Chronic asthma [wheezing], breathing not easy, upper respiratory tight - Wind cold invasion (exterior), surface closed - Feel hot but cold Applications: - Primary focus: stimulate sweating, used for Taiyang/cold excess in the exterior. - Cold/flu/acute bronchitis, asthma mainly manifesting as wheezing due to cold - Bi Sx due to wind cold damp - Nosebleeds w/o sweating and with a floating/tight pulse - Acute glomerulonephritis - Skin disorders due to wind cold	Modern research: - Antipyretic - Promotes glandular secretion, esp. sweating & tearing - Antitussive - Antiasthmatic - Expectorant - Antibacterial, antiviral Case study Mr. S., male, 19 years old, a college student. Mr. S. has been suffering from chills and fever, headache, no sweating, no cough since last night after he ran back home soaked in a rain. Slightly flabby tongue with thin white coat, floating and tight pulse. Dx: Wind cold invasion, just started last night [Wind Cold Excess] Tx: Ma Huang Tang [Wind cold invasion in Tai Yang] Fx:

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Ma Huang	9	Warm, acrid, Slightly bitter	LU, UB	Disseminates lung qi, arrest wheezing Very strong diaphoretic Release Exterior [surface]
Deputy	Gui Zhi	6	Warm, acrid, sweet; aromatic	LU, UB	Mutual accentuation [xiang xu] [1+1=>2] with ma huang, diaphoretic, Release exterior [Esp. muscle layer. Can work slightly deeper than Ma Huang. Muscle aches due to wind cold]
Assistant	Xing Ren [Ku Xing Ren] [Apricot Seed]	9	Warm, bitter	LU, LI	Unblock lung qi, help arrest wheezing [Specialty, wheezing & coughing, bring rebellious Qi Downward] LU [Exterior], LI [Constipation (Oily)]
Envoy	Zhi Gan Cao	3	Warm, Sweet [Protect middle jiao]	LU, SP	Harmonizes & moderates diaphoretic action of ma huang [Harmonize, neutralize harshness & side effects of other ingredients] Protect middle jiao because of sweetness

Associated Formulas	Ingredients	Plus	Minus	Indications
Ma Huang Jia Zhu Tang	- Ma Huang - Gui Zhi - Xing Ren - Zhi Gan Cao Bai Zhu 12	Bai Zhu 12		Body aches due to damp cold
Da Qing Long Tang [Very Important formula for severe wind cold with internal heat]	Ma Huang [18] - Gui Zhi - Xing Ren - Zhi Gan Cao Shi Gao Sheng Jiang Da Zao	- Ma Huang □ 18 - Plus Shi Gao - Sheng Jiang, Da Zao		Exterior cold w/interior heat. Severe fever & chills w/o sweating Acute floating edema Internal Heat (constitutional) [Ex: heavy smoker, LU toxins] Patient feel very hot inside body - Plus Shi Gao [very cold, for interior heat] - Sheng Jiang, Da Zao [Release exterior, protect middle jiao]
San Ao Tang [3]	- Ma Huang - Xing Ren - Zhi Gan Cao		Minus Gui Zhi	Mild wind cold Initial stage [much weaker]
Hua Gai San [7 ingredients] [Big Umbrella (LU)]: Large organ, big, on top,	Sang Bai Pi, Zi Su Zi, Chi Fu Ling, Chen Pi	Plus Sang Bai Pi, Zi Su Zi, Chi Fu Ling, Chen Pi	Minus Gui Zhi	Internal phlegm with wind cold attack [Damp heat cooked to generate phlegm] Scoop away, stop production

Gui Zhi Tang (Cinnamon Twig Decoction) Source: Shang Han Lun

Actions: Releases Exterior From Muscle Layer, Regulates Ying & Wei. ● Preparation: < 20' ● Administration: taken hot to induce some sweating Indications: ● Wind Cold Exterior Deficiency. Fever & aversion to wind, HA. Exterior unrelieved by sweating, floating relaxed or floating slightly soft pulse. ● Similar presentation in patients recovering from serious diseases or after childbirth. ◊ Ying & Wei Qi disharmony: Excessive sweating ● Unusual sweating due to ● Wind-cold exterior xu 风寒表虚 fever and chills unrelieved by sweating, aversion to wind, headache, stiff neck, nasal congestion, dry heaves, no particular thirst ● T: thin, white, moist coating, P: floating, relaxed Applications: ● wind cold invasion leading to an exterior cold deficient sx (taiyang zhong feng/biao xu) ● Flu/cold/URI ● Postpartum fever ● Chronic low-grade fever ● Chronic/allergic sinusitis ● Eczema, urticaria (pruritus) ● Frostbite	Modern research [FYI] ● Dual-direction regulation: temperature, sweat secretion ● Anti-inflammatory ● Analgesic ● Sedative ● Bacteriostatic ● Expectorant Case Study ● A 32 y-o female comes in with fever & chills, aversion to wind for 2 days. Sweating after taking ma huang tang last night. But starting this morning she is unable to move her neck [neck stiffness], especially while driving. ● A kind of normal colored tongue with thin white coating. A ● floating & relaxed pulse. ● Dx: Wind Cold Exterior Deficiency ● Tx: Release exterior wind cold & address neck stiffness ● Fx: Gui Zhi Jia Ge Gen Tang Review & Think ● Please make a comparison of ma huang tang and gui zhi tang in terms of their ingredients, actions, indications, applications and pathological mechanism.
---	---

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Gui Zhi	9	Warm, acrid;	LU, UB	Releases wind cold, regulates Wei
Deputy	Bai Shao Yao	9	Cool, bitter, sour	LR, SP	With gui zhi, regulates Ying Wei Together: Harmonize Ying & Wei Abnormal sweating: Pores open when they're not supposed to be open Chief Pair: Gui Zhi & Bai Shao Yao
Assistant	Sheng Jiang	9	Warm, acrid;	LU, ST	Secondary Pair to help Chief Pair: Sheng Jiang & Da Zao Assists gui zhi in releasing, calming ST to address nausea [Good for ST disorders, rebellion]
	Da Zao	3 pieces	Neutral, sweet;	SP, ST	Tonifies the middle, assists bai shao in regulating Ying
Envoy	Zhi Gan Cao	6	Warm, sweet;	LU, SP	Regulates Ying Wei; with Gui zhi produces Yang from sweet & acrid, with bai shao produces Yin from sweet & sour Sweet & Acrid: Produces Yang Sweet & Sour: Produces Yin Enters every meridian

New formulas	Based on gui zhi tang	Indications
Gui Zhi Jia Ge Gen Tang	Plus ge gen	● Taiyang sx w/stiff neck and upper back, sweating
Gui Zhi Jia Hou Po Xing Zi Tang	Plus hou po, xing ren [5+2=7 ingredients]	● Wheezing plus gui zhi tang sx
Gui Zhi Fu Zi Tang	Plus fu zi	● Bi sx in the meridians due to wind cold
Gui Zhi Jia Shao Yao Tang	Double shao yao [18]	● Tai yin from tai yang due to incorrect purgatives at tai yang ● Because of incorrect treatment of Tai Yang ☐ get into SP
Gui Zhi Qu Shao Yao Tang	Minus shao yao	● Irregular pulse, chest fullness due to incorrect purgatives at Tai yang ● Qu = get rid of

Modifications [FYI]		
Plus fang feng, xin yi hua	Disperse w-c, unblock nasal congestion	More w-c with sneezing & nasal conge
Plus fang feng, qiang hu	Disperse w-c-d	W-c-d with bodyaches & joint pain
Plus fang feng, huang qi	consolidate the surface	Profuse sweating
Bai shao up; gui zhi, sheng jiang, gan cao down	Bring warm effect down	Profuse sweating
Plus xing ren, gua lou	Facilitate lung qi	Rough breathing, sob
Plus ju hua, jing jie	Dispersing wind, clear up clear orifices	Heavy, fuzzy sensation, itchy eyes
Plus gao ben, ge gen	Dredge, soften meridians	Headaches, stiff neck

Xiao Qing Long Tang (Minor Bluegreen Dragon Decoction) Source: Shang Han Lun	
● Actions: Releases Exterior, Warms Lung, Transforms Fluids, Arrests Wheezing & Cough By Directing Rebellious Qi ☐. ● Root in middle jiao ● Preparation: < 20' ● Administration: taken hot Indications: ● Wind cold invasion with chronic internal congested fluids, or with spleen xu ● Wind-cold invasion with chronic internal congested fluids 表寒夹痰湿 ◊ Fever and chills (chills predominant) without sweating, ◊ Coughing, wheezing, ◊ Sputum that is copious, white, stringy, and difficult to expectorate ◊ Stifling sensation in the chest ◊ Generalized sensation of heaviness and body aches/floating edema, ◊ No particular thirst, a moist tongue coating, and a floating, tight pulse. ◊ [More complicated case than just wind cold] Applications: Exterior wind cold with interior congested fluids. ● Acute bronchitis/acute exacerbation of chronic bronchitis/bronchial asthma ● Infantile asthmatic bronchitis ● Emphysema/pulmonary heart disease ● Flu ● Exudative pleurisy ● Whooping cough	Modern research: ● Antiasthmatic (anti-acetylcholine) ● Antiallergic (antihistaminic) ● Circulation-promoting Case Study ● A 65 y-o male comes in for coughing with clear, copious mucus secondary to a rainy day outdoor work a couple of weeks ago. He has been suffering from a chronic bronchitis (slight wheezing and sob) for 26 years, often worse with cold exposure, lingering for 2 to 6 weeks ● A moist tongue coating; a weak pulse with a little bit floating. Becomes slightly tight and stronger while coughing. ● Dx: Arrest coughing ● Tx: Review & Think ● What are the differences between xiao qing long tang & da qing long tang? ● What are the differences between xiao qing long jia shi gao tang & da qing long tang? ●

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Ma Huang	9	Warm, acrid		Release exterior, move damp by facilitating lung qi
	Gui Zhi	9	Warm, acrid		Mutual accentuation (xiang xu) with ma huang Regulate Ying & Wei ☐ Back to Normal
Deputy	Gan Jiang	3	Warm, acrid		Deputy pair: Get rid of phlegm, mucus, dampness With xi xin, warm interior, transform damp, release w-c [dried, domestic, focus on middle jiao]
	Xi Xin	3	Very warm, acrid		With gan jiang, help release w-c, also stop coughing [Wild ginger ☐ Very warm, very strong, focused on upper jiao]
Assistant	Wu Wei Zi	6	Sour, astringent		Prevent leakage of lung qi due to warm acrid herbs [5 flavor seeds, but sour is major flavor ☐ astringent] treat possible side effects, prevent leakage of LU Qi from the strong herbs]
	Bai Shao	9	Sour, nourishing		Prevent too dry warm by nourishing blood and Yin Regulate Ying & Wei ☐ Back to Normal
	Ban Xia	9	Dry warm		Dry damp, harmonize ST by conducting Qi downward Help Xi Xin & Gan Jiang to treat damp [focused on middle jiao]
Envoy	Zhi Gan Cao	6	Sweet, warm		Augment qi, harmonize all the herbs Too much spicy stuff make middle jiao upset ☐ add sweet [yin to protect middle jiao]

Modifications			
Ma huang and gui zhi up;	Sheng jiang replaces gan jiang	Stronger in dispersing w-c	Severe chills
Gui zhi and bai shao up;	Plus sheng jiang, da zao	Stronger in regulating Ying and Wei	Aversion to wind, sweating
Plus bai zhu, ze xie, fu ling	Plus shi gao, huang qin	Stronger in transforming damp	Puffiness in limbs and on face
Minus gan jiang, gui zhi;		Decreasing warming effect, add heat clearing effect	Increasing fever, with thick yellow mucus
Minus ban xia	Plus tian hua fen	Add heat clearing and fluid generating effect	thirst

New formulas	Based on xiao qing long tang	Minus	Indications
Xiao Qing Long Jia Shi Gao Tang	Plus shi gao		Wheezing with irritability, abdominal & thoracic distention
She Gan Ma Huang Tang	Plus she gan [reduce itching, tingling sensation in throat] zi wan, kuan dong hua [stop coughing] sheng jiang, da zao;	minus gan jiang [too dry], gui zhi [too dry], bai shao, zhi gan cao	[Coughing & wheezing with rattling sound] [Water chicken crow, like birds in swamp] (Whooping Cough)

Jiu Wei Qiang Huo Tang [九味羌活汤] (Nine-herb Decoction with Notopterygium)	Source: Ci Shi Nan Zhi Patent pills available
● Actions: Release Exterior Wind Cold Damp, Clear Interior Heat ● Preparation: <20' ● Administration: taken warm. ● Indications: external w-c-d with internal heat (no sweating, HA, stiff neck, achy/painful joints and muscles). ● This formula has patent pills available Indications ● External wind cold damp with internal heat 风寒湿夹内热 ● Fever and chills (chills predominant) without sweating, ● Headache, stiff neck, generalized aches and pain, ● Slight thirst [internal heat], a bitter taste in the mouth, ● T: white coating, P: floating Applications: ● Externally-contracted wind-cold-dampness with concurrent internal accumulation of heat characterized by fever and chills (more chill) without sweating, HA, and stiff neck, generalized aches and pain. [New thing is the pain] ● Headaches: w-c-d type/w-d type ● Acute urticaria: w-c-d type/w-h-d type ● Rheumatic fever ● Flu/URI	Modern research: ● Antipyretic ● Analgesic ● Anti-inflammatory ● diuretic Case Study ● A 48 y-o male looks for Tx for his aches in the limbs. He tells us he fixed a flat tire in rain & caught a cold 4 days ago: feel cold and heavy, muscle aches starting on the neck, spreading to arms and legs; no appetite, nauseated at times. He's been a heavy smoker (2 packs a day) for 23 years. ● A white and slimy tongue coating. A slight floating and wiry pulse [pathogen getting deeper]. You noticed he spit out some sticky clear sputum while talking. ● Dx: Internal Damp Heat, External Wind Cold Damp [common in Seattle] ◊ Wind Cold Damp is going deeper ◊ Smoking: Internal, hidden phlegm, triggered by wind cold damp ● Tai Yang ☐ Shao Yang ● Tx: Release Wind cold Damp, transform damp in interior ● Add a little Huang Lian would be helpful

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Qiang Huo	6	Acrid, warm, aromatic	UB	Tai Yang Syndrome [Upper Part of Body & Excess] Disperses Wind Cold Damp [Du Huo: Lower part of body & Deficiency]
Deputy	Fang Feng	6	Acrid, sweet , warm		Helps chief in dispersing w-c-d, alleviating pain Very good for Wind Cold [sweet: good for wind, won't damage anything (Qi, yin), very nourishing]
	Cang Zhu	6	Acrid, bitter, warm, dry		Helps chief in dispersing and eliminating damp [aromatic ☐ get rid of damp] Very Dry
Assistant	Xi Xin	2	Acrid, very warm		Assists chief, deputies [warm meridians]
	Chuan Xiong	3	Acrid, warm	LV, GB	Assists chief, deputies [move blood, aromatic ☐ Disperse wind cold] Really good for pain in LV, GB meridians [especially LV/GB headaches]
	Bai Zhi	3	Acrid, warm		Assists chief, deputies [release wind cold damp, front headaches (Yang Ming)]
	Huang Qin	3	Bitter, cold		Clear internal heat (qi) [Damp Heat in upper jiao, especially in LU]
	Sheng Di Huang	3	Bitter, sweet, cold		Clear internal heat (Blood) [Nourish yin, clear blood heat ☐ internal heat]
Envoy	Gan Cao	3	envoy		Harmonizes all herbs

Plus shi gao, zhi mu		Stronger heat-clearing effect	Pronounced internal heat
Plus huo xiang, ban xia, chen pi	Minus sheng di	Stronger damp-eliminating effect	Pronounced damp
Qiang huo and cang zhu up; Plus wei ling xian, qin jiao, fang ji		Stronger damp- eliminating and Bi-treating effect	Severe aches and pain
Plus jie geng, bo he, niu bang zi		Soothe throat	Severe sore throat
	Minus sheng di, huang qin	No more heat-clearing effect	No heat presentation

New formulas	Based on jiu wei qiang huo tang		Indications
Jiu Wei Qiang Huo Tang (Yi Fang Ji Jie)	Plus Sheng Jiang, Cong Bai		Stronger diaphoretic action
Da Qiang Huo Tang (Ci Shi Nan Zhi By Li Dong- Yuan)	Plus Du Huo, Fang Ji, Huang Lian (Berberine) [stronger at clearing heat than Huang Qin, antibacterial & antiviral], Bai Zhu, Zhi Mu: Tonify Middle Jiao, nourish	minus bai zhi	Predominant Internal heat compare to jiu wei Written by Earth Advocate [Li Gao (also named as Li Dong Yuan, Li Ming Zhi)]

Xiang Su San (Cyperus And Perilla Leaf Powder)	Source: Tai Ping Hui Min He Ji Ju Fang
● Actions: Regulates Qi, Releases Exterior. ● Preparation: < 20' ● Administration: taken warm ● Well balanced & mild Indications: ● Exterior Wind-Cold With Interior Qi Stagnation ● Wind-cold with internal qi stagnation 风寒气滞 ● Fever and chills without sweating, headache, focal distention and a stifling sensation in the chest and epigastrium, poor appetite, belching ● Thin, white tongue coating, and a floating pulse Applications: ● mild cases in which qi stagnation (constitutional or simultaneous) with wind-cold ● Mild stomach flu ● Mild URI with emotional components ● Concurrent menstrual cycle and wind-cold ● Weak persons with wind-cold	Very, very mild, initial stage: ● Cong Chi Tang: Cong Bai [aromatic, acrid] with Dan Dou Chi [Fermented] ● Cong Chi Tang + Xiang Su San = Case Study ● A 39 y-o gloomy-looking female comes in with complaint of aversion to cold, HA, stiff neck, runny nose. She says she is on day 1 of her cycle and just learned that her mom is in hospital for her attack of very high blood pressure ● A thin white tongue coating with distended sublingual veins [Qi Stagnation]. ● A soft pulse [wind cold plus Qi stagnation] ◊ Stronger: Use Jia wei xiang su san ● Dx: ● Tx: ●

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Zi Su Ye	12	Acrid, aromatic, warm;	LU, SP	Releases exterior, moves qi [More Upper & Middle Jiao]
Deputy	Xiang Fu	12	Acrid, bitter, warm	LV, SJ	Moves & disperses stagnant qi [Strongest Qi Mover □ LV Qi]
Assistant	Chen Pi	6	Acrid, bitter, aromatic, warm	LU, SP, ST	Assists chief & deputy in moving qi [More focused on middle jiao]
Envoy	Zhi Gan Cao	3	Harmonize, strengthens St.	All 12	Prevents qi-moving herbs from depleting qi

Modifications			
Plus qiang huo, bai zhi, chuan xiong, man jing zi	Guides effect into each meridian respectively	Headaches	
Plus zi su zi, ban xia	Stronger damp-drying and qi-downward moving effect	Coughing with copious sputum	

Related Formulas	Based on xiang su san	Indications	
Xiang Su Cong Chi Tang	Plus Xian Cong Bai, Dan Dou Chi	Severe Wind Cold; pregnant women with w-c

Plus huang lian	Clear internal damp-heat	With internal heat	
Plus fu ling, ze xie	Transform & expel damp	severe damp	
Plus mu gua	Relax the spasm	Systremma: spasm of gastrocnemius	

New formula	Based on xiang ru san	Indications	
Xin Jia Xiang Ru Yin (Switch To Cold In Formula Nature) (Wen Bing Tiao Bian)	Replaces Bai Bian Dou With Xian Bian Dou Hua [Xian = Fresh, Hua = Flower (Aromatic)] Plus Jin Yin Hua, Lian Qiao	Summer damp-heat: fever, chills w/o sweating; thirst, flushed face; floating rapid pulse [ongoing inflammation inside □ Clear heat]	

Acrid-Cool Formulas To Release W-H 辛凉解表	
• Wind-heat type (wei level): • Fever, sweating, a slight aversion to wind/slight chills, HA, thirst, sore throat. Or also cough, eye redness. A thin white/slightly yellow tongue coating; a floating and rapid pulse. ◊ Epidemic, febrile diseases ☐ Warm diseases ☐ Easily damage yin ☐ Don't use much dispersing, warm stuff ◊ In those days, everyone is cold, hungry, lack of warmth ◊ Focus on get rid of cold & tonify yang Qi ◊ Get rid of febrile warm heat & nourish yin • Treated with acrid-cool formulas to release exterior wind-heat	•

Sang Ju Yin 桑菊饮 (Mulberry Leaf And Chrysanthemum Decoction)	Source: Wen Bing Tiao Bian
• Actions: Releases Exterior Wind-Heat, stops coughing by facilitating LU Qi flow. • Preparation: < 20'. • Patent form: sang ju gan mao pain (4 tid); sang chu yin pien (4 tid) • Administration: taken lukewarm • Aromatic stuff: add near end • Indications: Early-stage warm-febrile diseases 温病初起: [slight fever & chills, cough, slight thirst] • Thin, white tongue coating, and a floating, rapid pulse. • Jie Geng Gan Cao Tang: small formula, focuses on throat [sore throat, slightly scratchy throat] • Applications: Early-stage warm-febrile diseases, or other mild exterior heat disorders in which coughing, wheezing is the dominant symptom • Eye disorders –acute conjunctivitis w-h type • Hacking cough – exterior dryness (autumn dryness?) • Flu/URI • Acute bronchitis • Whooping cough • Keratitis due to herpes simplex virus	Modern research: • Diaphoretic • Anti-pathogenic microorganism • Anti-pyretic • Anti-inflammatory • Immune support Case Study • A 24 y-o male suffers from a non-productive hacking cough after he came back from a 5- day Phoenix trip. He feels a little cold, headachy, throat sore, wheezy at times (he thinks he caught bugs on airplane). • A red-tipped tongue with thin dry coating; a slightly floating, rapid pulse. [Wind Heat] • Wrists: pretty warm wrists. • Dx: • Tx: •

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Sang Ye	7.5	Sweet, bitter, cool	LU, LV	Releases w-h & cough
	Ju Hua	3	Sweet, bitter, cool;	LU, LV	For upper Jiao w-h (eyes)
Deputy	Lian Qiao	4.5	bitter, slightly acrid;	HT, LV, GB	Clears heat & detoxify
	Bo He [Hou Xia]	2.5	acrid, aromatic, cool	LU, LV	For upper Jiao w-h (orifices) [Aromatic: add near end]
	Jie Geng	6	acrid, bitter, neutral	LU, ST	For cough (ascending lung qi) [Guiding herb ☐ into lung] [Invasion into Tai Yang meridian]
	Xing Ren	6	bitter, warm	LU, LI	Paired with jie geng (descending) [one goes up, one goes down ☐ cause circle to facilitate venting of lu qi]
Assistant	Lu Gen	6	sweet, cold	LU, ST	Clears heat, generates fluids [Warm febrile diseases cause problem] Always focus on Yang [colder] [Nourish, generate, big grass]
Envoy	Gan Cao	2.5	envoy	All 12	Clears & harmonizes; paired with jie geng soothes throat [Zhi Gan Cao is too sweet, too good for bugs]

Modifications			
Plus shi gao, zhi mu	Stronger heat-clearing	qi level heat(wheezing)	
Plus huang qin	stronger lung heat-clearing	Frequent cough	
Plus tian hua fen	Generates fluids	Pronounced thirst	
Plus bai mao gen, mu dan pi, ou jie	Stop bleeding	Blood-streaked mucus	
Plus gua lou pi, zhe bei mu	Treat mucus	Viscous yellow mucus that hard to expectorate	
Plus bai ji li, xia ku cao, jue ming zi	Clear heat from Lr & Lu	Pink eyes, watery eyes	
Plus niu bang zi, ban lan gen, shan dou gen	Clear throat heat	Sore, swollen, purulent throat	
Plus shui niu jiao, xuan shen	Clear ying-level	Ying level heat(dark- red tongue)	

Yin Qiao San (Honeysuckle And Forsythia Powder) Source: Wen Bing Tiao Bian	
• Very Important Formula!!!! • Very Famous, almost most famous [Good For when catch a cold] • Most Popular formula for exterior conditions [Polluted environment □ too much toxins already in system, so when catch exterior conditions, already have heat in body □ Quickly switch to wind heat] • Next Quiz: Common ingredients between two formulas [5 ingredients in common] • Actions: Acrid-Cool To Release Wind-Heat, Clears Heat & Relieves Toxicity [detox for too much toxins, too much heat (sore throat, pink eye, general itchiness, toothache)] • Preparation: grind into powder, decoct lu gen <10'. ◊ Don't cook too much. Origanlly they used the powder • Patent: yin qiao jie du wan/pian (4 tid/qid) • Administration: taken 9g with lukewarm lu gen decoction tid/qid • Ren Dong Teng: Important for Skin disorders • Jie Geng Gan Cao Tang: Sore throat, scratchy throat Indications • Early-stage (Wei Level) warm-febrile diseases [fever, slight or no chills, headache, thirst, cough, sore throat, • T: red-tipped, thin white/thin yellow coating, P: floating, rapid Applications: Popular formula for wei- level warm-febrile diseases [yin qiao] • Flu/URI • Acute bronchitis, Pharyngitis/tonsilitis • Epidemic parotitis • Encephalitis/meningitis at early stage • Dermatitis, Measles	Modern research: • Antipyretic • Anti-inflammatory • Analgesic • Antibiotic • Antiviral • Immune support • Peristalsis-inhibiting Case Study • A 34 y-o tall smoker male complains of sore throat, hoarse voice, fever, thirst. He has HAs and cough with sticky yellow mucus when he gets up last 4 days. He has to put on one more layer to keep himself warm. Oh, you also learnt that his son was sick and had to stay home with him last week • A thin yellow tongue coating with inflamed throat; a floating rapid pulse. ◊ Floating = exterior, rapid = heat ◊ First defense department is throat, before laryngitis, pharyngitis • Dx: Yin Qiao + Sang Ju Yin together [Expensive stuff but works very well] ◊ Sore throat, toxins, but nothing for phlegm ◊ Good things for phlegm: Ban Xia, Tian Nan Shen, Dan Nan shen [prepared with ox bile to make cool] • Tx: •

Ma Xing Shi Gan Tang (Ephedra, Apricot Kernel, Gypsum, And Licorice Decoction) Source: Shang Han Lun	
● Actions: Acrid, Cool To Clear Lung Heat, calms wheezing by directing rebellious Qi downward ● Ratio: Ma Huang □ Shi Gao 1:4 ● Preparation: < 20' ● Administration: taken lukewarm ● Lung heat 肺热 :fever with or without sweating, thirst, wheezing, coughing, labored breathing, nasal flaring and pain, a red-tipped tongue with yellow tongue coating, and a rapid, forceful/slippery pulse ◊ More Internal LU Heat ◊ Some books put this formula in the Clear Internal Heat chapter ▪ [Ma Huang & Shi Gao together] ◊ If no LU Heat, use a different formula [Wind heat □ No use] ● Applications: lung heat with wheezing and coughing/exterior symptoms still present. Sx: fever, wheezing/labored breathing /coughing, yellow thin coating, rapid pulse. ● Severe flu, Pneumonia ● Acute attack of chronic bronchitis ● Pulmonary infiltration with eosinophilia ● Intractable cough [LU Heat cough, not wind heat cough] ● Cystitis [UB infection (Tai Yang) & SI]	Modern Research ● Antitubercic ● Expectorant ● Antiallergic ● Anti-inflammatory ● Antipyretic ● Cardiovascular – raise BP and heart rate ● Anti-microbial Case Study ● A 24 y-o male caught a flu last week while he was very busy at his project for finals. Now he is miserable for his coughing and wheezing with yellow sticky mucus at times [Internal LU Heat]. Staring 2 days ago, he also feels hot, especially above his chest, and sweats a little bit when he coughs. ● A thin yellow and dry tongue coating, red tip. A fast, forceful and slightly floating pulse. You noticed he kept drinking water during the interview. ● Dx: Internal LU Heat ◊ More heat, already a whole week, wind cold enters the interior ● Tx: Review & Think ● Analyze the effect and relationship between ma huang and shi gao in formula Ma Xing Shi Gan Tang. [Always question in NCCAOM □ Classic relationship] ◊ Ma Huang: Dispersing function, ◊ Shi Gao: Neutralizes the heat of Ma Huang

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Ma Huang	4.5-12	Acrid, sweet, Warm		Treat constrained fire by dispersing it [Disperse/Release Exterior] For severe lung heat, ma huang dosage is reduced and shi gao is increased; Can adjust this formula from more Internal heat □ exterior conditions [Adjust ratio of Ma Huang & Shi Gao]
	Shi Gao	18-48	Acrid, sweet, Very cold		Less internal heat and more exterior symptoms, ma huang dosage is increased and shi gao is reduced. Large dosage of Shi Gao Neutralizes Ma Huang's warm properties
Deputy	Xing Ren	9	Bitter, descending		Helps ma huang in facilitating lung qi flow downward to stop coughing & wheezing
Envoy	Zhi Gan Cao	6	Harmonizes & tonifies qi		Moistens lungs, stops coughing

Modifications			
Shi gao up, plus sang bai pi, lu gen, zhi mu	Stronger effect in clearing lung heat and generating fluids	Severe lung heat: high fever with a little sweating /without sweat	
Plus jing jie, bo he, dan dou chi, niu bang zi	Stronger effect in releasing the exterior	Internal heat with the exterior remains	
Plus jin yin hua, lian qiao, huang qin	Stronger effect in clearing internal heat	Severe internal heat	
Plus zi su zi, ting li zi, ban xia	Stronger effect in dispelling mucus and conducting qi downward	Wheezing & coughing with copious sputum	

Based on ma xing shi gan tang			
New formulas	Plus	Minus	indications

Cases in which a weak-constitutional person suffering from an exterior condition, manifesting as both exterior sx and deficient sx.	Treated with exterior-releasing herbs plus deficiency-tonify herbs simultaneously
Ren Shen Bai Du San [人参败毒散] (Ginseng Powder To Overcome Pathogenic Influences)	Source: Xiao Er Yao Zheng Zhi Jue Formulated by a pediatrician, but used for kids & adults
Actions: Releases Exterior Wind Damp, Tonifies Qi. - Not very aggressive formula, no strong diaphoretic ingredients - Very useful in Seattle for initial stage exterior condition [sore, tired, heavy, not like to move, Qi deficiency] - Damp is heavy & doesn't stay on surface □ goes to muscles & SP - Preparation: grind into a fine powder but bo he and sheng jiang (decoct); or decoct all herbs by 80% reduced dosage. - Administration: powder: 6g with decoction bid/tid; - Decoction: half to one cup bid/tid Indications: Wind-cold-damp invasion to deficient patient [high fever & severe chills with shivering, absence of sweating, pain and stiffness of head & neck, soreness & pain in extremities, focal distention & fullness of chest, nasal congestion with sonorous breathing, productive cough T: greasy, white tongue coating, P: floating, soggy Applications: originally designed for children suffering from exterior w-c-d - Underlying qi-deficient patients with external w-c-d, including the aged, post partum women, and those recovering from a debilitating illness - Infantile fever due to EPI, Infantile diarrhea - Dengue fever, Chronic suppurative mumps - Senile cold/flu - Toxic skin disorders [Stay in skin for long time □ pus it out] Patent forms of bai du san - Prime Rescue (Jade), Dispel Invasion (K'an)	Modern research: - Anti-pyretic, Analgesic - Lower liver enzymes - Urination-promoting, Diaphoretic - Phlegm-diluting, Immune-boosting Case Study - A 3 year and 5 month old boy comes in with his mom, complaining of frequently catching cold for over a year. The mother also shows her son skin pimples in the nape and chest [Toxins in the body]. This adopted boy was fed with cow milk and has been below the average of development both physically and mentally [Qi Deficiency]. He looks pale and apathetic - A slightly pale tongue white greasy coating. The index finger veins appear dark red and superficial within qi regions. - Dx: Food allergies [damp, phlegm (antibodies) □ hidden - Tx: Ren Shen Bai Du San [Minus Qiang Huo (taste not good)] add Bai Zhu □ Recovered very quickly Review & Think - What is ren shen bai du san designed for? - Why is ren shen included in ren shen bai du san? What kind of ren shen you prefer to use in the formula? Bai Ren Shen Why? - If patient not deficient, don't use Ren Shen or pathogen will stay in body - Which of the following formulas is stronger in releasing exterior wind-cold-damp – Shen Su Yin [Stronger] Vs. Ren Shen Bai Du San?

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Qiang Huo	30			Address w-c-d, alleviate pain all over [Upper & Lower body], both aromatic
	Du Huo	30			Address w-c-d, alleviate pains all over
Deputy	Chuan Xiong	30			Helps chiefs in treating pain, moving blood [Invigorates blood] Help chiefs in releasing exterior, lower fever
	Chai Hu	30			Helps chiefs in treating pains, moving blood Help chiefs in releasing exterior, lower fever
	Bo He	Little Bit			Helps chiefs in treating pains, moving blood help chiefs in releasing exterior, lower fever
Assistant	Jie Geng	30			Ascending and descending actions to regulate flow of chest qi, relieve chest discomfort [Guiding herb]
	Zhi Ke	30			Ascending and descending actions to regulate flow of chest qi, relieve chest discomfort [Moves Qi, vent damp in upper, middle jiao □ Treat bloating, heaviness in middle jiao]
	Qian Hu	30			Transform phlegm, strengthen Sp, release w-c-d – treat both root & branches
	Sheng Jiang	Little Bit			Transform phlegm, strengthen Sp, release w-c-d – treat both root & branches
	Ren Shen	30			Tonify qi to dispel pathogens; prevent relapses [Use Bai Ren Shen □ not so greasy, cloying □ Tonify Qi without retaining pathogens]
	Fu Ling	30			Transform phlegm, strengthen Sp, release w-c-d – treat both root & branches Tonify qi to dispel pathogens; prevent relapses
Envoy	Gan Cao	15			Tonify qi to dispel pathogens; prevent relapses Envoy; with jie geng to soothe throat, with ren shen to boost qi

Modifications			
Minus jie geng, qian hu	Without presentation of cough and sputum	Plus gui zhi, zhi mu, ren dong teng, sang zhi	Acute rheumatic fever
Minus jie geng, qian hu; Plus wei ling xian, qin jiao, wu tou	Pains due to wind-damp Bi	Plus chan tui, ku shen	Wind toxic rashes with itchiness
Minus qiang hu, du hu, fu ling	Without damp presentation		

Related Formula	Based on ren shen bai du san	Indications	Notes
Jing Fang Bai Du San [Replace Ma Huang Tang, etc. □ more comprehensive]	- Ren Shen; + Jing Jie, Fang Feng [Often Paired]	Severe w-c-d in strong persons (without sweating)	Release wind [milder than Ma Huang & Gui Zhi], more commonly used than Ren Shen Bai Du San
Shen Su Yin (He Ji Ju Fang) [More tonifying, middle jiao & internal damp ingredients □ better for weak patients]	Ren Shen, Jie Geng, Qian Hu, Fu Ling, Gan Cao, Sheng Jiang, Zi Su Ye, Chen Pi, Ge Geng, Jiang Ban Xia [prepared w/ Sheng Jiang], Mu Xiang, Da Zao	Exterior w-c and internal damp-phlegm in weak persons	Zi Su Ye: warm, acrid Chen Pi: Ge Gen: Muscle layers Jiang Ban Xia: Better for middle jiao

Formulas That Drain Downward 下法	
- Interior excess heat: accumulations of heat, cold, fluids, foods, poisons, and parasites. [Pathogens below the middle jiao] - Treated with formulas (harsh ingredients) that unblock bowels to remove accumulation through stool, and have a cathartic effect upon accumulation of fluids (damp, phlegm...). [Draw pathogens out through lower exit]	Precautions: - Don't use with exterior condition and during pregnancy. [Very strong push out function, may disturb fetus & cause it to move away] - Should never be used long-term. [Could draw exterior conditions into interior]

Cold To Purge Heat Accumulation 寒下 [Very Strong]	
Formulas in this section are mainly consist of bitter cold purgative ingredients, and used for abdominal distension 胀/fullness 满/pain 痛,	- Worse with pressure [excess], or with fever, a thick yellow tongue coating, - excessive and full/strong pulse 沉实.

Da Cheng Qi Tang 大承气汤 (Major Order The Qi Decoction) [Very Important!]	
Actions: Vigorously Purges Heat Accumulation. Preparation (decoction): Add Da Huang Near End [cook too long, no purging function, moves blood instead] - Administration: taken warm; discontinue upon diarrhea induced Indications [Very Excess, lot of heat, blocked lower jiao □ Open up] - Yang Ming Fu Organ Excess [阳明腑实证]: severe constipation & flatulence, focal distention, and abdominal fullness, abdominal pain □ with pressure, tense & firm abdomen; dry yellow/dry black tongue coating with prickles, a submerged excessive pulse. Tidal fever, delirious speech, profuse sweating from palms & soles. Applications: Yang Ming Fu Organ (Excess) [severe constipation, flatulence, focal distention, sensation of abdominal fullness; dry yellow/dry black tongue coating with prickles [heat], submerged forceful pulse. 4 Types Abdominal Symptoms: focal distension 痞, fullness 满, dryness 燥, hardness 实 [Need to have all 4 to prescribe this formula] [Pi, Man, Zao, Shi] - Diarrhea with bluegreen, stinky, turbid fluid, presenting with abdominal pain, hardness and masses [Hard stool accumulate too long in lower jiao □ dried up (bullets), in spaces between bullets "nasty water/fluid" can go through] - Heat collapse, - Kuang (hysterical attack) [aggressive historical type (excess heat)] [Dian: depressed type] - Acute calculus diseases (cholelithiasis, urolithiasis...) - Gastric dysperistalsis, Post-surgery GI Sx, Intestinal adhesive obstruction - Acute lead colic, Acute necrotic pancreatitis [Heat & toxins block insides] - Acute renal failure due to epidemic hemorrhagic fever	Source: Shang Han Lun [Zhang Zhong Jing formula] Modern Research - Peristalsis-promoting, Promotion of volume of blood flow in intestines - Anti-inflammatory, Bacteria inhibiting - RNA synthesis-promotion for hepatic cells Case Study - A 32 y-o male looks for help for his stubborn constipation with abdominal pain and fullness secondary to a flu he caught 8 days ago. He also feels thirsty and hot. [Heat accumulation, yin consumed] He has not had BM for 4 days and has a dull pain in hepatic area. Talking to him you smell an odor like rotten apple. - Dry tongue with gray-yellow coating, thickening at the back; a slippery pulse. - Dx: - Tx: Da Cheng Qi Tang - If pt. also present with gum bleeds, what herbs would you add on? - ST Heat: Huang Lian [in mouth] Review & Think - What possible symptoms and signs could present if a patient suffers from Yangming-Fu organ disorder? - Please compare the Formulas - "order the qi decoctions 承气汤" in terms of their ingredients, dosages, preparations, actions, and indications. - Da Huang Nickname: "The General" Very strong, a lot of honors & achievements, highest rank in military. - Prepare with alcohol: Jiu Da Huang [Drunken General □ can do anything] - Move Blood & bowel (internally)

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Da Huang	12	Bitter, cold, purging		Propulsive effect in purging, improve peristalsis [Don't cook very long]
Deputy	Mang Xiao	9	Salty, cold		Helps chief in stool-softening [Don't cook, just dissolve in decoction] [MgSO ₄] Soften hardness [Magnesium pulls water into stool]
Assistant	Zhi Shi	12	Bitter, slightly Cold;	SP, ST	Assists chief, deputy in directing [Middle Jiao] qi downward
	Hou Po	24	Bitter, acrid, aromatic, warm	SP, ST, LI, LU	Assists chief, deputy in resolving stagnation, moving qi down [Enters both middle & lower jiao] (good for a lot of bloating)

Modifications			
Plus xuan shen, mai dong, sheng di	Thready, rapid pulse, dry mouth, lips & tongue	Plus shi gao, zhi mu	A concurrent Yangming channel & organ stage
Plus tao ren, chi shao, dang gui	Deep hesitated pulse, dark red tongue, fever at night	Plus lai fu zi	Severe distension & fullness

Related Formula	Based on da cheng qi tang	Indications	
Xiao Cheng Qi Tang	Minus mang xiao (Da Huang 12, Hou Po 6, Zhi Shi 6-9 – cook together) [DH: Purging effect reduced]	Mild Yangming organ Sx w/o dryness	Not as strong, not as much hardness, less severe
Tiao Wei Cheng Qi Tang	Minus Zhi Shi, Huo Po; Plus Gan Cao (Da Huang 12 & Gan Cao 6-Cook Together, Mang Xiao 9-12)	Mild Yangming organ Sx w/o distension and fullness	Gan Cao: Tonify SP (middle jiao xu)
Da Huang Gan Cao Tang	Minus Mang Xiao, Zhi Shi, Huo Po □ (Da Huang 12, Gan Cao 3)	Unblock bowels, purge & harmonize ST, stop vomiting. For heat clumping in LI & fire rising to disturb ST	Tonify & harmonize at same time
Hou Po San Wu Tang Hou Po = Chief	Minus Mang Xiao (Hou Po 24, Zhi Shi 12-15, Da Huang 12-Add Near End)	Moves qi down & unblocks bowels. For qi stagnation causing constipation	Same ingredients as Xiao [XCQT], different dosage, bloating > heat
Zeng Ye Cheng Qi Tang	Minus Zhi Shi, Hou Po; Plus Xuan Shen, Mai Dong, Sheng Di (Xuan Shen, Mai Dong, Sheng Di Huang, Da Huang [Add Near End], Mang Xiao)	Enriches Yin Fluids, Drains Heat. For Yangming Organ Sx With Yin Xu	Zeng Ye Tang: Xuan Shen, Mai Man Dong, Sheng Di Huang □ Add fluids
Fu Fang Da Cheng Qi Tang	Plus Lai Fu Zi, Tao Ren [moisten intestines], Chi Shao Yao [move blood] (Da Huang 15-Add Near End, Mang Xiao 9-15,...)	Purges interior, moves qi & blood. For simple intestinal obstruction with Yangming organ Sx	

Da Xian Xiong Tang (Major Sinking Into The Chest Decoction)**Source: Shang Han Lun**

- **Actions:** Drains Heat & Drives Out Water By Flushing Downward
- Preparation and administration: cook da huang, dissolve mang xiao in the strained decoction, and take warm with powdered gan sui

Indications

- **Clumping in chest 结胸证:** fullness & hardness of the epigastrium/entire abdomen with severe pain that becomes unbearable upon even the slightest amount of pressure, tidal fever at dusk, severe constipation, thirst; or sob, irritability; a very dry tongue coating, a submerged, tight, and forceful pulse.
 - ◊ Heat, fluid & Qi blocked inside
 - ◊ Still in digestive system, but all spread out, very stagnant & painful, lot of heat [tidal fever]
- **Applications:** Internal Heat & Accumulated Water/Fluids Clumping In Chest [Jie Xiong Zheng]
- Accumulated phlegm-damp in diaphragm and chest with clumping of heat in stomach and intestines
- Acute pancreatitis
- Acute intestinal obstruction
- Acute gall bladder inflammations
- Exudative pleurisy/cirrhosis

Case Study

- A 51 y-o female comes in complaining of a small clump in the upper abdomen (about Ren13-14 area), worse after meals and in the evenings, better in the mornings. You learn that he has had hep B for 24 years and drunk for 37 years. He feels pain on the neck and coughs with black sticky sputum upon wakeup almost every day
- A dry and yellow coated tongue, a slippery and forceful pulse, pronounced in cun sections.
- Dx:
- Tx:

Review & Think

- Please compare the ingredients, actions, and indications between formulas da cheng qi tang and da xian xiong tang
- Please compare the ingredients, preparation, administration, actions and indications between da xian xiong tang and da xian xiong wan
-

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Gan Sui	1-1.5	Bitter, sweet, cold, purging, toxic		Drives out accumulated water in the chest by flushing downward [Very toxic! ☐ Small dosage] (Don't cook ☐ powder & put with formula) [Flush down, then Da Huang & Mang Xiao take it out] Heat & water accumulated in upper, middle & lower jiao (Can have chest pain) [Pleurisy, ascites ☐ Pathogenic water accumulation + constipation]
Deputy	Da Huang	9-12	Bitter, cold		Helps chief in clearing out and draining heat through stools
	Mang Xiao	9-12	Salty, cold		Helps chief in softening clumps and draining heat

Related Formula			
Da Xian Xiong Wan (Shang Han Lun)		Da Huang 250, Mang Xiao 175, Gan Sui 30, Ting Li Zi 175, Xing Ren 175, Bai Mi (Honey) 250 Powder & make pills. Take 6-12g with warm water	Jie Xiong manifestations above the diaphragm: stiff upper back and neck, sweating besides hardness, fullness and pain in the chest
			Pill treats milder cases [doesn't work as well as decoction]

Formulas That Moistens the Intestines and Unblock the Bowels 润下	
Constipation due to Yin damage from excessive heat, or constitutional heat leading to lack of fluids/dry up, which is called boat pause because of dry-up of river 无水舟停.	- Treated with formulas that induce BM by lubricating the intestines, which contain substances of a sweet, bland, and oily natures 增水行舟. - Vegans: Not enough oil ☐ lack of lubrication "Lack of water ☐ Boat stopped ☐ Add more water, boat go again"

Ma Zi Ren Wan (Hemp Seed Pill) Source: Shang Han Lun	
Actions: Moistens Intestines, Drains Heat, Moves Qi, Unblocks Bowels. Preparation: form the powdered herbs into pills with honey; or cook herbs to decoction in a proportionate reducing dosage. Administration: take 9g pills with water, tid. [Honey: Egg pills] Indications - 脾约证 (Pi Yao Zheng) ST excess binds fluid-depleted SP [ST Excess, SP deficiency ☐ ST too strong, SP not strong enough] [Insufficient lubrication, constipation with dry, hard stool that is difficult to expel, frequent urination] - T: dry, yellow coating, P: submerged, rapid/floating, choppy Xiao Cheng Qi Tang hiding in this formula - Good for post partum women with constipation because they lose so much Qi & Blood during labor & delivery - People who lost a lot of blood - This formula is also known as pi yao wan, or pi yao ma ren wan Applications: pi yao zheng [ST too strong, SP not strong enough] - Can eat, but not digest [still have good appetite, but T&T sluggish] - Heat-induced dryness in St. & Intestines - Habitual, senile, postpartum, post-surgical, post-apoplexy constipation - Hiccup - Insomnia - hemorrhoids [lack of lubrication]	Patent Forms - China - Run Chang Wan 8 tid [润肠丸] (Moisten intestines) Very often used - Tao Ren Wan 8 tid [桃仁丸] - USA - Smooth response 8-15 drops tid Modern Research - Cathartic effect - Peristalsis-promotion Case Study - A 38 y-o postpartum woman looks for help for her constipation beginning with the childbirth a month ago. She tells us that her hard stool is difficult to expel, often blood comes with a little feces [too dry, too hard, push too hard]. She feels thirsty & warm (warmer in the evenings); but hungry a lot [ST strong]. She still has some reddish vaginal discharge with some odor. - Thin, slightly yellow coated tongue with little moisture - Thready and rapid pulse. - Dx: - Tx: Review & Think - Please compare xiao cheng qi tang with ma zi ren wan in terms of their ingredients, actions, and indications. - What are the differences between ma zi ren wan, run chang wan and wu run wan?

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Huo Ma Ren	500	Sweet, neutral	SP, ST, LI	Moistens and promotes bowels
Deputy	Xing Ren	250	Bitter, warm; Lu, LI	LU, LI	Helps chief in moistening & directs qi downward [Moisten LI]
	Shao Yao [Bai Shao Yao]	250	Bitter, sour, cool; Lr, Sp		Helps chief in moistening by nourishing Yin
Assistant	Zhi Shi	250	Bitter, slt cold; Sp, St		Moves qi down
	Hou Po	250	Bitter, acrid, warm, aromatic; Sp,St,Lu,LI		Removes fullness and distention
	Da Huang	500	Bitter, cold; St, LI, Lr		Purges and clears heat
Envoy	Bai Mi (honey)		Sweet; Sp, St, LI		Envoy, medium

Modifications			
Plus tao ren, dang gui	Post-surgical, post-injury	Plus hui hua, hui jiao	Hemorrhoids
Plus shu di, dang gui, he shou wu	Postpartum	Plus yu li ren (acrid,bitter,sweet,neutral; LI,Sp,SI)	Habitual constipation
Plus gua lou, sheng di, rou cong rong	Post-apoplexy		

Related Formula			
New formulas	Based on ma zi ren wan	Indications	
Run Chang Wan	Huo Ma Ren, Tao Ren, Dang Gui, Sheng Di, Zhi Ke, Bai Mi	Constipation due to desiccated intestines (chang ku) for the elderly, debilitated, postpartum	
Wu Ren Wan	Tao Ren, Xing Ren, Bai Zi Ren, Song Zi Ren, Yu Li Ren, Chen Pi, Bai Mi, Rice Gruel	lubricates only to treat constipation without excess	Yin Deficiency, Fluid deficiency Seeds contains a lot of oil [flax, etc.]

Ji Chuan Jian (Benefit The River Flow Decoction)**Source:** Jing Yue Quan Shu

- **Actions:** Warms Kidneys, Tonifies Essence, Moistens Intestines, Unblocks Bowels. [Getting older □ everything getting sluggish, if GI still moving, it's because of yang Qi. If Yang Qi slows down, GI slows down]
- Preparation: decoction
- Administration: taken with empty stomach
- **Indications:** Constipation due to KD Yang and Qi Xu in seniors □ fluids & essence insufficiency [constipation, clear and copious urine, LBP, and a cold sensation in the back, weak & sore back and lower limbs. T: white, thin coating, P: deep & slow]
- Drink tea to keep bowels moving
- LI: All the power comes from the KD. KD is the power station. KD Yang warms up everything [Life is back]
- Tonify KD Yin, Yang, Essence. If you have enough KD essence, you have enough to generate KD Yin & Yang
- NCCAOM: Usually have questions about this herb/formula. Why ZZJ choose Rou Cong Rong instead of Sheng Di Huang [enters HT, LV, KD, sweet, bitter, cold], Shu Di Huang [Also enter HT, LV KD] □ Don't have function to enrich KD Essence,
- Cong Rong Bu Shen Wan: Patent □ Tonify KD Yin, Yang, Essence [Gui Wan]
- Seniors: can't tell between yin & yang xu □ choose this tonify essence

- Applications:** constipation should be treated with tonics, e.g. the elderly or debilitated or the postpartum [Can't tell if yin [heat sx] or yang [cold sx] deficiency □ if can't tell, it must be KD Essence Xu □ Use this formula]
- Chronic renal insufficiency [Not KD failure yet] due to glomerulonephritis [Tonify KD to bring function back]
 - GI dysfunction in patients with extensive burn
 - Atonic constipation [lost power of intestines]
 - Chronic arthritis [as getting older, joints fall apart, can't hold it together anymore □ deterioration (bone spurs, arthritis, osteoporosis)]
 - Urinary difficulty due to prostatomegaly [prostate enlargement] [first sign of KD deficiency in males □ tonify KD]

Think & Review

- Why is rou cong rong used as a chief ingredient in ji chuan jian instead of sheng di or shu di?
- Can you explain the mutual effects of
 - ◊ niu xi and zhi ke: up & down
 - ◊ dang gui and zhi ke: Qi and blood
 - ◊ sheng ma and zhi ke & ze xie: Up & down
 - ◊ rou cong rong and ze xie?
- 6 ingredients: 1st 3 tonify, 2nd 3 are reducing [well designed, well balanced]

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Rou Cong Rong	6-9	Sweet, salty, sour, warm	KD, LI	Warms and tonifies KD Yang, moistens intestines
Deputy	Dang Gui	9-15	Sweet, acrid, bitter, warm	HT, LV, SP	Nourishes blood, moistens intestines [Good for people who lose too much blood □ after surgery, postpartum] [Dang Gui Yi Mu Cao □ postpartum]
	Hui Niu Xi	6	Bitter, sour, neutral	LV, KD	Strengthens Lower Back & KD, descending nature to... Stronger function to tonify, Form vent
Assistant	Ze Xie	4.5	Sweet, bland, cold	KD, GB	Drains turbidity, descending nature to...
	Zhi Ke	3	Bitter, cool	SP, ST	Relaxes intestines, moves qi downward
Envoy	Sheng Ma [Black cohosh]	1.5-3	Sweet, acrid, slt.bitter, cool	LU, SP, ST	Raises clear Yang to aid the descent of turbid Yin Ascending function makes it more dynamic Also good for menopausal ladies

Modifications			
Plus ren shen	Qi xu		
Plus huang qin	With heat		
Plus shu di	Severe K Yin/essence xu		
Minus zhi ke	Severe xu		
Plus huo ma ren	Lack of lubrication		
Minus ze xie, plus du zhong, gou qi zi	Severe LBP and knee soreness		
Bai zi ren, suan zao ren	Irritability, insomnia		

Warm the Yang and Guide out accumulation 温下	
Accumulation due to cold excess in the interior characterized by constipation, abdominal fullness and distention, abdominal pain that responds favorably to warmth, cold extremities, and a submerged, tight pulse.	- Treated with both warming and purging herbs simultaneously - Boat engine broke down □ restore power [warm yang]

Da Huang Fu Zi Tang [大黄附子汤] (Rhubarb And Prepared Aconite Decoction) Source: Jin Gui Yao Lue	
Actions: Warms Interior, Disperses Cold, Unblocks Bowels, Alleviates Pain. - Preparation: decoct - Administration: taken warm, tid. Indications - Excess cold accumulation in the interior [寒积里实] Abdominal pain & constipation, hypochondriac pain, fever [heat caused by stagnation], cold hands and feet/fear to cold [Use power to restore engine to boat] - White, greasy tongue coating, and a submerged, tight, and wiry pulse. Applications: cold accumulation in the interior [More cold □ use Da Huang Fu Zi Tang, not significant hot/cold (just sluggish) □ Use Ji Chuan Jian, post partum □ Ma Zi Ren Wan] - Senile constipation - Chronic uremia - Ulcerative colitis - Uncomplicated appendicitis - Uncomplicated intestinal obstruction - Acute pancreatitis (with constipation)	Modern Research - Anti-anoxia 抗缺氧 - Antibacterial - Anti-inflammatory - Anti-pyretic - Analgesic - Sedative - Anticonvulsant Case Study - A 67 y-o male asks for help for his BM difficulty secondary to prostatectomy due prostate cancer 2 months ago. He feels stuffed up and hot, incomplete BM with great exertion every 2-3 days. He is often frustrated and has costal pain from time to time. Other sx: cold limbs, no sex drive. - A gray thick tongue coating with distended sublingual veins; a wiry and slow pulse. - Dx: - Tx:

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Zhi Fu Zi	9	Acrid, sweet, hot, poisonous	HT, SP, KD	Warms Yang, expel cold [body, joint pain], alleviates pains [Rescue Yang, heart attack] Decoct Fu Zi for about an hour before adding other ingredients
Deputy	Da Huang	9	Bitter, cold	ST, LI, LV	Helps chief, purges and cleanse LI, alleviates pains; Da Huang is counter balanced by Fu Zi [Balanced □ Not too hot, not too cold]
Assistant	Xi Xin	3	Acrid, warm	LU, SP, KD	Helps c & d in warming and expelling cold

Modifications			
Double Zhi Fu Zi And Xi Xin	Severe cold with chills	Plus Dang Shen, Dang Gui	Weak constitution
Plus Zhi Shi, Hou Po	Severe accumulation with distention	Plus Gui Zhi, Bai Shao	Severe pains
Plus Ban Xia, Chen Pi, Huang Lian	Nausea, vomiting		

Related Formula			
New formula	Based on da huang fu zi tang	indication	
Wen Pi Tang (Qian Jin Yao Fang)	Minus Xi Xin; Plus Gan Jiang, Ren Shen, Gan Cao	SP Yang Xu causing cold accumulation, constipation; also for chronic red-and-white dysenteric sx	Much warmer, more tonifying, focused on middle jiao [Wen Pi □ Warm up SP]

Formulas That Purge & Tonify	
- Sx due to simultaneous internal excess and deficiency, manifesting as constipation, and some deficient symptoms as well. - Treated with purging and tonifying that is able to drive out the accumulation without hurting normal Qi, tonify normal Qi without keeping the accumulation inside the body.	

Xin Jia Huang Long Tang (Newly-Augmented Yellow Dragon Decoction) Source: Wen Bing Tiao Bian	
Excess more: purging herb is chief Deficiency more: tonify herb chief - Gan Cao tang - Sang Ye tang - Sea cucumber - Actions: nourishes Yin, tonifies Qi, unblock the bowels, drains heat. - Preparation & administration: decoction; taken with ginger juice - Indications - Heat accumulation in the interior with Qi and Yin deficiency characterized by constipation, abdominal distention, hardness and fullness, fatigue, sob, dry mouth and throat, cracked lips; - Dry, yellow/black tongue coating with cracks; pulse may vary Formulas contained - Tiao Wei Cheng Qi Tang: Da Huang, Mang Xiao, Gan Cao	Applications: warm-febrile diseases at Yang Ming stage in which Qi and Yin damaged by severe heat flaring, or by missing the right phase to purge - manifesting as accumulation of internal excessive heat. - Intestinal obstruction - GI failure from pulmonary heart disease - Gall stone with cholecystitis - Constipation in weak and hot patients Case Study - A 31 y-o postgraduate student comes in with hoarse voice, fatigue, dry throat and mouth, worse in the evenings after school and TA work (this is final week); dry difficult stool, stinky gas. He has been sick for over a week-fever & chills, productive cough with green mucus, sore throat. He is too busy to take care this bug – now it becomes a monster that he has to deal with. [Ying & Qi damaged □ Wind cold getting into Yang Ming] - A dry brown tongue coating, a dark red tongue. A tight and slight slippery pulse that gets weaker with pressure. - Dx: Qi & yin deficiency - Tx: - After 3 days with your Tx, the patient feels better. But he appears cold and tired without appetite. Tx? ◊ Wen Pi Tang [Warm up & Restore SP & ST □ always do this after recovering from illness (middle jiao is key)]

Tiao Wei Cheng Qi Tang	Da Huang 12 & Gan Cao 6 [Cook Together] Mang Xiao 9-12
Da Huang Gan Cao Tang	Minus Mang Xiao, Zhi Shi, Huo Po □ (Da Huang 12, Gan Cao 3)
Zeng Ye Cheng Qi Tang	Xuan Shen, Mai Dong, Sheng Di Huang, Da Huang [Add Near End], Mang Xiao

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Sheng Di Huang	15			Nourishes Yin and adds fluids
Deputy	Gan Cao	6			
Assistant	Ren Shen	4.5			Tonify Qi
	Da Huang	9			Draining [Not added near end]
	Mang Xiao	3			Draining [Also cooked together □ Draining function weaker]
	Mai Dong	15			Tonify Yin, Nourishes Yin and adds fluids
	Xuan Shen	15			Tonify Yin, Nourishes Yin and adds fluids
	Dang Gui	4.5			Tonify Blood
	Hai Shen	2 PC			Sea Cucumber
	Sheng Jiang Juice	6 spoonful			Tonify Qi, stimulate digestion

Modifications		Analysis	
Plus huang qi	Pronounced Qi xu	Da Huang, Mang Xiao, Gan Cao	Tiao wei cheng qi tang – purges and softens
Plus shu di, huo ma ren, tao ren	Pronounced blood xu	Sheng Di, Xuan Shen, Mai Dong, Hai Shen	Nourishes Yin and adds fluids
Plus mu xiang, sha ren	Severe abdominal distention	Ren Shen, Gan Cao, Dang Gui Sheng Jiang	Tonify Qi and blood Avoids vomiting, protects St qi

Related Formula			
formula	ingredients	indications	
Huang Long Tang (Source: Shang Han Liu Shu)	Da Huang, Mang Xiao, Zhi Shi, Hou Po, Ren Shen, Dang Gui, Jie Geng, Sheng Jiang, Da Zao, Gan Cao	In contrast to the main formula, it has a stronger purgative effect. For severe heat accumulation with Qi & blood xu [Treat deficiency & excess simultaneously]	Thousand years older Still have ZZJ influence [use warm stuff to tonify Add

Formulas That Drive out Excess Water 逐水	
- Sx due to accumulation of water and fluids that obstruct the interior and gather in the chest and abdominal cavities – difficulty in urination and defecation as main symptoms	Treated with formulas that reduce and eliminate accumulation by unblocking the passage of urine and stool. These formulas contain harsh, purgative herbs which are toxic, they are contraindicated during pregnancy [harsh: may drive out fetus], used with extreme caution and for a short-term use.

Shi Zao Tang [十枣汤] (Ten-Jujube Decoction) Source: Shang Han Lun	
- Actions: Purges & drives out congested fluids. - Preparation: grind first 3 herbs into powder, cook da zao to decoction. - In old days, used these 3 ingredients for suicide - Administration: take 0.5-1g [No more than 1 g] with a warm da zao decoction in the early am on an empty stomach, qd. [Only once a day!!! If take too much, diarrhea won't stop] - Expectation: about a hr. after-borborygmus, abd. Pain, then 5-6 watery BMs Indications [Just know name & indications] - Suspended, congested fluids 悬饮 clogging up the chest and hypochondriac area [cough with pain in the chest and hypochondria, hard focal distention in the epigastrium, dry heaves, sob, headache, vertigo; or chest pain extending to the back that makes breathing difficult] - White, slippery tongue coating, and a submerged, wiry pulse. - Excess edema 实水 [Shi Shui] water accumulation obstructed interior, generalized edema, pronounced in the lower part of body, abd. distention, wheezing, chest fullness, and difficult urination and defecation. [Generally only used for robust patient in old days □ Now, just send to ER, hospital] Applications: short-term use for severe excessive fluids/ damp/phlegm internal accumulation. - Exudative pleurisy - Ascites from liver cirrhosis - Infantile acute viral pneumonia - Uremia from systemic lupus erythematosus - Nephritic syndrome - Urinary stones [Increase water flushing down]	- Anorexia: Sheng Jiang & Da Zao □ Cook together & drink liquid - Modern Research - Cathartic - Diuretic - Expectorant - Antitussive Case Study - A 56 y-o strong-built male comes in for his distention and tightness of abdomen, with slight jaundice and GI dysfunction, scanty urine and constipation. He has been suffering from Hep C for over 14 years and had ascites extraction 2 years ago. He used to be a heavy drinker. [Hep C & heavy drinking □ both damage LV □ LV gets hard □ ascites] - A dusky tongue with yellow thick coating; a slippery and wiry pulse. - Dx: - Tx: Use Xiao Cheng Qi Tang [Could theoretically use Shi Zao Tang, but not available] - How many sections? 1: Heat 2: Moistens to promote bowel 3: Warm yang to move bowel [Da Huang Fu Zi Tang, Wen Pi Tang] 4: Purge & tonify [yin & qi xu □ Xin jiao . . .] 5: Drive Excess Water from body [Shi Zao Tang]

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Gan Sui	Equal	Bitter, sweet, cold, poisonous	SP, LU, KD	Very toxic, strong, harsh, Expels water from the meridians
Deputy	Da Ji	Equal	Bitter, acrid, cold, poisonous	LU, SP, KD	Very toxic, strong, harsh, Drains water from the organs
Assistant	Yuan Hua	Equal	Bitter, acrid, warm, poisonous	LU, SP	Very toxic, strong, harsh, Eliminates old and deep-rooted water/phlegm from chest and hypochondria
Envoy	Da Zao	10 pc	Sweet, neutral	SP, ST	Neutralize harshness, coldness & draining function Protect middle jiao, SP & ST, contains high amount of iron Protects and augment qi, moderates harshness and toxicity of other 3 herbs

Modifications			
Plus gan cao (against the tradition)	Moderates the toxicity		
Plus san leng, e zhu	With blood stagnation		
Plus bai jie zi	Severe phlegm/turbidity		

Related Formula			
New formulas	Based on shi zao tang	Indications	
Kong Xian Dan 控涎丹	Minus Yuan Hua, Da Zao; [Remove Da Zao □ More Dangerous] Plus Bai Jie Zi	Phlegm lurking around diaphragm that obstructs qi flow [sudden excruciating pains, thick, sticky sputum rattling in throat at night...]	Not safe formula [never seen used, but it exists]
Zhou Che Wan 舟车丸	Minus Da Zao; Plus Qian Niu Zi, Da Huang, Qing Pi, Chen Pi, Mu Xiang, Bing Lang, Qing Fen	water & heat accumulation in interior (for robust patient) obstructing qi mechanism: ascites, distention, hard abdomen, scanty urine, constipation	Zhou = boat, Che = vehicle [This formula is even worse □ The worst! Very harsh! Robust patients only] Just know names, don't use!

Hao Qin Qing Dan Tang [蒿芩清胆汤] (Artemisia Annua And Scutellaria Decoction To Clear The GB) Source: Chong Ding Tong Su Shang Han Lun	
• Actions: clears GB heat, harmonizes the stomach, and transforms damp/phlegm. • Preparation: Bi Yu San in a cheesecloth bag cooked with the other herbs. • Administration: taken lukewarm. • Indications • Shao Yang damp-heat and turbid phlegm [mild chills alternating with pronounced fever [more heat than cold], a bitter taste in the mouth, a stifling sensation in the chest, spitting up bitter or sour fluids (or vomiting yellow, brackish fluids, or, in severe cases, dry heaves, hiccough), distention and pain in the chest and hypochondria] • Red tongue with thick, greasy coating (yellow or white, or a combination of both) • Rapid pulse that is slippery on the right and wiry on the left □ LV is wiry, SP is slippery [damp, phlegm, turbid] Applications • GB heat overacts on St. and damp-heat/turbid phlegm blockage in the Middle (heat > damp) [More heat than damp, stronger in clearing heat] • Acute hepatitis [Xiao Chai Hu can't be used for acute hepatitis] • Chronic hepatitis [B/C], disturb detoxing function of LV/GB • Acute GB disorders • Acute gastritis from bile reflux • Pyelonephritis • Low-grade fever from viral infection • Summer fever • Feverish face/head from menopause • Malaria [Nobel prize □ control malaria in Africa]	Modern Research • Anti-fungal • Anti-malarial • Anti-viral/bacterial • Sedative • Anti-hypertension • Diuretic • Detoxification • Case Study • A 49 y-o female asks for help for her chronic cholecystitis [GB inflammation □ GB walls keep getting thicker] due to cholecystolithiasis [GB Stones] manifesting as gastric discomfort, worse with greasy meals (distending pain with bloating and burping), bitter taste in the mouth, thirst with desire to drink cold drinks. She has hot flushes followed by a cold sensation lately along with her irregular menstruation and mood swings. [People with LB/GB issues, emotions will aggravate (especially middle aged women, slightly fluffy)] (Possible perimenopause) • Yellow, thick tongue coating with red tip • Wiry pulse on the left, slippery and slightly rapid pulse on the right. • Dx: • Tx: Clear damp heat & harmonize Shao Yang • This lady loves this formula, Feels that whole body cools down Think & Review • Please make a comparison between xiao chai hu tang and chai hu zhi jie tang. Why are these herbs (ren shen, zhi gan cao, da zao) excluded in chai hu zhi jie tang? • What is the effect of combination of chai hu and huang qin, sheng jiang and da zao in xiao chai hu tang? ◊ Chai Hu & Huang Qin: Regulate LV/GB, helped by Sheng Jiang & DA Zao ◊ Sheng Jiang: treat exterior (aromatic), mild wind cold, treat interior ST disorders [nausea, poor digestion, damp accumulation], treat upper/middle jiao, exterior/interior all at same time. Everybody likes to use sheng jiang. ◊ Gan Jiang: Not fresh □ not used for exterior • What is the effect of combination of qing hao and huang qin in hao qin qing dan tang? ◊

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Qing Hao	6	Bitter, cold, aromatic	LV, GB	Vents exterior aspect of shaoyang [Qing Hao: brother of moxa (Ai Ye)] (aromatic, cold, strong □ get rid of damp heat) Strong function to control hepatitis [In china: IV, intramuscular injection]
	Huang Qin	9	Bitter, cold	HT, LU, GB, LI	Drains d-h from shaoyang;
Deputy	Zhu Ru	9	Sweet, cool	LU, ST, GB	Drains GB & St heat, stops vomiting [Bamboo shavings, colder than bamboo leaves □ treats damp heat] Bamboo drinks for obesity Very strong heat clearing
	Zhi Ke	4.5	Bitter, cool	SP, ST	Directs qi downward
	Chen Pi	4.5	Acrid, warm	SP, ST	Transforms phlegm, stop vomiting
	Ban Xia	4.5	Acrid, bitter, warm, aromatic	SP, ST, LU	Directs qi downward, harmonizes stomach [middle jiao]
Assistant	Chi Fu Ling	9	Sweet, bland, neutral	HT, SP, LU	Addresses damp-heat, protects middle jiao
Envoy	Bi Yu San [A,E]	9	Hua Shi: Gan Cao: Qing Dai □ 6:1:1		With chi fu ling, drains d-h through urine [Small formula] [Qing Dai (indigo, Extract of Da Qing Ye)]

Modifications			
Plus huang lian, zi su ye	Pronounced vomiting	Plus yu xing cao, lu gen, dong gua ren	Phlegm heat in lungs
Plus huo xiang, yi yi ren	Severe damp/phlegm	Plus hou po, huo xiang	Thick greasy tongue coating, fullness in chest and diaphragm
Plus ze xie, che qian zi, tong cao	Difficult urination		

Da Yuan Yin [达原饮] (Reach The Membrane Source) Source: Wen Yi Lun	
● Actions: Spreads Qi, Penetrates To Membrane Source, Transforms Turbidity. ● Preparation: decoction ● Administration: taken lukewarm in the afternoon. ● In old days, didn't know how things started. Think that things entered into membrane source [somewhere cannot reach, nobody knows where it is, secret hiding space in closet □ use this formula to reach membrane source] ◊ Hike in woods, suddenly so dark □ feel sick [deep in valley, Qi not moving at all, get scared, turbid Qi has made you sick, spirit make you sick, bugs bite you and make you sick] ◊ Haunted house □ feel sick ◊ Some people with allergies, allergic to trees [puffed up like dough] Indications ● Half-exterior, half-interior disorder due to epidemic pathogenic influences entering the membrane source (mo yuan膜原) ● alternating fever and chills (both strong) occurring 1-3 times a day at irregular intervals, a stifling sensation in the chest, nausea/vomiting, headache, irritability ● Tongue with deep-red edges, a thick, foul, and pasty coating [very nasty tongue, toxic pathogenic influences] ● Wiry, rapid pulse. ● Applications ●	Modern Research ● Case Study ● Think & Review ●

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Cao Guo	1.5	Very aromatic		3 strong aromatics □ penetrate to membrane source, Cao Guo used as spice
	Hou Po	3	Very aromatic		
	Bing Lang	6	Very aromatic		
Deputy	Huang Qin	3			Once penetrated into membrane source, Huang Qin kill the bugs
	Zhi Mu	3			
	Bai Shao	3			
Envoy	Gan Cao	1.5			

Related Formula			
New formula	Based on da yuan yin	indication	
Chai Hu Da Yuan Yin	Add Chai Hu, Zhi Ke, Qing Pi, Jie Geng, He Geng; Minus Cao Guo, Zhi Mu, Bai Shao	Phlegm/damp obstructing Mo Yuan: with Shao Yang sx	More Shao Yang Sx, very toxic

Formulas That Regulate and Harmonize the Liver and Spleen 调和肝脾	
Liver and spleen disharmony: 1. liver Qi stagnation-violates Sp & St; 2. Sp Qi xu-constrains the spreading of liver Qi – a stifling sensation in the chest, hypochondriac pain, epigastric and abdominal distention and pain, reduced appetite, diarrhea, and in severe cases, alternating fever and chills.	Treated with formulas that move liver Qi, nourish blood, and tonify spleen to regulate Lr & Sp. [Move LV Qi & Tonify SP. If SP strong enough, not easily assaulted by LV]

Si Ni San [四逆散] (Frigid Extremities Powder) Source: Shang Han Lun	
Actions: Vents Pathogenic Influences, Releases Constraint, Spread LV Qi, Regulates SP - Preparation: grinds equal amounts of the herbs into powder; or decoction - Administration: powder-take in 6-9 g doses; decoction-take warm. - Si = 4 extremities, Ni = Cold □ 4 extremities get cold LV Qi Stagnation □ Angry □ Hungry, cold extremities Indications Yang-type collapse (Yang Jue 阳厥): cold fingers & toes (although the body is warm [not Qi Xu, started because Yang Qi collapsed, can't get to extremities □ when you get so angry you start to lose your temper □ Qi & Blood go up to head □ extremities feel so cold]) or accompanied by a sensation of irritability and fullness of chest and epigastrium; or abdominal pain and/or severe diarrhea. Red tongue with yellow coating, a wiry pulse. - Disharmony between LV and ST: hypochondriac pain & distention, or with epigastric pain and fullness, bitter taste in the mouth, belching, reduced appetite; or vomiting [LV Qi constraint overact on ST □ rebellious ST because of LV Qi stagnation], wiry pulse Applications [Problems cause by LV Qi stagnation w/ ST/SP symptoms] - Yang-type collapse, or Qi-type collapse (frigid extremities) - Liver Qi stagnation with spleen deficiency - Chronic gastritis - Diverticulosis - Peptic ulcer - Cholecystitis/cholelithiasis - Mastitis - Fibrocystic breasts - Poor digestion	Patent Forms - Shu Gan Wan [China & USA] - Shu Gan [Health Concern] Modern Research [Lot of good functions] - Smooth-muscle-contraction inhibiting - Antishock/blood-pressure elevating - Cardiotonic/antiarrhythmic - Blood-lipid reducing - Blood-vessel dilatation - Anti-ulcer - Anticoagulant Case Study - A middle-aged female comes in telling us that she feels cold in the fingers and toes for years, gets worse recently after learning about her husband's affair. Each time when she talks about the husband, the coldness becomes severe. However, she has hot flushes at times, irregular menses with dark spotting. [Blood is more deficient during menopause] - red tongue with thin yellow coating; a wiry and slightly rapid pulse. - Dx: LV Qi Stagnation - Tx: Move Qi to extremities Chai Hu Shu Gan San/Wan [add ingredients] Think & Review

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Chai Hu	9-12	Bitter, slt acrid, cool	LV, GB	Regulates Qi by venting heat & releasing the constraint (ascending) [Enters both LV & GB] Release LV Qi & guide out through GB [which is exit for LV □ keep LV detoxing through the bile]
Deputy	Zhi Shi	9-12	Bitter, slt cold	SP, ST	Drains stagnation from middle jiao (descending), help middle jiao
Assistant	Bai Shao	12-24	Bitter, sour, cool	LV, SP	Nourishes LV, preserves Yin (move LV Qi w/o injuring LV Yin & Blood) LV in charge of Blood □ LV blood can be easily damaged, need to nourish it because when LV Blood damaged, LV Qi easily stagnates again
Envoy	Zhi Gan Cao [A,E]	6-9	Sweet, warm	All 12	Alleviates pain, harmonizes the others ZZI: everyone in those days were deficient

Modifications			
Plus wu wei zi, gan jiang	Coughing from Lu cold	Plus xiang fu, yu jin	Severe Qi stagnation
Plus gui zhi	Palpitation	Plus zhi zi, chuan lian zi	With heat
Plus fu ling	Urinary difficulty	Plus qing pi	Breast abscess

New formulas	Based on si ni san	indications	
Zhi Shi Shao Yao San (Jin Gui Yao Lue)	Minus Chai Hu, Zhi Gan Cao	Postpartum abdominal pain, irritability, fullness, difficult to lie flat d/t qi & blood stagnant heat	Qi & Blood level disorders
Chai Hu Shu Gan San/Wan (Jing Yue Quan Shu) Very Important!!!	Minus Zhi Shi; Plus Chen Pi, Chuan Xiong, Xiang Fu, Zhi Ke	Hypochondriac pain, alternating fever & chills due to blood stagnation Severe LV Qi Stagnation	Almost everyone can move the LV Qi, very strong! Gynecological dept. likes to use Dang Gui to move blood, Xiang Fu to move the Qi Very bad LV Qi Stagnation Chuan Xiong: Work on Blood (aromatic) Zhi Ke stronger in moving Qi than Zhi Shi

Xiao Yao San (Rambling Powder) [逍遙散] Source: Tai Ping Hui Min He Ji Ju Fang	
● Actions: Spreads LV Qi, Strengthens SP, Nourishes Blood. ● Preparation: grind the herbs into powder; or decoction with dosage indicated in parentheses; available in patent form. ● Administration: draft [6-9g with 6g wei jiang(e) & 3g bo he(e) tea; decoction – bid. ● Formula very mild, gracefully designed Indications ● LV Constraint With Blood Xu & SP Weakness [hypochondriac pain, headache, vertigo, bitter taste in mouth, dry mouth & throat, fatigue, reduced appetite] ● Pale red tongue, and a wiry, deficient pulse. ● There may also be alternating fever and chills, irregular menstruation, or distended breasts. LV Qi Stagnation □ sometimes feel hot, sometimes feel cold [PMS, menopause, LV Qi Stagnation with SP Qi Deficiency (diarrhea before finals, diarrhea during menstruation)] ● Can be taken for a long period of time without any adverse effects for middle jiao ● Qi is Yang, Blood is Yin. If Yang too excess, yin is weak □ Nourish LV Blood □ Match LV Qi ● Shao Yao Gan Cao Tang: Originally to regulate Ying & Wei regulation & pain management, similar to 4 gates [one for Qi (gan cao), one for Blood (shao yao)], Qi & Blood disharmony □ not moving together □ creates stagnation ◊ Often added to other formulas ◊ Shao Yao can soften muscles, LV [muscle spasms] Applications ● Any condition with liver Qi stagnation, blood and spleen deficiency – hypochondriac pain, fatigue, reduced appetite, (or irregular menstruation) a pale-red tongue, wiry, deficient pulse. ● Hepatitis [LV Xu, SP Xu, LV Blood Xu], Pleurisy ● Chronic gastritis ● Cholecystitis/cholelithiasis ● Functional uterine bleeding ● Menopausal syndrome ● Pelvic inflammatory disease ● Fibrocystic breasts ● CFS, Hysteria, PMS ● Senile constipation ● Chronic prostatitis ● dysmenorrhea	Patent Forms ● Xiao Yao Wan [China, USA] ● Jia Wei Xiao Yao Wan [China, USA] ● Free and easy wanderer (Relaxed wanderer) [Kan] ● Break into a smile [TTT] Modern Research ● CNS-inhibiting ● Liver-protecting ● Estrogen-like effect ● GI-smooth-muscle relaxing ● Analgesic Case Study ● 16 y-o high schooler wants you to help her for her PMS and menstrual cramps. She also feels stressed out with her busy school plus PSAT prep. A red-edged tongue with thin white coating; a slightly wiry pulse with left Guan soft. ● Oops, she tells us she just broke up with her first boyfriend and is in sadness. Other sx: dream-disturbed sleep, poor appetite, and loose stools. ● Dx: LV Qi stagnation, SP Qi deficiency ◊ Young ladies: blood not completely filled out ● Tx: Think & Review ● Can you list the differences between Xiao Yao San & Chai Hu Shu Gan San? ◊ Compare ◊ Si Ni San ● What is the combination of bai shao and bai zhu used for in xiao yao san? ● Pairs: ◊ Dang Gui & Bai Shao ◊ Bai Shao & Bai Zhu

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Chai Hu	30/9	Bitter, slt. acrid, cool	LV, GB	Relieves liver constraint, move LV qi □ Restore smooth flow Only use 30 g because Chai Hu can lift & raise Qi, disperse & potentially damage LV blood (aromatic, dispersing, uprising □ could damage LV Blood & yin),
Deputy	Dang Gui	30/9	Sweet, acrid, bitter, warm	HT, LV, SP	Nourishes blood, moving & nourish LV blood, soothe LV
	Bai Shao Yao	30/9	Bitter, sour, cool	LV, SP	Nourishes and softens LV [Bai Shao Yao & Bai Zhu: Simultaneous LV & SP Xu]
Assistant	Bai Zhu	30/9	Bitter, sweet, warm	SP, ST	Strengthens SP
	Fu Ling	30/9	Sweet, bland, neutral	HT, LU, SP	Strengthens SP, transforms damp
	Sit. Zhi Gan Cao	15/6	Sweet, warm; 12 meridians	SP, LU	With bai shao relieves pain [Shao Yao Gan Cao Tang: Bai Shao Yao & Zhi Gan Cao]
	Wei Jiang Bo He		Dispersing		Aid other herbs to disperse and prevent qi rebellion Usually give patient Sheng Jiang, dispersing, regulate Qi

Modifications			
Plus xiang fu, chen pi	Severe cases	Minus zhi gan cao; plus wang bu liu xing, xiang fu, dan shen	Fibrocystic breasts
Plus shu di	Pronounced blood xu		
Plus mu dan pi, zhi zi	Pronounced liver heat	Plus jin yin hua, guan zhong	Vaginal discharge

Related formulas	Based on xiao yao san	Indications	
Jia Wei Xiao Yao San (Also Named As Dan Zhi Xiao Yao San)	Plus Mu Dan Pi, Zhi Zi	With liver heat or fire	Very often used
Hei Xiao Yao San Patent available	Plus Sheng Di Or Shu Di Huang	With abdominal pain from blood xu [Yin nourishing stuff]	Hei = Black Postpartum women

Tong Xie Yao Fang [痛泻要方] (Important Formula For Painful Diarrhea) Source: Jing Yue Quan Shu	
• Actions: Spreads LV Qi & tonifies SP. • Preparation: grind the herbs into powder, or as a decoction with the dosage indicated in parentheses. • Administration: taken in powder /pill/decoction. • LV Qi Stagnation □ Abdominal Pain □ Diarrhea • 4 Herbs, well balanced: Qi Stagnation, Blood deficiency, make SP back to normal Indications • Painful diarrhea due to SP xu with an overcontrolling LV [recurrent problems of borborygmus (Qi & fluids mixed up □ make noise & pain), abdominal pain, diarrhea with pain (which starts with the urge to defecate and subsides after completion)] • T: thin, white tongue coating, • P: wiry on left, soft pulse on right [LV overacting, controlling, assaulting SP] • Chao = prepared, stir fried Applications • Liver overacts on deficient spleen manifesting as painful diarrhea. • Acute gastroenteritis • Bacillary dysentery • IBS [very common now, Often have LV Qi stagnation before this problem starts] • Ulcerative colitis [Also very common now. Diarrhea with blood] • Gastrointestinal neurosis • Meniere's disease • Infantile diarrhea	Modern Research • Peristalsis-inhibiting • Bacterial-inhibiting • Case Study • Think & Review •

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Chao Bai Zhu	90 [9-12]	Bitter, sweet, warm	SP, ST	Strengthens SP, dries damp, stops diarrhea Chao: Stronger function to tonify SP [more cooked, better to stop diarrhea, can even char, make black]
	Chao Bai Shao	60 [6-24]	Bitter, sour, cool	LV, SP	Softens overactive LV, alleviates pain [Still soften LV, relax muscles]
Deputy	Chao Chen Pi	45 [4.5-9]	Acrid, bitter, warm, aromatic	SP, ST, LU	Harmonizes middle jiao, transforms damp Move Qi □ alleviate pain
A/E	Fang Feng	30-60 [3-6]	Acrid, sweet, slt. Warm	UB [exterior] LV, SP [interior]	Disperses LV, awakens SP [soften LV, disperse internal wind, internal & external wind] Special ingredient (acrid & sweet): Sweet stuff has tonifying function [chocolate], your spleen really craving for the sweet stuff [tonifying function]

Modifications			
Plus sheng ma	Long-term diarrhea	Plus huang qin, bai tou weng	Blood & pus in stool
Plus huang lian	With yellow greasy tongue coating	Plus mu xiang, bing lang	tenesmus
Plus fu ling, gan jiang, che qian zi	Watery diarrhea	Plus hua shi	Urinary difficulty

Formulas That Harmonize Stomach & Intestines

- Conditions in which pathogenic influences have invaded St and Intestines and formed complexes of heat and cold with simultaneous excess and deficiency – the ascending and descending functions of these organs are thereby disrupted, leading to fullness and focal distention in the epigastrium, nausea, vomiting, abdominal pain and distention, borborygmus, and diarrhea.
- Treated with formulas that harmonize the various conflicting processes.

•

Ban Xia Xie Xin Tang [半夏泻心汤] (Pinellia Decoction To Drain Epigastrium) Source: Shang Han Lun

- **Actions:** Harmonizes ST, Directs Rebellious Qi ☐, Disperses Clumping, Eliminates Focal Distention.
- Preparation: decoction
- Administration: taken warm

Indications

- **Clumping in epigastrium & focal distention [痞 (Pi)]** due to improper purging of an exterior or half exterior/interior condition with underlying ST Xu [lazy ST], causing pathogens to sink into the interior, plus fullness & tightness with very slight or no pain, dry heaves or vomiting, borborygmus with diarrhea, reduced appetite; thin, yellow, and greasy tongue coating, and wiry, rapid pulse.
- Improper treatment of exterior condition ☐ causing pathogen to sink into interior
- Exterior cold & interior heat messed up together ☐ Qi blocked in middle jiao [Xin Xia (under heart), cardiac area, upper stomach, sometimes you can see this area stick out, but it's not permanent], Qi stagnation due to heat & cold struggling with each other.
- Run half marathon ☐ feel so hot, drink the cold water ☐ feel the heat & cold block there
- Eat spicy food [hot pot ☐ too hot, spicy, oily], eat ice cream ☐ feel discomfort
- Hiatal hernia, gastritis, reflux, bile go to ST, esophagus, heartburn [have deficiency to cause this] LV Qi stagnation, professional worriers

Applications

- focal distention due to complex of heat and cold
- Sp and St xu that develop cold-heat complex due to an EPI
- Chronic gastritis (hypertrophic)
- Chronic hepatitis
- Indigestion
- Gastric ulcers from hypersecretion of acid
- Gastric atony

Modern Research

- Peptic ulcer-treating and preventing (gastric mucosa protection, healing-promoting)
- Anti-anoxia
- Peristalsis-promoting
- Pyloric sphincter-strengthening
- Bile reflux-inhibiting
-

Case Study

- 45 y-o female teacher asks for Tx for her gastric bloating since last week. She caught a flu from her students. She took huang lian su pian once three days ago. She has been suffering from a chronic gastritis for over 20 years. Other Sx: nausea, poor appetite, tiredness, diarrhea with **undigested food** in the stool twice.
- Slightly flabby tongue thin white coating;
- Slightly wiry on the left and slightly deep pulse on the right.
- Dx:
- Tx: **Gan Cao Xie Xin Tang [undigested food]**

Think & Review

- Compare Xiao Chai Hu Tang & Ban Xia Xie Xin Tang.
- Please **compare the “three xie xin tangs”**.
 - ◊ Ban Xia Xie Xin Tang [ST/Intestines]
 - ◊ Sheng Jiang Xie Xin Tang
 - ◊ Gan Cao Xie Xin Tang
- All regulate

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Ban Xia	12	Acrid, bitter, warm, aromatic	SP, ST	Disperses clumping [to treat distention], directs qi downward Distention is stuck in middle or between upper/middle
Deputy	Gan Jiang	9	Acrid, hot	SP, ST, LU, KD	Expels cold [Cold & Heat messed up together ☐ treat both]
	Huang Qin	9	Bitter, cold	HT, LU, LI, GB	Drains heat
	Huang Lian	3	Bitter, cold	HT, LV, ST, LI	Drains heat
Assistant	Ren Shen	9	Sweet, slt.bitter, slt. Warm	SP, LU	Benefits middle qi [Ren Shen & Da Zao: Protect middle jiao]
	Da Zao	4 PC	Sweet, neutral	SP, ST	Protects middle qi
Envoy	Zhi Gan Cao	9	Sweet, warm	All 12	Protects and harmonizes

Modifications			
More huang qin and huang lian	Heat > cold	More ban xia	Pronounced turbidity [too much acid come up]
More gan jiang	Cold > heat	- Ren shen, da zao; + Zhi shi, sheng jiang	Thick greasy tongue coat [too much tonics not good], severe dry heaves w/o middle qi xu

Related Formula			
New formulas	Based on ban xia xie xin tang	indications	
Sheng Jiang Xie Xin Tang (Shang Han Lun)	Add Sheng Jiang 12 g, [take over as chief] cut Gan Jiang down to 3g	Water & heat complexes Or St xu with food stagnation and suspended fluids lingering inside	More dispersing
Gan Cao Xie Xin Tang (Shang Han Lun)	Increase Zhi Gan Cao to 12-15 g	Severe SP/ST Qi Xu [undigested food in stool, frequent long-term diarrhea]	SP/ST very deficient

Chapter 4: Formulas That Clear Heat [清法]

• Use cold to treat heat. • The conditions due to heat (warm, heat, fire) where there is neither an exterior condition nor internal clumping [qi level heat, nutritive and blood level heat, qi and blood heat, heat toxin, zang-fu heat, deficient heat, summer heat] • Treated with heat-clearing formulas to purify, transform, and eliminate heat from different levels of the body. Also used for Detox • Most of the herbs in these formulas are (bitter) cold in nature. Herbs which protect the middle jiao are often included. [Too much cold for too long can damage SP] • Formulas in this chapter should be discontinued once the heat has been successfully treated (7-8 out of 10). [At 100% gone, SP is damaged]	• Everyone has cancer every day. Why you don't get the cancer? You have to have strong immunity [Wei Qi] □ recognize & kill them. Don't want to kill everyone, just remediate, harmonize. Key of TCM is stay in the middle & harmonize, not like Western medicine. • TCM focus on environment. If environment is strong & well. Don't treat condition directly, just focus on environment, strengthen Qi & let it kill the bad guys in the body • Western Medicine uses antibiotics, painkillers, muscle relaxants
---	--

Formulas That Clear Heat From the Qi Level [清气分热]	
• Among 4-level system, Qi-level sx, among 6-meridian system, Yangming meridian sx are marked by high fever, profuse sweating, irritability, thirst, a yellow tongue coating, and a flooding, huge, and rapid pulse. • Treated with formulas that clearing heat to protect yin fluids.	•

Bai Hu Tang [白虎汤] (White Tiger Decoction) [1 st Degree]	
• Actions: Clears Qi-Level Heat, Generates Fluids. • Preparation: Cook shi gao first, then cook the rest until rice is done. ◊ Now have powdered shi gao □ don't have to cook it first. ◊ Back in the old times, didn't have antibiotics □ use shi gao to reduce fever • Shi Gao + Zhi Mu = Bai Hu Tang • Ma Huang + Gui Zhi = Ma Huang tang • Pay attention to chief pairs • Administration: taken warm, bid-tid Indications • Blazing heat in Qi-level/Yangming meridian stage [high fever with profuse sweating & aversion to heat, a red face, severe thirst with a desire to drink and irritability; and a flooding, forceful or slippery, rapid pulse] • This sx can be summarized as "Four Greats/Big" 四大. [Big Fever, sweating, pulse, thirst] Get rid of fever □ everything else follows • Organ: Da Cheng Qi Tang Applications • Yangming-meridian stage/ Qi-level/severe heat (St & Lu excess heat) with yin-fluids damage and without interior clumping. • Epidemic meningitis, Epidemic encephalitis B • Lobar pneumonia/mycoplasmal pneumonia • Heat stroke, Flu, Measles, Epidemic hemorrhagic fever • Rheumatic fever/arthritis, Rheumatic myocarditis • Trigeminal neuralgia, Acute tonsillitis, Epistaxis • Systemic pruritus, Acute pancreatitis	Modern Research • Anti-pyretic • Immunity-supporting • Anti-bacterial • Anti-inflammatory • Case Study • On the CHM shift, A 23 y-o male comes in with flushed face and hoarse voice. He came back from Europe yesterday and felt chilly and hot last night. This morning woke up with sore throat and sounds wired while talking. Other sx: thirst with desire to drink cold fluids, very hot. • You feel the heat steaming out from him while interviewing with him, and feel sticky wet while feeling his pulses. • A red tongue with thin yellow dry coat; a rapid and forceful pulse. • Dx: • Tx: Think & Review •

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Shi Gao	30-50	Sweet, acrid, very cold	LU, ST	Clears blazing heat, alleviate thirst and irritability Cold is draining [used to make tofu with shi gao □ after everyone eat, run to bathroom]
Deputy	Zhi Mu	9	Bitter, cold	LU, ST, KD	Clears heat, nourishes fluids (yin) Mutual promotion [Shi Gao & Zhi Mu] (just like Ma Huang & Gui Zhi)
A/E	Zhi Gan Cao	3	Sweet, warm	LU, SP	Harmonizes, protects middle qi, neutralizes the cold nature of chief and deputy
A/E	Geng Mi [Rice]	9-15	Bland, neutral	SP, ST	Protects middle qi, tonifies St. Sp

Modifications			
Plus shui niu jiao, gou teng	Qi and blood level heat	Plus huang qin, chai hu	With Shao yang sx
Plus dan dou chi, xi xin, cong bai	With residual w-c	Plus shan yao; minus geng mi	Middle qi xu
Plus da huang, mang xiao	With interior clumping	Plus huang lian, zhi zi	With toxin presence

Related Formula			
New formulas	Based on bai hu tang	Indications	
Bai Hu Jia Ren Shen Tang (Shang Han Lun)	Add Ren Shen 9g	Qi & Yin injury [Profuse sweating, large weak pulses]	
Bai Hu Jia Gui Zhi Tang (Jin Gui Yao Lue)	Add Gui Zhi 9g	With Wind Damp Heat Bi; Malarial disorders	
Bai Hu Jia Cang Zhu Tang (Lei Zheng Huo Ren Shu)	Add Cang Zhu 9g	For damp-warm-febrile disease: epigastric distention, white greasy tongue coat	

Zhu Ye Shi Gao Tang [竹叶石膏汤] (Lophatherus And Gypsum Decoction) Source: Shang Han Lun	
● Actions: Clears Heat, Generates Fluids, Augments Qi, Harmonizes Stomach. ● Preparation: Cook Shi Gao first, then cook the rest until rice is done. ● Administration: taken warm. ● ZZJ loved Ban Xia. Get rid of damp, disperse Qi Indications ● Lingering Qi-level heat injures Qi & Yin-fluids: lingering fever accompanied by profuse sweating, heat entered into ST [vomiting, irritability and thirst with a desire to drink, parched mouth, lips, and throat, a choking cough, stifling sensation in the chest; or restlessness, insomnia] ● T: Red with little coating, P: Deficient, rapid pulse. ● More complicated, more damage has been done Applications ● Aftermath of a febrile disease [lingering fever] ● Febrile diseases with injury to qi and yin-fluids characterized by unabated fever... ● Toxic reactions from chemo/radio-therapy [Radiation is extreme heat □ Patient feels hot & dry □ Damage Qi & Yin] ● Post-surgical fever ● Pharyngitis ● Nephritis ● Diabetes mellitus ● Infantile night sweating	Modern Research ● Anti-hypoglycemic ● Anti-diuretic ● Anti-inflammatory ● Case Study ● 23 y-o male comes in a week after he saw us – tired (he traveled again), poor sleep, feel warm and sweating a lot, poor appetite, nausea, irritability, sore and dry throat, thirst with a large bottle of cold water in hands. He is unable to concentrate on his work. ● A red geographic tongue. A soft and rapid pulse. ● Oh, he just took once of the herb you gave to him last week which made him nauseated. Then he went on trip without taking again. ● Dx: ● Tx: Think & Review ● Why do Shi Gao & Zhi Mu play an important role in Bai Hu Tang? ● What are the combined actions of ren shen and zhi gan cao in zhu ye shi gao tang? ● Why ban xia is included in zhu ye shi gao tang?

A/E	Geng Mi	15	Tonify qi, protect St		Prevent cloying nature of... and cold nature of...

Modifications			
+ shi gao, jin yin hua, lian qiao	Severe summerheat		
- huang lian + bai wei, di gu pi	Severe qi and fluids xu, especially for kids		
- mai dong, zhi mu + huo xiang, liu yi san	Pronounced turbid damp		

Related Formula			
formula	ingredients	indication	
Qing Shu Yi Qi Tang [利湿]清暑益气汤 (Li Shi) (Pi Wei Lun)	Huang qi, ren shen (sub by xi yang shen), cang zhu, bai zhu, mai dong, wu wei zi, ge gen, chen pi, qing pi, dang gui, sheng ma, ze xie, huang bai, shen qu, zhi gan cao	Damp-summerheat with qi xu (tonify qi, strengthen spleen, dry damp)	Shen Qu: protect middle jiao More damp than heat Cang Zhu: very dry Many yin tonics: mu dan pi

Chapter 5: Formulas That Warm Interior Cold [温里剂]	
- There are different types of warming formulas for treating interior cold 温法 in different levels: 1. Formulas that warm the meridians and disperse cold – relatively superficial cold 2. Formulas that warm the middle and disperse cold – middle jiao xu cold 3. Formulas that rescue the devastated yang – the decline, exhaustion, and collapse of yang (Ht, K)	- Formulas in this chapter contain herbs of a hot and drying nature. They must therefore be used with caution in patients with yin xu/blood loss, and should never be used in cases with true heat and false cold. - The dosage of the chief ingredients, particularly fu zi, gan jiang, must be adjusted to suit the season, climate, and individual patient [Don't use too much of the hot herbs in the summer, etc.]

Formulas That Warm the Channels and Disperse Cold	
- The cold congeals in the channels and obstructs the qi flow – This condition is often seen in patients with preexisting blood xu, attacked with cold, manifesting as cold extremities... - Treated with formulas that scatter the invading cold, and address the underlying blood xu as well. [Reynaud's Syndrome]	

Dang Gui Si Ni Tang [当归四逆汤] (Tangkuai Decoction For Frigid Extremities) Source: Shang Han Lun	
Actions: Warms Meridians, Disperses Cold, Nourishes Blood, Unblocks Blood Vessels. - Preparation and administration: decoction, taken warm, tid. - Classic ZZJ formula Indications - Cold in meridians with underlying blood xu [long-standing cold hands and feet that are both cold to the touch and feel very cold to the patient, cold pains in low back, thighs, legs, and feet; - T: pale with white coating, P: deep, thin, or too thin to be perceptible. Applications - cold invading the meridians with underlying blood deficiency - Rheumatic heart disease - Rheumatoid arthritis - Coronary heart disease - Raynaud's disease/thromboangitis obliterans (Buerger's disease) [Works well for this] Women get it more because their yin & blood is damaged - Fibromyalgia - Frostbite - Post-stroke sx	Modern Research - Circulation-improving - Microcirculation-improving - Blood vessel-dilating Case Study - A 38 y-o female asks for Tx for her cold fingers and toes. She has had this for years and got worse for last 6 months since she converted to a vegan [blood deficiency]. Other sx: pale complexion, always bundled up, coldness worse in the mornings when she first goes out - A slightly pale tongue with moist coating; deep and weak pulse. - Western Dx - Raynaud's disease - Dx: - Tx: Think & Review - Does dang gui si ni tang [more blood tonic] remind you of gui zhi tang? Do they share similarities? How about the differences? - Why patient feel cold? Ying & Wei Disharmony

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Dang Gui	12	Sweet, acrid, bitter, warm	HT, LV, SP	Moves and tonifies blood, warms meridians [Blood volume not enough] Focus on blood
Deputy	Bai Shao	9	Acrid, sweet, warm	LU, UB	Warms meridians, disperses cold
Chief	Gui Zhi	9	Bitter, sour, cool	LV, SP	Helps dang gui in tonifies blood; with gui zhi regulate ying and wei... [Warm meridians, disperse heat] (Focus on Qi)
Deputy	Xi Xin	1.5	Acrid, warm	LU, SP, KD	Helps gui zhi to warm and disperse both interior and exterior [Don't use too much in one day, had this ingredient before]
Assistant	Zhi Gan Cao	6	Sweet, warm	SP	Tonify qi, strengthen spleen
	Da Zao	5 PC	Sweet, warm; Sp	SP	Tonify qi, strengthen spleen
Envoy	Mu Tong	3	Bitter, cool	HT, SI, UB	Dredges meridians, focuses other herbs' effects on the meridians

Modifications			
+ xu duan, niu xi, ji xue teng	Cold pains in foot, leg, thigh, and low back	+ plus sheng jiang, wu zhu yu	Vertex headache, vomiting of white foamy mucus
+ wu yao, xiao hui xiang, mu xiang, gao liang jiang	Menstrual cold cramping, hernial disorders, deep pulse, cold limbs	+ bai zhi, fang feng	Vertigo, tinnitus, chronic headache

Related Formula			
formulas	ingredients	indications	
Dang Gui Si Ni Jia Wu Zhu Yu Sheng Jiang Tang (Shang Han Lun)	Dang gui si ni tang + wu zhu yu 5g, sheng jiang 15g	Internal cold with long-term blood and yang xu	Stronger to tonify yang & open meridians
Huang Qi Gui Zhi Wu Wu Tang (Jin Gui Yao Lue)	Huang qi, bai shao, gui zhi, sheng jiang, da zao	Vessel Bi sx due to mild attack of external wind during exertion and sweating: numb skin and muscle w/o pain, paresthesias...	

Formulas that warm the middle and dispel cold [温中祛寒]	
The middle jiao cold from xu – epigastric and abdominal distention and pain, fatigue, cold extremities; or acid regurgitation, nausea and vomiting, abdominal pain with diarrhea, reduced appetite, reduced thirst; a white, slippery tongue coating, a deep slow or deep thin pulse.	

Li Zhong Wan [理中丸] (Regulate The Middle Pill) Source: Shang Han Lun	
Actions: Warms Middle, Strengthens SP & ST - Preparation and administration: grind the herbs into powder and form into pills with honey. Taken 2-3 times a day in 9g doses with warm rice porridge. Or decoction Indications: middle jiao cold from xu [diarrhea with watery stool, nausea and vomiting, no particular thirst, loss of appetite, abdominal pain] - T: pale/flabby with white coating, P: deep, thin Applications [Chronic & deficient disorders] - Middle jiao cold from xu - Sudden turmoil disorder 霍乱 - Spitting of fluids due to cold in the chest during recovery from a chronic disease [can't transform □ dampness accumulates] - Chronic bleeding from yang xu - Chronic childhood convulsion - Gastric/duodenal ulcers - Chronic gastritis - IBS/colitis - Oral herpes - Chronic bronchitis - Male infertility	Patents - Fu zi li zhong wan - Gui fu li zhong wan Modern Research - Anti-peptic ulcer (by reducing acid level) - GI-improving (by regulating peristalsis) - CNS excitability-strengthening - Immunity-boosting - Adrenocortical function-regulating Case Study - A 26 y-o male nurse has been suffering from anemia due to the recent diagnosed duodenal ulcer. He feels tired and can't concentrate on work. Other sx: poor appetite, mild cold abdominal pain, worse with hunger, better with warm food, sallow complexion, occasional diarrhea. Has taken si jun zi tang with some effect. Think & Review

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Gan Jiang	9	Acrid, hot	SP, ST, LU, KD	Warms the middle yang, eliminates interior cold
Deputy	Ren Shen	9	Sweet, slt. bitter, slt. Warm	SP, LU	Tonifies the middle and yuan qi, restores Sp & St function
Assistant	Bai Zhu	9	Bitter, sweet, warm	SP, ST	Strengthens the middle, dries damp
Envoy	Zhi Gan Cao	9	Sweet, warm	SP, LU	Harmonizes, and tonifies the middle jiao

Modifications			
+ sheng jiang - bai zhu	Severe vomiting	+ fu zi, rou gui	Severe cold
+ fu ling	With palpitations	+ fu zi - bai zhu	Abdominal fullness
+ more ren shen	Severe abdominal pain	+ ai ye, huang qi, e jiao Replace gan jiang with pao jiang	Bleeding from yang xu

Related Formula			
New formulas	Based on li zhong wan	indications	
Fu Zi Li Zhong Wan [附子理中丸]	+ fu zi	More severe internal cold; Recurrent oral ulcers from xu cold	
Li Zhong Hua Tan Wan	+ fu ling, ban xia	The middle yang xu with cold and congested fluids/phlegm	Fluids, mucus accumulation
Gui Zhi Ren Shen Tang (Shang Han Lun)	+ gui zhi	Taiyang sx mistreated by purgatives, the exterior hasn't been resolved Internal cold developed [SP damaged]	

Xiao Jian Zhong Tang [小建中汤] (Minor Construct The Middle Decoction) Source: Shang Han Lun	
• Gui Zhi Tang Plus Yi Tang • Actions: warms & tonifies middle jiao, moderates spasmodic abdominal pain. • Preparation and administration: add yi tang (maltose) to the strained decoction • Very balanced ☐ regulate different levels ☐ Harmonizes • Flora changes as get older because pH changes ☐ Need to rebalance system • Indications: Spasmodic abdominal pain from consumptive deficiency [虚劳里急] [intermittent, spasmodic abdominal pain that responds favorably to local application of warmth and pressure, a lusterless complexion, reduced appetite, low-grade fever, palpitations, irritability, cold and sore extremities with nonspecific discomfort, and a dry mouth and throat • T: pale with a white coating, P: thin, wiry, and soft • Applications • abdominal pain due to cold from xu; heat (yin fire) due to lack of regulation between yi and yang – sweet, warm to expel heat. [Chronic GI disorders ☐ lack of absorption ☐ malnutrition, anemia, TCM Perspective: Middle Jiao deficiency ☐ can't balance yin & yang] • Chronic hepatitis • Chronic gastritis • Gastric/duodenal ulcers • Inflammatory bowel disease • Neurasthenia [Chronic fatigue] • Spontaneous sweating [Qi deficiency] • Angioneurotic abdominal pain • Postpartum fever • Male infertility • Neurogenic vomiting in children • Chronic nephritis • Hypoglycemia • Leukemia • Fever of unknown origin •	Modern Research • Anti-peptic ulcer (by protecting the mucosa) • Antispastic • Analgesic • Case Study • A 3 and half year old girl came in with her mom, looking for help for the abdominal cramps with apathy, tiredness, low motivation to learn or play. Other sx: cold limbs, distended abdomen, pale face, loose stools, occasional vomiting of acid fluid, reduced appetite, the cramp better with warm beverage and pressure. • A slightly pale tongue with white coating; a soft pulse; the index finger veins appear in the wind and qi areas. • Dx: • Tx: • Think & Review • Can you tell the relationship between xiao jian zhong tang [more focus on deficiency] and gui zhi tang? ◊ Retains function to Regulate Ying & Wei • Please compare li zhong wan [more warm up middle jiao] with xiao jian zhong tang [more tonify middle jiao]. ◊ Ren Shen & Gan Jiang

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Yi tang	18-30	Sweet, warm	SP	Tonifies and moderates spasmodic abdominal pain [Maltose, brown sugar ok]
Deputy	Gui zhi	9	Acrid, sweet, warm	LU, UB	With gan cao to produce yang from acrid +sweet, disperses cold
Assistant	Bai shao	18	Bitter, sour, cool	LV, SP	With gui zhi to regulate yin + yang, with gan cao to produce yin from sour + sweet to relieve spasm
Envoy	Zhi gan cao	6	Sweet, warm	SP, LU	Harmonizes middle, aids in stop pain with bai shao
	Sheng jiang,	9	A pair of regulation		Aids in regulating ying and wei, protects middle
	da zao	4 PC	A pair of regulation		

Modifications			
+ chuan jiao Sub rou gui for gui zhi	More severe cold	+ bai zhu, bai bian dou	Loose stools
+ mu xiang, chen pi	With qi stagnation	+ wu mei, chuan jiao Cut down yi tang, bai shao	Parasites

Related Formula			
New formulas	Based on xiao jian zhong tang	Indications	
Huang Qi Jian Zhong Tang (Jin Gui Yao Lue)	+ huang qi 9g	More severe qi xu: sob, spontaneous sweating, faint & frail Pulse	Add Qi tonic
Dang Gui Jian Zhong Tang (Qian Jin Yi Fang)	+ dang gui 12g	Postpartum weakness & emaciation: tight, persistent abdominal pain, sob	Add blood tonic Lose so much blood, then start feeding baby ☐ Even more deficient

Formulas That Rescue Devastated Yang [回阳救逆]	
Devastated yang sx – a sudden collapse of yang, an increase of yin(cold) in the interior, which is accompanied by severe yuan qi xu: cold extremities, an aversion to cold; or watery diarrhea [KD yang affected], abdominal pain with frequent vomiting, lethargy; a submerged, faint, and almost imperceptible pulse.	- Treated with formulas that rescue devastated yang by strong warming herbs. - Warmest formulas

Si Ni Tang [四逆汤] (Frigid Extremities Decoction) Source: Shang Han Lun	
Actions: Rescues devastated yang, warms middle, stops diarrhea. [Heart attack] - Preparation and administration: cook sheng fu zi for one hour before adding the other herbs. Decoction, take warm. - Very balanced formula: Upper jiao, middle jiao, warm up but not make too dry Indications: Kidney yang exhaustion with internal cold [Extremely cold extremities, aversion to cold, sleeping with the knees drawn up, a lethargic state with a constant desire to sleep, vomiting, diarrhea with undigested food particles, abdominal cold pain, lack of thirst] - T: pale with white, slippery coating, P: deep, thin/deep, faint pulse Applications - kidney yang exhaustion with increasing internal cold; - true cold with false heat (decoction taken cool). - Cardiac insufficiency - Vomiting/diarrhea from acute and chronic gastroenteritis - Hypothyroidism - Adrenal insufficiency - Intractable arthritis - Acute myocardial infarction Patents - Shen fu zhu she ye (shen fu injection)	Modern Research - Cardiotonic - Blood pressure-raising - Coronary-dilating - Antioxidant - Antishock - Immune-support - Anti-anoxia Case Study - A 58 y-o male were carried in ER with profuse cold sweating, cold extremities, shallow and quick breathing, pale complexion, almost no consciousness. He had two similar attacks before, and had diagnosis of coronary heart disease. - A pale and dusky tongue with thin white coating; a very faint pulse that is imperceptible. - Dx: - Tx: Think & Review - How do fu zi and gan jiang enhance and complement each other in rescuing yang? - How do you comprehend “fu zi is not hot if it is used apart from gan jiang”? - When ren shen is added into si ni tang, what action changes have taken place? - Tonifies yang, yin & Qi

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Sheng Fu Zi	5-10	Acrid, sweet, hot, poisonous	HT, SP, KD	Warms & stimulates kidney yang and disseminates throughout the body [Difficult to buy this now ☐ Toxic]
Deputy	Gan Jiang	6-9	Acrid, hot	SP, ST, LU, KD	Warms the middle, eliminates cold, work with fu zi synergistically. Fu zi is not hot if it is used apart from gan jiang (complementary) Fu Zi + Gan Jiang: Warm up 3 jiao [warm up yang Qi of whole body]
Assistant	Zhi Gan Cao	6	Sweet, warm; 12 meridians		Tonifies qi, strengthens the middle, reduces toxicity, moderates dry nature of chief and deputy

Modifications			
+ dang shen, fu ling, ze xie	Edema, leukorrhea from xu cold	+ sang ji sheng, du zhong	LBP
+ hong shen, huang qi	Weak constitution, frail pulse	Increase fu zi, gan jiang + long gu, mu li	Severe cold, excessive sweating, severe diarrhea
+ gui zhi, bai zhu	Intractable Bi sx		

Related Formula			
Si Ni Jia Ren Shen Tang (Shang Han Lun)	+ ren shen 3g	Extremities remain cold with Tx	Maintain effects
Bai Tong Tang (Shang Han Lun)	+ cong bai 4 pieces [bridge/open meridians] - zhi gan cao	Shaoyin sx: diarrhea, faint pulses	
Tong Mai Si Ni Tang (Shang Han Lun)	Increase sheng fu zi to 15g, gan jiang to 9g	Shaoyin sx: interior cold with exterior heat; Severe Ht yang xu	Heart attack, heart failure ☐ Use higher dosage [use too much, could be dangerous, but needed for heart failure]
Shen Fu Tang (Jiao Zhu Fu Ren Liang Fang)	Ren shen 12g, zhi fu zi 9g	Sudden yang qi collapse, used as an rescuing formula (a short form of si ni jia ren shen tang)	Made into IV in emergency room in china ☐ get into blood immediately, rescue heart attack

Chapter 6: Formulas That Treat Both Exterior & Interior [表里双解剂]	
- Exterior condition with interior excess – treated with formulas that release exterior and drain - Exterior condition with interior heat – treated with formulas that release exterior and clear	- Exterior condition with interior cold – treated with formulas that release exterior and warm - Notes: Please differentiate the intensity and severity of the exterior and interior to help proportionate herbs of each group.

Release Exterior & Drain [解表攻里]	
These formulas are used to treat the exterior condition (either w-c or w-h) simultaneously with interior heat accumulation.	These formulas often contain exterior-releasing herbs (ma huang, gui zhi, jing jie, fang feng, chai hu, bo he) and downward-draining herbs (da huang, mang xiao) as well

Da Chai Hu Tang (Major Bupleurum Decoction) Source: Shang Han Lun	
- Refer to [xiao chai hu tang] 小柴胡汤: chai hu, huang qin, ren shen, ban xia, zhi gan cao, sheng jiang, da zao Actions: Harmonizes & Releases Shao Yang, Drains Internal Clumping Heat. - Preparation and administration: decoction, taken warm Indications: Concurrent Shaoyang & Yangming disorder [alternating fever & chills, fullness in chest and hypochondria (with or without pain), bitter taste in mouth, nausea, continuous vomiting, hard focal distention or fullness & pain in the epigastrium, burning diarrhea or no bowel movements, despondency, slight irritability] - T: yellow coating, P: wiry, forceful Applications - Concurrent Shaoyang and Yangming sx; Stomach and GB heat excess (continuous vomiting). - Cholecystitis/cholelithiasis - Fatty liver - Acute pancreatitis - Fever secondary to cancer removal - Infantile fever at midnight - Malignant hypertension	Modern Research - Bile-secretion promoting - Gastric-mucosa protecting - Liver-protecting - Blood-lipid reducing Case Study - A 43 y-o female complains about progressive right upper abdominal pain for 5 hours secondary to a stomach flu. The pain extends to right middle back and feels like colic. Other sx: nausea, vomiting at times, bitter taste in the mouth, alternating fever/chills, irritability, no BMs so far. - A red-tipped/edged tongue with orange coating; A wiry and forceful pulse, pronounced at right Guan. A significant tender area in right subcostal region. - You noticed a slight jaundice while you looked at her eyes. - Dx: - Tx: Think & Review - Compare Da Chai Hu Tang with Xiao Chai Hu Tang from the ingredients, actions and indications. - Compare da chai hu tang with hou po qi wu tang from the ingredients, actions and indications.

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Chai hu	15	Bitter, slt.acrid, cool	LV, GB	With huang qin, has stronger effect to clear LV & GB heat
Deputy	Huang qin	9	Bitter, slt.acrid, cool	LV, GB	With huang qin, has stronger effect to clear LV & GB heat
	Zhi shi	9	Bitter, cold	ST, LI, LV	Drain heat clumping from Yangming
	Da huang	6	Bitter, cold	ST, LI, LV	Drain heat clumping from Yangming
Assistant	Bai shao	9	Bitter, sour, cool		Relieve abdominal excess pain [focal distention/ fullness & pain in epigastrium from qi/blood disharmony] Paired with Da Huang, Zhi Shi
	Ban xia	9	Acrid, warm, poisonous	SP, ST	Stop vomiting by directing rebellious qi downward Paired with Sheng Jiang
Envoy	Sheng jiang	15	Protect the middle		Regulate ying and wei; help release pathogenic influence
	Da zao	5 PC	Protect the middle		Regulate ying and wei; help release pathogenic influence

Modifications			
+ pu gong ying, zhi zi, yu jin	Severe damp-heat	+ yan hu suo, xiang fu, chuan lian zi	Severe abdominal pain
+ cang zhu, hou po, chen pi, ji nei jin	Poor appetite, loose stools	+ tai zi shen, dang gui	Weak constitution

Related Formula			
formulas	ingredients	indications	
Hou po qi wu tang [厚朴七物汤] (jin gui yao lue)	Huo po, gan cao, da huang, zhi shi, gui zhi, sheng jiang, da zao	Exterior not yet resolved with an interior excess has developed [Taiyang & Yang ming sx]	
Qing yi tang [清胰汤] (zhong xi yi jie he zhi liao ji fu zheng)	Chai hu, huang qin, hu huang lian, bai shao, mu xiang, yan hu suo, da huang, mang xiao	Acute pancreatitis [stabbing, diffuse epigastric pain extending to the back, fever/chills]	

Fang Feng Tong Sheng San [防风通圣散] (Ledebouriella Powder That Sagely Unblocks) Source: Huang Di Su Wen Xuan Ming Lun Fang	
● Actions: Disperses Wind, Releases Exterior, Drains Heat, Unblocks Bowels. ● Preparation and administration: grind into powder, take 6-9g as a draft with 3 pieces of sheng jiang (envoy). Or prepare as a decoction with a proportionate reduction in dosage. ● Indications: Heat excess in both exterior & interior [strong fever & chills, light-headedness, dizziness, red & sore eyes, difficulty swallowing, nasal congestion with thick and sticky nasal discharge and saliva, bitter taste in mouth, dry mouth, focal distention with a stifling sensation in chest & diaphragm, constipation, dark, rough urination; facial sores; stiff tongue, clenched jaw ● T: yellow, greasy coating, P: flooding, rapid or wiry, slippery Applications ● accumulated wind-heat with exterior and interior excess; carbuncles, heat rash, manic behavior(kuang), intestinal wind, erysipelas. ● Lobar pneumonia ● Urticaria ● Hyperlipemia ● Acute mastitis ● Food poisoning ● Obesity	Modern Research ● Cholesterol-reducing ● Anti-embolism formation ● Blood pressure-reduction ● Heart rate reduction ● Anti-arrhythmia effect ● Cardio-improving ● Anti-microorganism Case Study ● A 49 y-o red-faced male looks for tx for his hyperlipemia and fast weight gain since his cigarette cessation a month ago. Other sx: BM/2-3 days, excessive appetite, feverish sensation above the neck, cold feet and knees. Medical hx: hypertension for 13 years, alcoholism for 28 years. The father died of heart attack. ● A dull-red tongue with thin yellow coating, congested and purple sublingual veins. A rapid, slippery pulse. ● Dx: ● Tx: ● Think & Review ●

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Fang Feng	15			Release the exterior, disperse wind through sweating
	Ma Huang	15			Release the exterior, disperse wind through sweating
	Jiu Da Huang	15			Drain interior heat, promote BM through stool
	Mang Xiao	15			Drain interior heat, promote BM through stool
Deputy	Jing Jie	15			Release exterior, disperse wind thru sweating, Clear w-h from LU & eyes/head
	Bo He	15			Release exterior, disperse wind thru sweating, Clear w-h from LU & eyes/head
	Zhi Zi	15			Drain heat through urine
	Hua Shi	90			Drain heat through urine
	Shi Gao	30			Clears heat from lungs and stomach
	Lian Qiao	15			Clear heat (fire), relieve toxicity
	Huang Qin	30			Clears heat from lungs and stomach, Clear heat (fire), relieve toxicity
	Jie Geng	30			Clear up w-h from lungs and eyes/head

	Dang Gui	15			Nourish and regulate blood, help disperse wind
	Bai Shao	15			Nourish and regulate blood, help disperse wind
	Bai Zhu	15			Protect middle, harmonize the others
Envoy	Gan Cao	60			Protect middle, harmonize the others
	Sheng Jiang	3 PC			Protect middle, harmonize the others

Modifications		Fang feng,ma huang,jing jie,bo he	Release the exterior, disperse wind through sweating
- ma huang	Mild exterior sx	Jiu da huang, mang xiao	Drain interior heat, promote BM through stool
- shi gao	Mild interior heat	Shi gao, huang qin	Clears heat from lungs and stomach
- da huang, mang xiao	W/o constipation	Lian qiao, huang qin	Clear heat (fire), relieve toxicity
+ jiang ban xia	With productive cough	Jie geng, bo he, jing jie	Clear up w-h from lungs and eyes/head
- dang gui, bai shao, bai zhu	Strong constitution	Zhi zi, hua shi	Drain heat through urine
		Dang gui, bai shao, chuan xiong	Nourish and regulate blood, help disperse wind
		Bai zhu, gan cao, sheng jiang	Protect middle, harmonize the others

Release Exterior and Clear [解表清里]	
- These formulas are used to treat condition in which EPI remains lodged in the exterior while an interior already developed. - These formulas often contain exterior-releasing herbs (ge gen, ma huang, dan dou chi) and heat-clearing herbs (3 huang, shi gao) as well	

Ge Gen Huang Qin Huang Lian Tang [葛根黄芩黄连汤] (Kudzu, Scutellaria, Coptis Decoction) Source: Shang Han Lun	
Actions: Releases Exterior, Clears Heat - Preparation and administration: decoction, taken lukewarm Indications: Exterior not been completely released but interior is already ablaze with heat (may be caused by improper purging) [fever, sweating, thirst, dysenteric diarrhea with marked foul-smelling stools & burning sensation around the anus, irritability & heat in chest & epigastrium; or wheezing] - T: red with yellow coating, P: rapid Applications - Taiyang improperly purged leads into Yangming (3:7 ratio); early-stage dysenteric disorder diagnosed as lower damp-heat with lingering exterior condition. - Chronic colitis - Gastroenteritis - Bacillary dysentery - Upper GI bleeding with black stool - Radio-therapy induced proctitis - Prostatitis	Modern Research - Anti-pyretic - Anti-bacterial - Anti-viral - Peristalsis-inhibiting - Anti-spastic - Anti-anoxia - Immune-supporting Case Study - A 34 y-o female asks for your help for her diarrhea secondary to a flu started 2 weeks ago. She took antibiotics for a week and some over-the-counter anti-pyretic meds for fever for 2 days. Other sx: thirst with desire to drink cold water, a feverish sensation worse in the afternoon, stinky stools with burning sensation around anus, tiredness, aversion to wind, mild cough with grayish mucus. - A dusky-red tongue with greasy, and yellow coating, thickening in the middle and back. A soggy and slightly floating pulse. - Dx: - Tx: Think & Review - Compare ge gen huang qin huang lian tang with bai tou weng tang. - Can you catch a hidden formula you learned this quarter in shi gao tang? In what chapter did you first study this hidden formula?

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Ge Gen	15	Sweet, acrid, cool	SP, ST	Alleviates diarrhea, releases exterior, clears heat
Deputy	Huang Qin	9	Bitter, cold	HT, LU, GB LI	Clears heat, especially heat in lungs and LI to treat wheezing
Assistant	Huang Lian	9	Bitter, cold	HT, LV, ST, LI	Clears heat, especially heat in stomach and LI
Envoy	Zhi Gan Cao	6	Sweet, warm; 12 meridians		Harmonizes the others, protects the middle

Modifications		
+ mu xiang, bai shao	With abdominal cramps	
+ chao shan zha, shen qu	With food stagnation	
+ mu dan pi, hui hua, di yu	With boody stool	
+ sang bai pi, bo he	Prominent exterior sx	

Related Formula		
formula	ingredients	Indication
Shi Gao Tang [石膏汤] (Wai Tai Bi Yao)	Shi Gao 30 Ma Huang 9 Dan Dou Chi 9 Huang Lian Jie Du Tang [Chapter 4] - Huang Lian 6 - Huang Qin 6 - Huang Bai 6 - Zhi Zi 9	Heat blazes in the interior while exterior lingers [strong fever (slight chills) w/o sweating, HA, red face & eyes, thirst, irritability, delirium; nosebleeds, coughing up blood, skin blotches, dry nasals, rapid, slippery/flooding pulse]

Release the Exterior & Warm [解表温里]	
- Used to treat simultaneous existence of exterior condition & interior cold. - Often contain exterior-releasing herbs (ma huang, bai zhi, gui zhi) and interior-warming herbs (gan jiang, rou gui).	
Wu Ji San [五积散 (15 Wei)] (Five-Accumulation Powder) Source: Tai Ping Hui Min He Ji Ju Fang	
Actions: releases exterior, warms interior, smoothes qi flow, transforms phlegm, invigorates blood, reduces accumulation. - Preparation and administration: grind the herbs into coarse powder, take 9g warm as a draft with 3 pieces of sheng jiang. Or prepared as a decoction with dosage indicated in parentheses Indications: Exterior wind-cold with interior injury from cold (often improper diet) Wu Ji [五积] [cold寒, damp湿, qi气, blood血, phlegm痰] [fever & chills w/o sweating, HA, body aches, stiff neck and back, a sensation of fullness in the chest and abdomen, nausea, aversion to food, vomiting, abdominal cold pain, diarrhea with borborygmus; in women, irregular menses with cramps] Applications - exterior w-c with interior cold (damp-cold, phlegm, qi, blood) accumulation - Food stagnation with w-c - Irregular mense with epigastric and abdominal pain due to cold - URI with gastritis - Acute exacerbation of bronchial asthma	Modern Research Case Study - A 42 y-o female asks for help for her menstrual cramps due to swam in Lake Washington on a cold day 7 months ago. She also notices that menses become 7-10 days late each month. Other sx: the cramps worse with cold, better with heat, scanty flow with dark red blood and some clots, reduced appetite, poor absorption, low energy. She took pain-killers with temporary relief - A dusky tongue with thin, white coating, bluish and congealed sublingual veins. A deep, slow pulse. - Dx: - Tx: Think & Review - What is the primary pathological mechanism among “wu ji-5 accumulations” in wu ji san? (hint: the size of dosages of ingredients) - Please compare Chai Hu Gui Zhi Gan Jiang Tang & Xiao Chai Hu Tang

Chai Hu Gui Zhi Gan Jiang Tang [柴胡桂枝干姜汤] (Shang Han Lun)	Chai hu 15, Gui zhi 12, Gan jiang 6, Tian hua fen 12, Huang qin 9, Mu li 20, Zhi gan cao 3	Cold injury (shang han) leading to accumulation & fullness in chest and hypochondria [difficult urination, thirst, sweating of head, alternating fever/chills, irritability] Malaria: strong fever and mild chills	

Chapter 7: Formulas That Tonify 补益剂	
- Among the 8 strategies, this belongs to the tonifying (补法). - Formulas in this chapter are used to treat qi xu, blood xu, qi and blood xu, yin xu, and yang xu. Between qi and blood, yin and yang, tonifying one will have a salutary effect on the other. - In "Discussion of the Spleen and Stomach" Li Dong Yuan said: "For blood xu, use ren shen to tonify, because when the yang qi is exuberant, it will generate yin blood". - In "Collected Treatises of Jing-Yue" Zhang Jing Yue said: "To tonify the yang well, you must search for yang within the yin... To tonify the yin well, you must search for yin within the yang." - Many formulas that tonify the yang (qi) therefore contain ingredients that tonify the yin (blood), and vice versa. - For deficiency, tonify the mother is often applied as a strategy for tonification. E.g. tonify water to tonify wood.	- Side-effects often develop when tonics are prescribed for individuals who are not suffering from xu – [fever, HA, rash, pimples, insomnia, irritability, and digestive upset] - Too deficient to be tonified [虚不受补] the rich, cloying nature of tonifying herbs places a burden on the digestive system. It is usually necessary to add ingredients that promote digestion and assimilation. E.g. chen pi, sha ren. - Start with mild tonics, then gradually get stronger - Mild, chronic conditions require a smaller dosage than do acute, life-threatening conditions. - Tonifying formulas: generally cooked for long period of time over a low flame (between 30'-1hr.), and taken on an empty stomach to realize their full effect. - Relationship of Qi & Blood □ Tonify Qi, Tonify Blood

Formulas That Tonify the Qi [补气]	
Formulas in this section are primarily used to treat Spleen and Lung Qi xu – generalized weakness, fatigue (with little exertion), a low voice/laconic speech, sob, profuse sweating; or prolapse, bleeding, and incontinence; a shiny pale complexion, reduced appetite, loose stools; a flabby tongue with white thin coating, a weak, or weak, large pulse.	Treated with formulas that contain Qi tonics such as ren shen, dang shen, huang qi, bai zhu, gan cao, and some blood-tonics such as dang gui, as well as qi-movers such as chen pi, and damp-transformers such as fu ling, bai bian dou

Si Jun Zi Tang [四君子汤] (Four-Gentleman Decoction) Source: Tai Ping Hui Min He Ji Ju Fang	
Actions: Tonifies Qi, Strengthens Spleen. - Preparation and administration: grind the herbs into fine powder, take 6g as a draft. Or prepared as a decoction. 2-3 times of dang shen may sub for ren shen in mild cases Indications: Classic presentation of Spleen Qi xu – pallid complexion, low and soft voice, reduced appetite, loose stools, and weakness in the limbs - T: pale with white coating, P: thin and/or frail Applications: Basic Qi-tonifying formula. - Peptic ulcer - Atrophic gastritis - Chronic active hepatitis - Chronic ulcerative colitis - PMS - Uterine fibroid - Recovering from infectious diseases in kids	Patents - Si jun zi tang wan - Xiang sha liu jun zi wan - Xiang sha yang wei wan [GI deficiency with damp accumulation] Modern Research - Peptic ulcer prevention - Anti-cancer effect - Peristalsis-inhibiting - Immune-stimulating - Metabolism-promoting - Hemopoiesis-promoting Case Study - A 5 y and 2 month old girl comes in with her mom for her reduced appetite and weight loss in last 3 months due to the application of antibiotics for her chronic sinusitis. Other sx: apathy, no motivation for kids' games and activities, lose and frequent stools, cold extremities, sluggish grow in height comparing to her friends in school. - A slightly flabby tongue with white coating; a thin and weak pulse.

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Ren Shen	3-9	Sweet, S. bitter, S. warm	SP, LU	Tonifies spleen Qi Chief Pair: Ren Shen + Bai Zhu
Deputy	Fu Ling	6-9	Sweet, bland, neutral	HT, SP, LU	leaches out damp, helps strengthen spleen,
Assistant	Bai Zhu	6-9	Bitter, sweet, warm	SP, ST	Strengthens spleen, dries damp
Envoy	Zhi Gan Cao	3-6	Sweet, warm	SP, LU	Warms and regulates the middle

Modifications			
+ ban xia	With nausea, vomiting	+ suan zao ren	With palpitations, insomnia
+ zhi ke, chen pi	With fullness & stifling sensation in chest and diaphragm	+ fu zi	With kidney yang xu
		+ huang qi	Severe Qi xu

New formulas	Based on si jun zi tang	Indications	
Yi Gong San [异功散] (Xiao Er Yao Zheng Zhi Jue)	+ Chen Pi 6-9 (Da Zao, Sheng Jiang)	Sp xu w/qi stagnation leading to an irregular appetite, stifling sensation	
Liu Jun Zi Tang [六君子汤] (Yi Xue Zheng Zhuan)	+ Chen Pi 3, Ban Xia 4.5 (Sheng Jiang, Da Zao)	Sp xu w/phlegm & damp: loss of appetite, focal distention, stifling sensation, nausea/vomiting	
Xiang Sha Liu Jun Zi Tang [香砂六君子汤] (Zhang Shi Yi Tong)	+ Chen Pi, Ban Xia, Sha Ren, Mu Xiang	Sp/St xu w/qi and phlegm stagnation: belching, vomiting, diarrhea, abdominal pain/distention...	
Xiang Sha Yang Wei Tang [香砂养胃汤] (Wan Bing Hui Chun)	Ren Shen, Bai Zhu, Fu Ling, Zhi Gan Cao, Cang Zhu, Jiang Zhi, Hou Po, Chen Pi, Chao Xiang Fu, Bai Dou Kou, Mu Xiang, Sha Ren, Sheng Jiang, Da Zao	Sp and St xu with damp accumulation & qi stagnation [Strongest]	
Bao Yuan Tang [保元汤] (Jing Yue Quan Shu)	Ren Shen, Zhi Gan Cao, Huang Qi, Rou Gui	Yuan (source) qi xu w/ coldness in children	Not used very often

Formulas That Tonify the Qi 补气	
Shen Ling Bai Zhu San [参苓白术散] (Ginseng, Poria, And Atractylodes Macrocephala Powder) Source: Tai Ping Hui Min He Ji Ju Fang	
● Actions: Augments Qi, Strengthens Spleen, Leaches Out Damp, Stops Diarrhea. ● Preparation and administration: grind the herbs into powder, take in 6g doses with warm water. Decoction with 1/100 the dosage specified above ● Indications: Spleen qi xu leading to internally-generated damp [loose stools or diarrhea, reduced appetite, weak extremities, weight loss, distention & stifling sensation in chest & epigastrium, pallid and wan complexion; or vomiting] ● T: pale with white coating, P: thin, soft or deficient soft Applications ● SP qi xu with diarrhea (Well-balanced formula: warm w/o being dry, tonifying w/o cloying, leaching out w/o damaging normal qi) ● Diarrhea with the onset of menstrual flow ● Leukorrhea in relatively obese women ● Infantile malnutrition, Rickets, Infantile anorexia, Zinc deficiency in children ● Allergic enteritis, Chronic gastritis/bronchitis/hepatitis ● Mal-absorption, Chronic nephritis, Diabetes mellitus ● Liver cirrhosis, Urinary tract stones ● Side-effects from chemo/radiotherapy	Patent ● Shen ling bai zhu wan/pian ● Zi sheng wan ● Prosperous farmer ● Source Qi Modern Research ● GI tract-regulating ● Immune-support ● Circulation-improving Case Study ● A 45 y-o female looks for Tx for her frequent loose BMs(4-6 per day) with slimy pus. Other sx: lassitude, reduced appetite, abdominal distention, gurgling sound with cramping prior to BM. She has been diagnosed as chronic enteritis for years, and all the sx get worse with stress and menstruation. ● A pale and flabby tongue with white coating; a soft and large pulse. ● Dx: ● Tx: ● Think & Review ● Please compare si jun zi tang with shen ling bai zhu san ● Why can shen ling bai zhu san be used for chronic cough with copious sputum due to lung xu? Please deliberate from 5-E. ◇ LU is son of Earth (SP)

Ren Shen Hu Tao Tang [人參胡桃湯] (Ji Sheng Fang)	Ren shen 6-9 hu tao ren 5 nuts Sheng jiang 5 pieces	Both KD & LU [coughing, wheezing, chest fullness, inability to lie supine]	Very warm ☐ Don't use for yin deficiency Good for Addison's, adrenal exhaustion, hypothyroidism

Formulas That Tonify the Blood [补血]	
- Blood xu – dizziness, vertigo, a pale and lusterless complexion, a pale tongue and lips, dry and cracked nails, palpitations, dry/itchy skin, insomnia, constipation, long menstrual cycles with scanty, pale flow, and a thin pulse. - Often caused by excessive loss of menstrual blood, or any blood loss and malnutrition	- Chronic blood xu can lead to blood stasis, blood stasis can lead to a reduction in the production and circulation of blood – this is known as “bad blood preventing the generation of new blood”. - Blood xu is treated with formulas that tonify and nourish blood that contain ingredients of blood-nourishing, qi-tonifying, and blood-invigorating as well.

Si Wu Tang [四物汤] (Four-Substance Decoction) Source: Tai Ping Hui Min He Ji Ju Fang	
Actions: Tonifies & Regulates Blood - Preparation and administration: coarsely grind the ingredients and take in 9g doses as a draft, tid, before meals. - Or as decoction. Indications: Blood xu (Liver or Chong & Ren Mai) [dizziness, blurred vision, lusterless complexion and nails, generalized muscle tension; irregular menstruation with little flow or amenorrhea, periumbilical and lower abdominal pain; or menorrhagia, hard abdominal masses with recurrent pain, restless fetus disorder, or lochioschesis with a firm and painful abdomen and sporadic fever and chills] - T: pale tongue, P: thin and wiry or thin and choppy pulse Applications: Blood Xu From Various Causes [Mild conditions] - Dysmenorrhea, Amenorrhea, Irregular menstruation - Anemia, Threatened miscarriage, Postpartum weakness - Insufficient lactation, Infertility, Uterine fibroid - Chronic nephritis, Angioneurotic headache, Hypocalcemia convulsion - Sciatica pain, Urticaria, Psoriasis - Allergic rhinitis, Serous retinopathy	Modern Research - Hematopoiesis-promoting - Immune-regulating - Anti-blood-agglutination - Myometrium-regulating - Anti-anoxia Case Study - A 35 y-o female asks for tx for her 9-14 days late menstruation with clots and dark-red flow secondary to her abortion 2 years ago. Other sx: premenstrual cramping that worsen with pressure and better with the passage of clots. The menstrual flow is off and on for about 10 days. Poor concentration, poor memory, low sexual drive - A purple-edged tongue with thin white coating; a thready pulse with deep and weak in Chis. - Dx: - Tx: Think & Review

Rank	Herb	Amount	Properties	Channels	Notes	
Chief	Shu Di Huang	9-21	Sweet, warm; Lr, K, Ht	LV, KD, HT	Nourishes yin of the blood, tonifies LV and KD. Greasiest, hardest to digest plant. Nourish blood	Nourish yin of blood
Deputy	Bai Shao	9-15	Bitter, sour, cool; Lr, Sp	LV, SP	Tonifies blood, nourishes and preserves yin. With shu di-strong blood tonic	
Assistant	Dang Gui	9-12	Sweet, acrid, bitter, warm	HT, LV, SP	Tonifies and invigorates blood. Nourishes yang of blood	Nourish yang & Qi of blood
Envoy	Chuan Xiong	3-6	Acrid, warm	LV, GB, PC	Invigorates blood and moves qi of the blood, alleviates pain by releasing constraint Lr qi	

Modifications

	Jiu Chao Zhi Mu	60			
Deputy	Shu Di Huang	60			Enrich yin, tonify kidney
	Jiu Zhi Gui Ban	120			
Assistant	Bai Shao	60			Nourishes sinews & blood
	Hu Gu (Bobcat Bone)	60			Pair good at strengthening sinews & bones
	Suo Yang	45			Helps healing of broken bones
	Gan Jiang	15			Warm and tonify Sp, St
	Chen Pi	60			Chen Pi: Regulates middle jiao

Modifications			
Huang bai, zhi mu	Drain fire/drying damp, clear heat		
Shu di, gui ban	Enrich yin, tonify kidney	+ shan yao	With Sp xu
Bai shao	Nourishes sinews & blood		
Hu gu, suo yang	A pair good at strengthening sinews and bones		
Gan jiang	Moderates bitter cold nature of huang bai, warm the middle		
Chen pi	Regulates middle jiao		
Chen pi, gan jiang	Warm and tonify Sp, St		

Related Formula			
Hu Qian Wan (Yi Fang Ji Jie)	+ Dang Gui, Hui Niu Xi, Yang Rou (Lamb)	Stronger in nourishing and tonifying blood, strengthening sinews, muscles, and bones	

Er Zhi Wan [二至丸] (Two-Ultimate Pill) Source: Yi Fang Ji Jie	
● Actions: Tonifies & benefits KD & LV ● Preparation and administration: grind equal amounts of the herbs into powder and into pills with honey. Taken in 9-15g doses, bid-tid. ● Added into other formulas. ● ● Indications: KD & LV yin xu [dry and parched mouth and throat, dizziness and blurred vision, insomnia and dream-disturbed sleep, weakness and soreness of the lower back and knees, or weakness and atrophy of the lower extremities, spontaneous emissions, premature graying or loss of hair] ● T: red, dry, P: thin, deep pulse Applications ● elegant combination of 2 herbs, which is widely used both by itself and as an additive to other formulas when Lr and K yin needs to be nourished. It is considered safe and relatively mild. ● Threatened miscarriage ● Functional uterine bleeding ● Chronic nephritis ● Leukopenia ● Purpuric skin dz	Patent ● Modern Research ● Case Study ● Think & Review ●

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Nu zhen zi		Bitter, sweet, neutral		Enriches KD & LV yin w/o being cloying
Deputy	Han lian cao		Sweet, sour, cool		Nourishes KD & LV yin, benefits essence, cools blood (to stop bleeding)

Modifications			
+ sang shen zi	Sweet, cool; Lr, K	Stronger effect in enriching yin and tonifying blood	

Related Formula			
Sang Ma Wan [桑麻丸] (Yi Fang Ji Jie)	Sang Ye 300 [Best □ Sang Shen: Fruit] Hei Zhi Ma 120 Bai Mi (Honey) 300	Yin xu with dried blood & wind-damp [dizziness, blurred vision, chronic cough, constipation with very dry stools, dry flaky skin accompanied by numbness and Bi]	More often used Honey: Nourish yin, tonify yang

Yi Guan Jian [一贯煎] (Linking Decoction) Source: Xu Ming Yi Lei An	
● Actions: Enriches Yin, Moves LV Qi. ● Preparation and administration: decoction, taken lukewarm. ● Patients with yin deficiency easily get LV Qi stagnation & Blood stagnation ● Indications: LV & KD xu with concurrent LV qi stagnation (with heat) [hypochondriac & chest pain, epigastric and abdominal distention, dry and parched mouth and throat, a bitter taste in mouth, acid regurgitation. Also lumps and nodules due to yin xu and qi stagnation.] ● T: red & dry, P: thin, frail or deficient, wiry. ● ● Applications ● Hypochondriac and abdominal pain due to yin xu and qi stagnation. ● Chronic hepatitis/cirrhosis with elevated enzymes ● Atrophic gastritis, Hypertension, Restless leg ● Peptic ulcer, CFS, xerophthalmia ● Sjogren's sx, PMS ● Soft tissue injury ● Chronic nephritis ● Recurrent otitis ● Side-effects from radiotherapy ● Pruritus in pregnancy ● Pregnancy-induced hypertension sx	Modern Research ● Liver-protecting ● Anti-fatigue ● Anti-anoxia ● Sedative ● Analgesic ● Anti-inflammatory ● Immune-boost ● Case Study ● A 38 y-o female wants your help for her sore lower back and weak lower extremities for over 7 years. Other sx: fatigue, reduced endurance, tinnitus, dizziness, no patience. MD Dx: chronic nephritis due to hypertension. ● A red tongue with thin yellow coating; a wiry and slightly rapid pulse. ● Dx: ● Tx: ● Think & Review ● Please compare hu qian wan with da bu yin wan (both treat yin xu with empty fire). ● Compare Er Zhi Wan & Liu Wei Di Huang Wan (both are elegant, both treat Lr and K yin xu). ◊ Er Zhi Wan: small formula ● Compare yi guan jian with si ni san and xiao yao san & Zi Shui Qing Gan Yi (all three treat hypochondriac pain from Lr qi stagnation). ◊ xiao yao san: with SP Qi xu ◊ All: 4 gates for herbs

Formulas That Calm The Spirit [安神剂] [Calm & Sedate Spirit By Clearing Heat]	
• 2nd UB Line ☐ Spirit (Nourishes Yin) • Shen (spirit) disturbance – • Deficiency: palpitations with anxiety, forgetfulness, disorientation, and insomnia – treated with formulas that nourish and enrich blood and yin. • Excess: a feeling of being overstressed, manic behavior, bad temper, and agitation – treated with formulas that sedate and calm spirit. • However, shen disturbances are usually complex, and involve aspects of both xu and shi. A combination of nourishing and sedating is therefore utilized in most cases. • Many of these formulas contain metals or other heavy substances that are toxic, or which easily injure GI system. They are generally cooked for 30-60 minutes before adding the other ingredients. [Long Gu, Mu Li, Zhi Shi, Amber]	Formulas that anchor & settle the spirit [重镇安神] • Ascendant Ht yang with Ht fire upward blazing – spirit disturbances – severe anxiety or phobia, palpitations, insomnia restlessness, and uncontrolled emotions (manifested in bouts of laughter or crying). • Treated with formulas that sedate or tranquilize which contain fire-draining, phlegm-transforming, and orifice-opening ingredients. • More Excess

Zhu Sha An Shen Wan [Also Named As An Shen Wan] (Cinnabar Pill To Calm The Spirit) Source: Yi Xue Fa Ming	
• Actions: sedates HT, calms spirit, drains fire, nourishes Yin. • Preparation and administration: grind the herbs, form into pills that are covered with zhu sha. Take in 6-9g doses at bedtime. Decoction. • Indications: Vigorous HT fire injuring Blood & Yin [insomnia, dream-disturbed sleep, continuous palpitations, a sensation of irritability and heat in the chest, a desire to vomit without result [uprising fire] • T: red, P: thin, rapid Applications • HT fire disturbing shen with Yin Blood xu. Very effective in treating palpitations and anxiety during dreams. • Ventricular arrhythmia, PMS with palpitations and insomnia • Acute myocarditis • Burning sensation on the tongue, Spontaneous sweating	Patent • Modern Research • Case Study • A 45 y-o slender female asks for Tx for her insomnia with dream-disturbed sleep before and during menstruation. Other sx: red face and lips, hot sensation in the palms, shot temper, talkative, yelling/screaming at people without reason, restlessness. • A red tongue with yellow coating; rapid and slightly superficial pulse, pronounced at Cun positions. • Dx: • Tx: • Think & Review •

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Zhu Sha	15	Sweet, cool, poisonous	HT	Calms spirit, clears fire from Ht Substitutions: Ci Shi, Amber
Deputy	Huang Lian	18	Bitter, cold	HT, LV, ST, LI	Paired with chief, drains fire from Ht [Pair: Clear heat from HT]
Assistant	Dang Gui	7.5	Sweet, acrid, bitter, warm	HT, LV, SP	Tonifies Ht Blood
Envoy	Sheng Di Huang	7.5	Sweet, bitter, cold	HT, LV, KD	Nourishes Yin and cools Blood
	Zhi Gan Cao	16.5	Sweet, warm;	All 12	Protects St, harmonize the actions of other ingredients

Modifications			
+ shu di, mai dong, yu zhu	Dry mouth and throat from Yin xu		
+ gua lou, zhu ru, ban xia	Greasy tongue coating, chest stifling sensation		
+ zhi zi, lian zi	Red tongue, rapid pulse, hot sensation in the chest		
+ yuan zhi, fu shen, lian xin	Severe insomnia

formulas			
Bai Zi Yang Xin Wan [柏子养心丸]	Bai Zi Ren, Gou Qi Zi, Mai Dong, Xuan Shen, Dang Gui, Shu Di, Fu Shen, Shi Chang Pu, Gan Cao, Bai Mi	Disharmony between HT & KD: disorientation, severe continuous palpitations, dream-disturbed sleep, forgetfulness, night sweats	Connect HT & KD
Yang Xin Tang [养心汤]	Sheng Di, Shu Di, Dang Gui, Fu Ling, Ren Shen, Mai Dong, Suan Zao Ren, Bai Zi Ren, Wu Wei Zi, Zhi Gan Cao, Deng Xin Cao, Lian Zi [Guide Into HT]	Blood xu with some Qi xu (w/o Yin xu): weak constitution or debility, palpitations with anxiety, insomnia, forgetfulness	Nourish HT [HT Yin Xu]

Gan Mai Da Zao Tang [甘麦大枣汤] (Licorice, Wheat, And Jujube Decoction) Source: Jin Gui Yao Lue	
● Actions: nourishes HT, calms Spirit, harmonizes Middle jiao. ● Preparation and administration: decoction, bid-tid. ● Indications: Restless organ disorder (zang zao脏躁) [disorientation, frequent attacks of melancholy and crying spells, inability to control oneself, restless sleep (sometimes with night sweats), frequent bouts of yawning, abnormal behavior and speech ● T: red with sparse coating, P: thin, rapid ● Zang zao [restless organ] presents emotional/mental symptoms & signs caused by Fluids xu in Zang organs, or with empty heat. Etiology includes worry, over-thinking or anxiousness, as well as blood loss that consumes Fluids, and severe or chronic illness that injures Zang Fluids. Manifestations: depression, moodiness, weeping, absent-mindedness, restless sleep, frequent yawning & abnormal behavior [5 organs] ◊ Caused by deficiency of organ fluids □ too dry, not well nourished, can't function normally, consumes too much [heat] or can't make enough ◊ Worry, overthinking □ internally consumes fluid ◊ Diabetes, hyperthyroidism ● Pathogenesis: Lu stores po (corporeal soul), which dominates the experience of grief & related with weeping. When Lu yin is xu, po can't be stored adequately, causing sadness & frequent weeping spells. Ht stores shen which dominates joy. When xu Blood fails to nourish Ht, shen will be disturbed, resulting in sudden laughter after inappropriate crying. Lr controls Tendons & K controls yawning. Fluids xu or Blood loss may cause frequent yawning & stretched of the back & body. ◊ Will deficiency □ KD deficiency ◊ Mild yin deficiency, yin organs lost function □ not functioning normally Applications: Zang zao; Disorders diagnosed as HT and/or SP Xu, such as menopausal sx, PMS, postpartum palpitations and sweating. ● Depression, CFS, Seizures, Senile cutaneous pruritus ● Insomnia, Hysterical spasm ●	Patent ● gan mai da zao wan (calm spirit teapills) Modern Research ● Sedative ● Analgesic ● Estrogen-like effect ● Blood circulation improving effect ● Case Study ● A 26 y-o female suffers from crying and laughing spells without apparent reason. She cannot control herself in keeping talking or screaming sometimes. She has difficulty to fall asleep and wakes up easily. All these symptoms get worse with menstruations. MD Dx: schizophrenia. ● Think & Review ● What is the difference between formulas that anchor & settle shen and formulas that nourish Ht & calm shen? ● Gan mai da zao tang is used to treat zang zao. What is zang zao & what is its pathogenesis? ● Please compare gan mai da zao tang with xiao yao san. ●

Formula	Ingredients	Indication	
Jiao Tai Wan (Han Shi Yi Tong) 交泰丸	Huang lian [18] & Rou gui [3] Grind into powder, form into pills with honey. Decoction	Disharmony/Disconnection between HT and KD [This formula focuses on Upper & Lower, while the principal formula focuses on Middle]	Pair: Huang Lian & Rou Gui [Harmonize HT & KD]

Formulas That Open the Orifices [开窍剂]	
- Orifice Closed – loss of consciousness or coma due to either excess or deficiency. - Excess condition – known as a closed disorder (bi zheng 闭证) in which the pathogenic qi obstructs and veils the sensory orifices. - Deficiency condition – known as an abandoned disorder (tuo zheng 脱证). - Closed disorders can be differentiated into 2 types: Hot and Cold. - Hot-type closed disorder is caused by pathogenic heat/heat toxin sinking into the Pericardium, and is treated by clearing the heat to open the orifices. - Cold-type closed disorder is caused by pathogenic cold and constrained qi generating turbid phlegm, which veils the Heart orifices. It is treated by warming the cold and unblocking qi to open the orifices. - Ancient doctors used to always carry in their kit, like a first aid kit	Quick review: - Excess closed disorder (bi zheng) – accompanied by clenched jaw, clenched fists, rigid limbs; or delirious speech; and a forceful pulse. - Deficiency closed disorder (tuo zheng) – accompanied by excessive sweating, cold extremities, bowel and urinary incontinence, flaccidity, open mouth and eyes, and a frail or faint pulse. - Formulas in this chapter should only be used short-term for treating the acute symptoms. Long-term use the normal qi can be injured with their dispersing properties. - Formulas in this chapter are generally prepared in the form of pills, powders, or injectable concentrates for two reasons: 1. Available for emergencies when there is no time to prepare a decoction; 2. They cannot tolerate heat because their constituents are quite volatile (heat will diminish their potency).

Formulas That Clear Heat and Open the Orifices 凉开	
Hot-type closed disorders – high fever, irritability and restlessness, a red face, a yellow tongue coating, heavy breathing, delirious speech, spasms, convulsions, and a loss of consciousness. Often seen in the conditions such as heat/heat toxin sinks into Pericardium, wind-stroke, phlegm accumulation.	3 treasures

An Gong Niu Huang Wan [安宫牛黄丸 (13 Wei)] (Calm The Palace Pill With Cattle Gallstone) Source: Wen Bing Tiao Bian	
Actions: Clears Heat, Relieves Toxicity, Dislodges Phlegm, Opens Orifices, And Calms Spirit. - Preparations and administrations: grind the above into powder, form into pills with honey of 3g each, coated with gold leaf [very precious]. Taken 1 pill, bid-tid depending on severity. - Old days: Egg pill, sealed in wax, powdered with honey Indications: Heat/heat-toxin sinks into PC, or turbid-phlegm veils the sensory orifices [High fever, irritability and restlessness, delirious speech, impaired consciousness, a red or deep-red tongue, and a rapid pulse. Coma due to wind-stroke or childhood convulsion with a similar presentation. Tongue stiffness and frigid extremities.] - Treats Heat, high fever Applications: impaired consciousness due to heat and phlegm-heat. - Wind-stroke - High fever from acute encephalitis, meningitis, hepatitis, pneumonia... - Uremia, Hepatic coma, Dysentery - CVA [Cerebrovascular accident], Acute pancreatitis, Parkinson's disease - Lupus, Intractable headache, Schizophrenia	Patent - An gong niu huang wan - Niu huang qing xin wan Modern Research - Sedative - Anti-convulsion - Resuscitative - Brain cell protection - Anti-pyretic - Anti-inflammatory - Anti-hypertensive Case Study Think & Review - Required knowledge: Name, related formulas [don't need to know the ingredients]

Formulas That Warm and Open the Orifices 温开	
• Cold-type closed disorders (usually associated with wind-stroke, cold-stroke, or loss of consciousness due to the accumulation of phlegm) – sudden collapse, clenched jaw, loss of consciousness, ashen face, cold body, a white tongue coating, and a slow pulse. • Treated with formulas that contain aromatic substances that open Orifices, and acrid, warm substances that promote qi flow.	•

Su He Xiang Wan (Liquid StyraX Pill) Source: Tai Ping Hui Min He Ji Ju Fang 苏合香丸 (16 Wei) [Xiang = Aromatic, Includes Almost All Aromatics]	
• Actions: Warms Middle, Aromatically Opens Orifices, Promotes Qi Flow, Transforms Turbidity. • Grind the ingredients into powder, form into pills with honey. Take one 3g pill 1-2 times daily with warm water, or ren shen tea for xu patients. • Indications: Acute closed disorders due to excessive cold • 1. Sudden collapse, loss of consciousness, clenched jaw. • 2. Fullness, pain, a sensation of cold in the chest and abdomen that may signal the impending sudden loss of consciousness or coma. • 3. Abdominal pain and focal distention in the chest, an urge to vomit and defecate without doing either, which in severe cases can lead to sudden loss of consciousness or coma. • All of the above are accompanied by a pale complexion, purple lips, excessive mucus and saliva, cold extremities; a pale tongue with a slippery, greasy coating, and a deep, slippery pulse. • Very strong formula, rescue people Applications • 1. Wind-stroke from damp-cold or turbid phlegm (phlegm-stroke); • 2. Constrained qi leading to sudden collapse (qi-stroke), or crippling attack of damp-cold obstruction (cold-stroke); • 3. Fierce qi of epidemic sudden turmoil disorder (qi-stroke) [sudden nausea, vomiting, diarrhea, etc.] • Acute biliary colic, CVA, hysteria, Seizure disorders, Severe Bell's palsy • Encephalitis, Post-concussion syndrome, Angina pectoris	Patent • Su he xiang wan • Guan xin su he wan • Modern Research • Case Study • Think & Review • Remember name, actions, indications • Su he xiang wan's distinctive characteristic is its use of many aromatic substances that open Orifices, transform turbidity, and promote the qi flow. It is most commonly used in treating collapse such as wind-stroke, cold-stroke, qi-stroke, tan-stroke. It may also be used for the so-called 'dry' sudden turmoil disorder in which patients have a strong urge to vomit and defecate, but is unable to do either, end up loss of consciousness. Recently, its scope has been expanded to include painful obstruction of the chest due to qi stagnation, congealing due to cold, and turbid phlegm obstructing the collaterals. •

Formulas That Stabilize and Bind [固涩剂]

- Leakage and discharge (hua tuo滑脱, literally “slippage and separation”) are pathological conditions caused by a chronic xu of the body’s normal qi, characterized by chronic symptoms of leakage and loss of qi, blood, essence or fluids with no external pathogenic factors present, manifested with spontaneous sweating, night sweats, chronic coughing, signs of incontinence such as chronic diarrhea, urinary leakage, bedwetting(enuresis) or involuntary sperm loss(spermatorrhea), uterine bleeding, vaginal discharges(leukorrhea)
- Leaking the good stuff.
- Dumping the trash is okay, but you have to keep the good stuff
- Etiology – qi xu due to chronic diseases or congenital weakness [Qi Deficiency: can’t hold the good stuff]
 - ◊ WM osteoporosis/osteoarthritis: Calcium going away from bones □ Bones get loose, brittle (KD Xu □ Not enough energy & power to hold the calcium □ Bone spurs)
 - ◊ Diabetes: Glucose leaking out □ no energy, ADP doesn’t work. SP Qi too weak □ essence leaking out
 - ◊ Chronic nephritis: Protein leaking out (SP/KD Qi deficiency)
- Pathogenesis – qi is exhausted and loses its normal function of stabilizing and consolidating, thus causing the basic body substances to leak or spill out. This in turn leads additional pathologies of the xu type.
- Treatment principles and considerations – stabilize, consolidate and astringe to stop leakage and discharge. If EPI are involved in leakage/discharge conditions, they should be eliminated first, or at least treated simultaneously in severe cases. Failure to eliminate EPI first may cause them to be retained internally.

Locations	Symptoms	● The Formulas ● Definition – formulas that stabilize and binding use astringent herbs as chief ingredients. ● Actions and indications – to astringe, consolidate and stabilize in conditions of consumption and leakage of qi, blood, essence or fluids ● Because astringent formulas address mainly the symptoms, they should be combined with tonifying herbs according to the degree and type of consumption of qi, blood, yin, yang, essence or fluids. For the same reason, once the symptoms of leakage or discharge have been relieved, these formulas should be discontinued and the underlying xu should then be addressed with tonifying formulas. ● Astringent formulas should not be used where leakage or discharge is caused by EPI such as heat, fire and damp-heat. ●
Superficial	Spontaneous sweating	
Lungs	Chronic cough	
Intestines	Chronic diarrhea, watery dysentery	
Chong and Ren	Ben Lou (menorrhagia & metrorrhagia)	
Ren and Dai	Chronic leukorrhea	
Kidney and Bladder	Urinary incontinence, enuresis, spermatorrhea	

Formulas That Stabilize the Exterior & Stop Sweating 固表止汗

- Wei qi (protective/defensive) xu – susceptible to EPI leading to recurrent, externally-contracted disorders, profuse spontaneous sweating, aversion to wind, fatigue, pale complexion, sob, palpitations, a pale tongue with thin white coating, and a floating, weak or soggy pulse.

•

Yu Ping Feng San [玉屏风散] (Jade Windscreen Powder) Source: Dan Xi Xin Fa

- **Actions:** Tonifies Qi, Stabilizes Exterior And Stops Sweating.
- Preparation and administration: grind the herbs into powder, take in 6-9g twice a day as a draft with 3 pieces of sheng jiang. Or decoction with a proportionate reduction.

- **Indications:** The exterior xu with weak and unstable protective qi [aversion to drafts, spontaneous sweating, a shiny, pale complexion; or recurrent colds]
- T: pale with white coating, P: floating, deficient, or soft pulse.
- Contraindicated in night sweats due to Yin xu heat

Applications

- 1. Protective qi xu causing sweating;
- 2. Recurrent colds (prevent it from happening)
- Allergic rhinitis, Urticaria, Chronic renal failure/chronic nephritis
- Chronic URI, Chronic bronchitis in children
- Primary thrombocytopenic purpura
-

Patent

•

Modern Research

- Immunity dual-direction regulation
- Anti-viral/bacterial effect
- Anti-inflammatory
- Auto-immune inhibitory (by inhibiting the production of IgE and secretion of mastocytes)
- Anti-aging
-

Case Study

- A 38 y-o female asks for tx of her seasonal allergies in early spring, mainly manifesting as nasal congestion, runny nose with clear watery discharge, sneezing and itchy nose. She also feels tired and foggy mind; sweaty while sneezing.
- A pale tongue with white thin coating; a soggy pulse.
- She takes yin qiao tablets and feels a little better each time when she has an episode.
- Dx:
- Tx:
-

Think & Review

•

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Huang qi	60-180	Sweet, slt. Warm	SP, LU	Strengthens qi, stabilizes the exterior [close skin pore] Hypertension: Don't use huang qi too much
Deputy	Bai zhu	60	Bitter, sweet, warm	SP, ST	Tonifies Sp qi, strengthens the metal by cultivating the earth
Assistant	Fang feng	30	Acrid, sweet, slt. Warm	UB, LV, SP	With the chief, expels EPI without harming normal qi [Expel possible EPI/wind, open skin pores □ Balance with Huang Qi] Fang Feng = sweet □ moistening & dispersing at same time, mild Guide appropriate amount of good Qi to the surface

Comparison Of Yu Ping Feng San & Gui Zhi Tang

	Yu ping feng san	Gui zhi tang
Common sx	Spontaneous sweating, aversion to wind, floating pulse	
Different sx	Recurrent/chronic colds, profuse sweating, pale tongue [Prevent exterior condition]	Slt. sweating, chills, HA, low fever, normal tongue [Exterior condition]
Indications	Protective qi xu	External wind cold with exterior xu
Sweating path.	Sweating d/t protective qi xu	Sweating d/t xu exterior with ying/wei disharmony
Actions	Tonifies qi, consolidates exterior to stop sweating	Promotes sweating to dispel w-c, harmonizes ying/wei to stop sweating
Therapeutic emphasis	Consolidates the exterior	Dispels the pathogens

Modifications			
+ fu xiao mai, duan mu li, ma huang gen	Severe sweating		
+ gui zhi	Continuous sweating due to EPI		
+ bu zhong yi qi tang	Weak constitutional person catching cold frequently	Middle jiao Qi	

Mu Li San [牡蛎散] (Oyster Shell Powder) Source: Tai Ping Hui Min He Ji Ju Fang	
• Actions: inhibits sweating, stabilizes the exterior. • Preparation and administration: grind the first 3 ingredients into powder, add the 4th, and take 9g as a draft twice daily. Or decoction. • Indications: Spontaneous sweating due to unstable protective qi – persistent spontaneous sweating that worsens at night, palpitations, easily startled, sob, irritability, general debility, lethargy; a pale red tongue, and a thin, frail pulse. • Inappropriate for treating the profuse, oily sweat due to yin or yang xu. Applications • profuse sweating due to normal qi xu leading to yin fluids leakage from loss of external consolidation • Postpartum excessive sweating • Post-surgery excessive sweating • Excessive sweating from improper/excessive diaphoretic treatment [too much ma huang tang]	Patent • Modern Research • Case Study • Think & Review • What kind of syndromes do formulas that stabilize and binding address? • Yu ping feng san is an astringent formula. Why then is the diaphoretic herbs fang feng used in this formula? • Why are huang qi and fang feng used together in yu ping feng san? ◊ One dispersing, one consolidating ◊ Mutually enhance □ Reach balance •

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Mu Li	30	Astringent		Stop sweating, shrink pores
Deputy	Huang Qi	30			
Assistant	Ma Huang Gen	30			
Envoy	Fu Xiao Mai	30			

Comparison Of Mu Li San & Dang Gui Liu Huang Tang			
	Mu Li San	Dang Gui Liu Huang Tang Dang Gui + All The Huangs (Gui, Di Huangs, Qi, Qin, Lian, Bai)	
Common sx & actions	Excessive sweating [Strongly stop abnormal sweating] Stabilize the exterior, stop sweating		
Different sx & path.	Spontaneous sweating from unstable protective qi	Night sweating from xu yin fire	
Actions	Stabilizes the exterior, restraining sweating	Enriches yin, clears heat, stops sweating	
Therapeutic emphasis	Stops sweating	Enriches yin and clears heat to stop night sweating	

Formulas That Restrain Leakage from the Intestines 涩肠固脱	
- Spleen and kidney cold from xu – chronic, unremitting diarrhea/dysenteric disorders; or even incontinence of stool; or lethargy, weakness, abdominal pain that responds favorably to warmth or pressure, reduced appetite; a pale tongue with a white coating, and a deep, slow pulse. - Treated with formulas consist primarily of warm, tonifying substances with astringent properties and qi regulating/qi raising herbs.	These formulas are designed for long-term disorders and used for a relatively long term. They should not be used for acute, excessive disorders, or those with remnants of damp heat. If improperly prescribed, the pathogenic influences will linger in the body for a long time.

Si Shen Wan [四神丸] (Four-Miracle Pill) Source: Zheng Zhi Zhun Sheng	
Actions: warms and tonifies SP & KD, binds up intestines and stops diarrhea. - Preparation and administration: grind the herbs into powder and decoct with 240g of sheng jiang and 100 pieces of da zao. Form into pills. Take 9-12g at bedtime with salted water [guide into KD]. - Or decoction with a proportionate reduction in dosage. Indications: Daybreak (cock-crow/5am) diarrhea due to KD & SP Yang xu [diarrhea which occurs daily just at daybreak, (or with cold abdominal pain,) lack of interest in food and inability to digest what is eaten, lower back soreness with cold limbs, fatigue, lethargy] - pale tongue with a thin, white coating; a deep, slow, and forceless pulse. - More KD Yang Xu than SP Xu Applications - Kidney & Spleen Yang xu causing diarrhea, especially at daybreak. - Chronic diarrhea, Chronic ulcerative colitis, Chronic dysentery - Allergic colitis, IBS, Enuresis, Fatty diarrhea	Modern Research - Peristalsis inhibiting - Intestinal spasm relieving (similar to the effect of atropine against acetylcholine) - Immune-boosting - Sedative - Anti-bacterial Case Study - A 45 y-o female looks for tx for her chronic, intractable diarrhea for over 12 years. Her diarrhea happens between 5-6 am each morning with urgency and borborygmi and undigested food, usually followed by 3-4 more diarrheas after each meal or drink. Other sx: cold sensation in the abdomen, lower back and four limbs, poor appetite, low energy, mobile joint/muscle pain almost everyday. - A pale moist tongue with thin white coating; a deep and thin pulse. - She was diagnosed by MD with IBS and CFS 10 years ago. - Dx: - Tx: Think & Review - Which is the chief herb in si shen wan? How does it work? - Please compare si shen wan with li zhong wan.

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Bu Gu Zhi	120	Acrid, bitter, warm	KD, SP	Warms up mingmen fire, tonifies Sp & K [AKA Po Gu Zhi] (very aromatic, almost spicy)
Deputy	Rou Dou Kou	60	Acrid, warm	SP, LI	Warms Sp, astringes Intestines to stop diarrhea
Assistant	Wu Zhu Yu	30	Acrid, bitter, warm, poisonous	SP, LV, KD	Warms Sp & K, dispels cold
	Wu Wei Zi	60	Sour, warm	LU, KD	Astringes Intestines to stop diarrhea [Main flavor: sour □ astringent]
	Sheng Jiang		Acrid, hot	LU, ST	Warms & tonifies the middle jiao
	Da Zao		Sweet, neutral	SP, ST	Tonifies & harmonizes the middle jiao
					Pair: Cure chronic gastritis, many difficulties in middle jiao

Modifications			
+ ying su ke, he zi	Watery diarrhea	+ fu zi, rou gui	Sore and cold low back/extremities
+ huang qi, sheng ma, ren shen	Prolapsed rectum from middle qi sinking	+ mu xiang, xiao hui xiang	Abdominal distention
		+ li zhong wan	Interior cold with abdominal pain & nausea

Related Formula			
formulas	ingredients	actions	
Er shen wan 二神丸	Rou dou kou, bu gu zhi	Warms Sp & K, stops diarrhea	
Wu wei zi san 五味子散	Wu wei zi, wu zhu yu	Warms Middle, binds up Intestines	
Si shen wan 四神丸	Er shen wan + wu wei zi san	Warms & tonifies Sp & K, binds up Intestines, stops diarrhea	

Comparison of si shen wan & li zhong wan		
	Si shen wan	Li zhong wan
Common sx	Chronic diarrhea w/ undigested food, abd.pain relieved by heat & pressure, poor appetite	
Different sx	Early-morning diarrhea	Diarrhea or loose stool
Major Zang involved	Kidney	Spleen
Common actions	Warm & tonify K and Sp yang, stop diarrhea	
Different actions	Astringes Intestines	Dispels cold
Indications	Chronic diarrhea from Sp & K yang xu	
Thera. emphasis	Stabilizes and astringes	Warms the Interior

Formulas That Stabilize the Chong, Ren & Dai Meridians & Stop Uterine Bleeding or Vaginal Discharge 固崩止帶

- Beng Lou – menorrhagia, metrorrhagia
 - ◊ Sudden, acute, excessive, severe
 - ◊ Lou: Chronic
- Dai Xia – chronic leucorrhea
 - ◊ Excessive, abnormal vaginal discharge
-

- Formulas in this section are indicated for unremitting uterine bleeding and vaginal discharge, either Beng or Lou. Other sx include sob, palpitations, weakness & soreness of the lower back, a pale complexion; a pale tongue, and a deficient, thin, and frail pulse.
- Formulas in this section consist primarily of Qi/Yin-tonifying and astringent herbs.

Gu Jing Wan [固经丸] (Stabilize The Menses Pill) Source: Yi Xue Ru Men

- **Actions:** nourishes Yin, clears xu heat, stabilize Chong/Ren, stops bleeding.
- Preparation & administration: grind the herbs into powder & form into pills with wine. Take 9g bid with warm water. May also be prepared as a decoction with a proportionate reduction in the dosage of the herbs.
- Jing: Menstruation or meridians
- **Indications:** LV fire injuring the Chong & Ren causing uterine bleeding (alternately trickling and flooding), continuous menstruation, blood is thick, sticky, clotted, red or purple; Or heat feelings in chest, irritability, lower abdominal pain, dark urine
- T: red with yellow coating, P: rapid, wiry
- Chong & Ren Damage □ Excessive bleeding

Applications

- Liver stagnant heat disturbs the Chong & Ren causing uterine bleeding
- Functional uterine bleeding [WM doctors don't know why]
- Early menstruation
- Menopausal heavy/continuous bleeding
- Chronic pelvic inflammatory disease

Patent

-

Modern Research

-

Case Study

- A 21 y-o female comes in looking for the treatment of uterine bleeding secondary to an abortion 58 days ago. The blood flow is up & down with dark red thick blood and some clots. Other sx: LBP, weak legs, feverish sensation, thirst, short temper. She also tells you that she has had another abortion last year and had the similar sufferings but was shorter period of time.
- Tongue: red with thin yellow coating
- Pulse: rapid and tight.
- Dx:
- Tx:

Think & Review

- What is the function of *chun gen pi* in Gu Jing Tang?
- Please make a comparative table of the formulas in this section.

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Gui Ban	30	Salty, sweet, neutral	KD, LV	Nourishes Yin/blood, tonifies KD, clears heat, subdues Yang, stops bleeding Gui Ban enters Ren meridian
	Bai Shao	30	Bitter, sour, cool	LV, SP	Enriches Yin/blood, Enters Chong meridian
Deputy	Huang Qin	30	Bitter, cold;	HT, LU, GB, LI	Clears heat from upper jiao
Assistant	Huang Bai	9	Bitter, cold	KD, UB	Clears heat from lower jiao
Envoy	Chun Gen Pi	21	Bitter, astringent, cold	LI, LV	Clears heat, cools blood, dries damp, astringes □ Stop uterine bleeding Special for gynecology
	Xiang Fu	7.5	Acrid, slt bitter, sweet, slt warm	LV, SJ	Spreads Lr qi, releases constraint [Qi Mover]

Modifications			
+ duan long gu, duan mu li, wu ze gu, qian cao	Severe cases with heavy/continuous bleeding		
- Huang bai + nu zhen zi, han lian cao	Cases with less heat & severe yin xu	Er Chen Wan (yin tonic)	

Gu Chong Tang [固冲汤] (Stabilize Gushing Decoction) Source: Yi Xue Zhong Zhong Can Xi Lu

- **Actions:** stabilizes the Chong Mai to stop uterine bleeding, strengthens Sp, augments qi, and nourishes liver.
- Preparation & administration: the calcined substances are cooked first for 1 hour or so, wu bei zi is ground into a powder, divided into 2 portions, and taken with the strained decoction.
- Damage to Chong Mai [have LV symptoms] causes heavy bleeding
- LV & Chong Intersection: REN 4
- Treat symptoms & root at same time
- Emergency use during menses with heavy bleeding, acute bleeding

Think & Review

- Chong Pulse: peak between Cun & Guan □ Means Chong damage

	Qian Cao Gen	9			Stop bleeding

Wan Dai Tang [完带汤] (End Discharge Decoction) Source: Fu Qing Zhu Nu Ke	
● Actions: stabilizes Dai to stop vaginal discharge, strengthens Sp, soothes Lr and transforms damp. ● Preparation & administration: decoction. 2-3 times the dosage of dang shen is usually substituted for ren shen ● ● Indications: Dai Mai & Sp xu with damp and qi stagnation causing leucorrhea – profuse vaginal discharge that is white or slightly yellow in color, thin in consistency, not particularly foul-smelling, and usually continuous; fatigue, lethargy, sallow complexion, loose stools, poor appetite; A pale tongue with a white coating; a soggy/weak/frail or moderate pulse. ● Cang Zhu & Bai Zhu together: Enter Dai Mai [Fix Dai Xia] Applications ● Loose Dai /Liver constraint and Sp xu causing damp to descend – thin, profuse vaginal discharge ● Chronic vaginitis, Chronic gastritis, Chronic nephritis with edema [All can cause damp] ● Diarrhea or edema during menstruation or pregnancy ● Chronic colitis	Patent ● Modern Research ● Case Study ● Think & Review ●

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Chao Bai Zhu	30	Bitter, sweet, warm; Sp,St		Boosts Sp, dries damp [Si Jun Zi Tang □ Tonify SP]
	Chao Shan Yao	30	Sweet, neutral; Sp, Lu, K		boosts Sp,K,stops discharg
	Ren Shen	6	Sweet,slt bitter,slt warm;Sp		Boosts Sp/qi
Deputy	Cang Zhu	9	Acrid, bitter, warm, aromatic		Dries damp,stops discharge
	Chen Pi	1.5	Acrid,bitter,warm,aromatic,		Moves qi, dries damp
	Jiu Chao Che Qian Zi	9	Sweet, bland, cold; K,UB,Lr		Promotes uri, drains damp
Assistant	Chai Hu	1.8	Bitter, slt acrid, cool; Lr, GB		Moves Lr qi, subdues Lr
	Jiu Chao Bai Shao	15	Bitter, sour, cool; Lr, Sp		Soothes Lr
	Jie Sui Tan	1.5	acrid,aromatic,slt warm;lu,lr		Dries/disperses damp (Jing Jie flower)
	Gan Cao	3	Sweet,neutral		Boosts MJ, harmonizes the formula

Comparison of 3 formulas that treat abnormal vaginal discharge			
Formula name	Actions	Indications	
Wan dai tang [完带汤]	Boosts Sp, binds up Dai [Er Zhu], tonifies qi; Also moves Lr qi	Sp xu/Lr qi stagnation – abnormal vaginal discharge	Stronger tonify SP
Qing dai tang [清带汤]	Boosts Sp, binds up Dai; Also stops bleeding	Sp xu – profuse, thin, clear or red, and continuous vaginal discharge	Not stronger in either way
Yi huang tang [易黄汤]	Boosts Sp, binds up Dai; Also clears damp-heat	Sp xu with damp-heat – yellowish and fetid (bad smell)	Stronger clear heat

Related Formula			
Name of Formulas	Ingredients	Actions/indications	
Qing dai tang [清带汤] (yi xue zhong zhong can xi lu)	Shan yao, (long gu, mu li) □ Pair: astringent, help close the door hai piao xiao (astringent), qian cao gen	Boosts Sp, stops vaginal discharge. For Sp xu with profuse, thin, clear/red, continuous discharge	Not as comprehensive as Wan Dai Tang
Yi huang tang [易黄汤] (fu qing zhu nu ke)	Chao shan yao, chao qian shi, huang bai, che qian zi, bai guo (ginkgo fruit)	Boosts Sp, dries damp, clears heat, stops vaginal discharge. For Sp xu with damp heat – long-term, unremitting discharge that is yellowish, viscous and fishy-smelling, heavy feeling, soreness in LB & lower limbs...	Damp Heat

Formulas That Stabilize the Kidney & Stop Urogenital Leakage 涩精止遗

- K xu that has lost its ability to store causing instability in the lower jiao and loose gate of essence – spermatorrhea, enuresis/urinary incontinence, restless fetus or miscarriage; may be accompanied by low back soreness/weakness, tinnitus, forgetfulness; a pale tongue with white coating, a thin, frail and weak pulse.

•

Jin Suo Gu Jing Wan [金锁固精丸] (Metal Lock Pills To Stabilize The Essence) Source: Yi Fang Ji Jie

- Actions: stabilizes K and binds up Semen.
- Preparation & administration: grind ingredients into powder, form into pills. Take in 9g doses on an empty stomach with salted water. Or decoction with a proportionate reduction in dosage.
- **Indications:** Kidney xu causing spermatorrhea – chronic seminal emissions, impotence, fatigue, and weakness, sore and weak limbs, lower back pain, tinnitus; a pale tongue with white coating, and a thin, frail pulse.
- Can't maintain erection or ejaculate □ very deficient
- Strong gold lock

Applications

- spontaneous emission (spermatorrhea which occurs without dreams from instability of essence gate due to Kidney xu.
- Leukorrhea
- Enuresis (Bedwetting) □ KD not strong enough
 - ◊ Dreams about bathroom □ HT
- Chronic diarrhea
- Diabetes
- Male infertility
- Myasthenia gravis

Formulas That Regulate the Qi [理气剂]	
- Inadequate movement of qi – Qi dysfunction conditions are excess (shi) types characterized by pain and distension in the case of qi stagnation or by sx of rising energy in the case of qi rebellion, such as nausea and coughing - Qi stagnation [Liver qi: hypochondriac/breast distension and pain, irregular menstrual cycles, dysmenorrhea, hernial pain. Sp/St qi: abdominal distension, stuffiness and pain, relieved after passing gas, poor appetite, irregular BM] - Qi rebellion – Lu qi: coughing, wheezing, dyspnea. St qi: belching, hiccoughs, nausea, vomiting	- Treated by formulas that either promoting the movement of qi/ unblocking the stagnation of qi, or directing the rebellious/abnormal flow of qi downward - The ingredients of these formulas are mostly bitter or acrid and warming or drying, and can easily injure the fluids and scatter the qi when improperly used. These formulas should therefore be discontinued as soon as the condition improves. Also patients presenting qi, blood, Yin or fluids xu, including pregnant women, should use qi-regulating formulas very cautiously, and with the appropriate addition of qi, blood or Yin/fluids tonics.

	Qi quality		Qi movement	
Pathology	Qi xu	Qi sinking	Qi stagnation	Qi rebellion
Symptoms	Fatigue, weariness	Organ prolapse	Distension, pain	Coughing, belching, nausea, vomiting
Organs involved	SP, ST, LU, HT	SP, ST	LR, SP, ST	LU, ST, LR
Tx principle	Tonify the qi		Regulate the qi	

Formulas That Promote the Movement of Qi行气	
- Qi stagnation – Pain, distension - In the chest: chest/back pain, coughing, sob	- In the Sp/St: epigastric and abdominal pain/distension, belching, acid regurgitation, and irregular BMs - In the Lr: pain/distension in the chest and hypochondria, or hernial disorders, irregular menstruation, or dysmenorrhea

Yue Ju Wan [越鞠丸(莠术丸)] (Escape Restraint Pill) Source: Dan Xi Xin Fa	
- Actions: promotes qi movement and releases constraint. Reduces stagnation of qi, blood, phlegm, damp, fire & food. - Preparation & administration: grind equal amounts of the ingredients into a fine powder & form into pills with water. Take 6-9g with warm water. May also be prepared as a decoction with 6-12g of each herb. Adjust the administration based on which element is more stagnant. - Indications: 6 Stagnations: Qi, Blood, Phlegm, Damp, Fire & Food fullness and focal distension and a stifling sensation in the chest and abdomen, fixed pain in the hypochondria, belching, distending breast pain, vomiting, acid regurgitation, nausea/vomiting, mild coughing with copious sputum, reduced appetite, and indigestion No special herb to treat phlegm, but is heat & damp together ☐ treat damp & heat, phlegm gets treated automatically - T: dusky, purple or red tongue with white or yellow greasy (Qi stagnation, damp) coating - P: wiry, slippery, possible rapid pulse. Applications - Conditions presenting 6-yu六郁, with primary qi-yu气郁, characterized by fullness and focal distension in epigastrium and chest, poor appetite, nausea/reflux, greasy tongue coating. - Peptic ulcers, Chronic gastritis, Cholecystitis/cholelithiasis, - Intercostal neuralgia, Infectious hepatitis, Migraines, dysmenorrhea	Case Study - A 42 y-o female looks a herbal approach for her premenstrual HA that starts 2-3 day before menstruation, gets worse each day until formal bleeding, then gets better, gone with the end of mense. HA is often accompanied with dizziness, nausea, anorexia, short temper, abdominal distension/pain, lower back pain/body aches. Other sx: irregular menses with dark-red clots in blood. - Tongue: red tongue with dark dots on the edges. Slightly yellow thin coating. - Pulse: wiry - Dx: - Tr.Pr.: - Formula: - Herbs: Think & Review - Please compare yue ju wan with xiao yao san & si ni san in terms of their indications, functions, sx and ingredients. - One of the indications for yue ju wan is to resolve phlegm. Why does this formula not contain any herbs that resolve phlegm?

Rank	Herb	Amount	Properties	Channels	Notes

Formulas That Direct Rebellious Qi Downward 降气	
• Rebellious Qi: Lung & St. – coughing, wheezing, vomiting, belching • Differentiation should be focused on excess or deficiency, heat or cold, or a combination. • Formulas that for rebellious lung qi often include zi su zi, xing ren, chen xiang, qian hu...; formulas that for rebellious St qi often include ban xia, chen pi, ding xiang, xuan fu hua, dai zhe shi....	•

Su Zi Jiang Qi Tang [苏子降气汤] (Perilla Fruit Decoction For Directing Qi Downward) Source: Tai Ping Hui Min He Ji Ju Fang	
• Actions: directs rebellious qi downward, arrests wheezing, stops coughing, warms & resolves phlegm-cold. • Preparation & administration: decoct with 2 slices of sheng jiang, 3 pieces of da zao & 5 leaves of su ye. In one version, chen pi 6-9g is added. In another version, chen xiang is added & rou gui excluded. • Zi Su Ye is light, aromatic ☐ floats up ☐ Don't use for rebellious Qi • Zi Su Zi is more anchoring, grounding ☐ Better for rebellious Qi • Zi Su Gen: Stem ☐ Between leaf & seeds ☐ More for Qi blocked in between ☐ Open up air passages [Like Gui Zhi, which opens meridians] • Indications: Excess above & deficiency below [上实下虚] [LU phlegm-damp & KD Yang xu with LU Qi rebellion causing wheezing or coughing with watery, copious sputum, a stifling sensation in the chest & diaphragm, SOB marked by relatively labored inhalation & smooth exhalation. Or may be pain & weakness of the lower back and legs, edema of the extremities, and/or fatigue] • T: white coating that is either slippery or greasy. • Applications • Wheezing & coughing due to excess above with xu below [This differentiation is key] copious watery clear sputum, oppressive feeling in the chest, white greasy or white slippery coating. • Chronic bronchitis, Bronchial asthma, Emphysema • Rheumatic heart disease (+ chen xiang, ren shen)	Patent • Modern Research • Case Study • A 65 y-o male suffers from wheezing & SOB for over 20 years. Often worse with catching a cold, and accompanied with coughing up a big amount of clear foamy mucus, a stifling feeling in the chest. He usually has cold extremities, especially at the lower ones. Other sx: urinary difficulty, decreased libido. • A flabby dusky tongue with moist white coating. A slightly tight and full pulse. • Oh, he also told you that he was diagnosed as asthma 18 years ago. • Think & Review • What is the function of dang gui & rou gui in su zi jiang qi tang? • What are the indications for us to use su zi jiang qi tang? • Please find the similarity & difference between ◊ su zi jiang qi tang: Excess above & deficiency below ◊ xiao qing long tang: Exterior wind cold invasion causing lung Qi rebelling with damp accumulation [Exterior condition] •

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Zi Su Zi [Seeds]	9-12			Descends lung qi, stops wheezing, resolves phlegm to stop cough, warms the Middle;
Deputy	Ban Xia	9			Aid the chief in resolving phlegm to stop coughing & descending lung qi to stop wheezing [Stagnant Qi clumped together]
	Hou Po	6			
	Qian Hu	6			
Assistant	Dang Gui	6			Nourishes & invigorates Bl, assists qi circulation to treat cough & consolidate K qi, prevent injury to yin & qi from acrid, dry... Anchor lower jiao, good for yin/blood deficiency causing constipation Also postpartum constipation [blood deficiency] Don't take Dang Gui with breast/ovarian cancer
	Rou Gui	1.5-3			Warms K, dispels cold, promotes the transformative function of qi to circulate water [Consolidate lower jiao]
Envoy	Zhi Gan Cao	6			
	Sheng Jiang, Zi Su Ye				Disperse cold to facilitate lung qi
	Zhi Gan Cao, Da Zao				Harmonize and tonify the Middle [Protect middle jiao]

Modifications			
+ xing ren, ma huang	Severe wheezing with exterior condition		
+ dang shen, wu wei zi, huang qi	With qi xu		
+ fu ling, che qian zi	Urinary difficulty		

Ding Chuan Tang [定喘汤] (Arrest Wheezing Decoction) Source: She Sheng Zhong Miao Fang	
• Actions: disseminates & redirects LU qi, arrests wheezing, clears heat, and transforms phlegm, releases wind-cold. • Preparation & administration: Peel bai guo, crush and stir-fry; then decoct with other ingredients. • Bai Guo: Yin Xin [apricot shell] • Indications: Wind-cold constraining exterior & phlegm-heat smoldering in interior [coughing & wheezing with copious, thick, and yellow sputum, labored breathing. Or simultaneous mild fever and chills] • T: greasy, yellow coating; P: slippery, rapid • Applications • Wheezing/coughing due to Lu phlegm-heat & external wind-cold with Lu qi rebellion (internal heat with external cold) • Asthma/bronchitis/URI/pulmonary heart disease presenting with copious thick yellow sputum, a greasy yellow tongue coating and a rapid slippery pulse, with/without the exterior condition	Case Study • A 3 y-o boy comes in with her mom looks for treatment for his asthma. He has had wheezing and coughing with a lot of thick yellow sputum for 5 days secondary to a swimming lesson in a cold day. He saw the GP and was given antibiotics with little effect. Other sx: difficulty in breathing, runny nose with yellow mucus, mild sore throat. • A red tipped tongue with moist yellow coating. The dark red index finger veins appear at the Qi Region. • You also hear a rasping rattle while he breathing in and out. Think & Review • Why are bai guo and ma huang the chief herbs in ding chuan tang? • Please compare su zi jiang qi tang with ding chuan tang. • Please compare ding chuan tang with ma xing shi gan tang

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Bai Guo	9	Toxic, especially shell		Transforms phlegm, astringes Lu qi, stops coughing & wheezing, moderates ma huang's dispersing quality
Deputy	Ma Huang	9			Unblocks & redirects LU qi to arrest wheezing, releases wind-cold. Complementary of 2 chiefs in dispersing & binding greatly enhances the ability to stop wheezing/coughing
Assistant	Zi Su Zi	6			Transforms phlegm to stop coughing, descends Lu qi to stop wheezing
Envoy	Xing Ren	9			
	Ban Xia	9			
	Kuan Dong Hua	9			
	Sang Bai Pi	9			Drain LU heat, dry damp, stops coughing/wheezing
	Huang Qin	6			Good to clear heat (inflammation)
	Gan Cao	3			Harmonizes the formula, protect middle jiao

Modifications			
- Ma huang, or use zhi ma huang	No exterior wind-cold		
+ gua lou pi, dan nan xing, bai jie zi	Sticky, thick & yellow sputum that is hard to expectorate		
+ shi gao, yu xing cao	Severe Lu heat		

	Su zi jiang qi tang	Ding chuan tang
Co. functions	Descend rebellious Lu qi, resolve phlegm, stop wheezing/ coughing	
pathogens	Phlegm-cold	Phlegm-heat with w-c
indications	Lu qi rebellion d/t phlegm-cold & K yang xu	Lu qi rebellion d/t phlegm-heat & exterior w-c
differentiation	Shi above and xu below	Internal heat with external w-c
sx	Copious watery clear sputum, stifling feeling in the chest	Copious thick yellow sputum, possible chills & fever
Zang-fu	K, Lu, Sp	Lu, Sp

	Ding chuan tang	Ma xing shi gan tang
Co. functions & sx	Descend & circulate Lu qi, clear Lu heat, release w-c; coughing/ wheezing, labored breathing, mild chills, fever, a red tongue yellow coating, a rapid, slippery pulse	
Chief paired herbs	Bai guo, ma huang	Shi gao, ma huang [Treats wind cold]
Functions	Descends & circulates Lu qi to stop wheezing/coughing	Clears heat from Lu to stop wheezing/coughing
Indications	Lu qi rebellion d/t ph-h & w-c invasion	Lu qi rebellion d/t EPI changes into heat & accumulates in Lu
Sx	Copious thick yellow sputum, possible mild fever & chills, greasy tongue coating	Persistent high fever, thirst, possible aversion to w or c, dry tongue with thin coating
Tx emphasis	Resolves Lu phlegm	Clears Lu heat

Xuan Fu Dai Zhe Tang [旋复代赭汤] (Inula & Hematite Decoction) Source: Shang Han Lun	
• Actions: Directs rebellious qi downward, transforms phlegm, augments qi, and harmonizes St • Preparation & administration: 2-3 times the dosage of dang shen is usually used for ren shen. Decoction. • Indications: Phlegm-turbidity obstructing the interior with St qi xu [Unremitting belching, hiccough, regurgitation, nausea or vomiting, hard epigastric focal distension] • T: white slippery tongue coating, P: empty, wiry/slippery Applications • Phlegm-turbidity obstruction with St xu causing St qi rebellion presenting with hard epigastric focal distension and unremitting belching & hiccough • Meniere's disease, Morning sickness, Hypertension • Incomplete pyloric obstruction	Patent • Modern Research • Case Study • Think & Review •

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Xuan Fu Hua	9			decoct in a coffee bag, Descends qi, resolves phlegm, stops vomiting & hiccoughs Most flowers rise up except this one
	Dai Zhe Shi	9			decoct first, Strongly Descends St qi to stop vomiting Not often carried in dispensary [Red rock]
Deputy	Ban Xia	9			Dries damp, resolves phlegm, descends St qi to stop vomiting Paired with Sheng Jiang to bring rebellious Qi down
	Sheng Jiang	6			Warms St, dispels cold, regulates St qi to stop nausea, vomit
Assistant	Ren Shen	6			Tonifies & protects the Middle, boosts qi

Formulas That Invigorate Blood [理血剂]

- | | |
|---|---|
| <ul style="list-style-type: none"> ● Blood stagnation sx – indicates the accumulation of blood caused by obstruction in its circulation within Meridians & Zang-Fu; Or refers to blood that has extravasated to accumulate within the body. They are often characterized by pain or palpable masses. | <ul style="list-style-type: none"> ● Blood stasis – pain that is sharp & fixed, and is not relieved by warmth/cold, is worse with pressure & at night. Other sx: cyanosis, dark-red/purple menstrual bleeding with clots, a dark complexion, scaly & dry skin, tumors. A purple/darkish tongue, possibly with purple/blue spots; a choppy, deep, or thin, or tight/wiry pulse. |
|---|---|

Location	Symptoms
Heart	Oppressive/stifling sensation in chest, anginal pain, blue-purplish lips
Lung	Chest pain with hemoptysis, cough with dyspnea & hemoptysis
Liver	Hypochondriac pain, palpable abdominal masses
Intestines	Hematemesis, blood in stool, palpable abdominal masses
Uterus	Dysmenorrhea, amenorrhea, irregular menstruation, dark-red menstrual flow with clots
Body surface	Purplish/blue-greenish skin discoloration, subcutaneous hematoma

Etiology & Pathogenesis	Formulation Principles
● Exogenous: 6 pathogenic factors, especially cold/heat, trauma ● Endogenous: qi xu, qi stagnation, hemorrhage, childbirth ● Qi stagnation can cause blood stagnation/stasis, blood stagnation/stasis in turn obstruct qi flow resulting in phlegm/damp accumulation, and making blood stagnation/stasis worse as well. Treatment Principles ● Invigorate Blood flow, reduce Blood stasis, move qi – Identify the cause, location & duration of Blood stagnation; In acute conditions, the symptom should be addressed, whereas in chronic one both the symptom & root should be addressed. ● Formulas that invigorate Blood & dispel stasis tend to consume Blood & Qi. They should therefore be used cautiously in xu conditions, individuals of a weak constitution, & the elderly. ● These formulas are contraindicated in pregnancy & in women with menorrhagia; also contraindicated in patients on blood-thinning meds such as Coumadin, or with hemorrhagic disorders such as hemophilia and allergic purpura.	Formulation Principles ● Choose Blood-invigorating herbs as chief ingredients ● For chronic Blood stasis, add herbs that unblock Meridians, such as di long ● For Blood stasis with heat, add herbs that cool Blood [mu dan pi, dan shen] ● For Blood stasis with cold, add warming herbs such as gui zhi & wu zhu yu ● Add qi-moving herbs to the formula as qi & blood are closely related ● Add blood-tonifying herbs to the formula because [Move & tonify] ◇ 1. blood-moving herbs that warm & disperse tend to consume Blood; ◇ 2. xu Blood itself is a common cause of Blood stagnation ● Add Qi tonics to the formula because: ◇ 1. qi xu is a source of blood stagnation; ◇ 2. blood-moving herbs that warm & disperse tend to consume qi Formula classification [3 sections] ● Invigorate Blood & reduce Blood stasis ● Warm Meridians & reduce Blood stasis ● Reduce Blood stasis from tissue trauma ●

Formulas That Invigorate Blood & Reduce Blood Stasis 活血祛瘀	
Formulas in this section are used for fixed, deep, & usually severe pain due to blood stasis in various parts of the body including the chest, epigastrium, flanks, & abdomen. Other sx: palpable, immobile masses, abscesses & ulcers, loss of hair or brittle hair, purple lips, dark discoloration of the sclera, purple spots on the tongue or a darkish tongue, and a choppy, submerged, tight, or wiry pulse.	- This treatment principle widely used in all chronic deficiency conditions & seniors - All chronic conditions will cause blood stagnation - Diabetes (chronic) ☐ cause blood stasis ☐ KD problems, neuropathy, stasis leading to amputations

Tao He Cheng Qi Tang [桃核承气汤] (Peach Pit Decoction To Order Qi) Source: Shang Han Lun	
Actions: breaks up blood stasis, drains heat. Preparation & administration: Decoction, add mang xiao to strained decoction. Jiu zhi da huang [prepared with alcohol] is often used to accentuate Blood-invigorating action of the formula Da Huang & Mang Xiao: Image of Cheng Qi Tang Indications: Blood buildup [clumping] (xu xue 蓄血) in lower jiao with heat accumulation [acute lower abdominal pain & spasm, constipation, night fever, irritability, restlessness, thirst, normal urination; amenorrhea, dysmenorrhea; in severe cases delirium or mania T: purple with yellow coating; P: deep, forceful, or choppy Applications - Used for any conditions caused by Blood stasis with heat, regardless of whether found in the upper or lower jiao - Acute pancreatitis, Endometritis/endometriosis, Retained placenta - Toothaches with constipation, Chronic prostatitis, Acute testitis	Patent Modern Research Case Study Think & Review

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Tao Ren	12			[Tao He = Tao Ren] Moves blood. Breaks up and dispels blood stasis Chief Pair: Both move blood
	Da Huang	12			Clears heat, purges Intestines, attacks stasis & guides it out Not cooked: move bowel stronger Cooked: Move blood better ☐ Usually both function Opens lower jiao at same time
Deputy	Gui Zhi	6			Unblocks Meridians, dispels retained blood stasis from lower jiao
Assistant	Mang Xiao	6			Softens accumulation, clears heat, purges Intestines
Envoy	Zhi Gan Cao	6			Harmonizes formula, protects Middle

Modifications			
+ chi shao, hong hua, su mu	Fixed & severe pain from trauma	+ dang gui, hong hua, shui zhi, meng chong	Amenorrhea
+ sheng di, dan pi, zhi zi, niu xi	Gum bleeding, toothache, HA	+ xiang fu, wu yao, qing pi, mu xiang	With qi stagnation

	Tao he cheng qi tang	Tiao wei cheng qi tang
Common ingred.	Da huang, mang xiao, zhi gan cao	
Different ingred.	Tao ren, gui zhi	
Common sx	Constipation, abd.pain that is worse with pressure, fever, thirst, irritability, restlessness, red tongue, slippery, rapid, forceful, deep pulse	
Different sx	Fever at night, dysmenorrhea/amenorrhea, purple tongue, rough pulse	Fever in the afternoon
Indications	Blood stagnation with heat accumulation in Lower Jiao	Full heat in the Yangming organ

Xue Fu Zhu Yu Tang [血府逐瘀汤] (Drive Out Stasis In The Mansion Of Blood Decoction) Source: Yi Lin Gai Cuo	
- Actions: invigorates Blood, reduces Blood stasis, activates Qi, relieves pain. - Preparation & administration: Decoction • Indications: Blood stagnation in the chest [pain in the chest & hypochondria, chronic, stubborn HA with a fixed, piercing nature, chronic & incessant hiccup, a choking sensation when drinking, dry heaves, depression or low spirits accompanied by a sensation of warmth in the chest, palpitations, insomnia, restless sleep, irritability, extreme mood swings, evening tidal fever] • T: dark-red, dark spots on the sides of the tongue, dark or purplish lips, complexion, or sclera, P: choppy or wiry, tight • Applications - Blood stagnation in chest with constrained LV Qi: commonly used in treating chest pain d/t blood stasis accompanied by a dark-red tongue & a choppy or wiry, tight pulse - Blood stasis in children: usually when fever, pain, & difficulty in sleeping develop after trauma. - Embolism, CHD, Hypertension/hyperlipemia - Intercostal neuralgia, Migraine HA, Postconcussion syndrome - Primary dysmenorrhea, Menopausal syndrome, Chest Bi, Chronic hepatitis - Psychosis, Acute optic neuritis, Angina pectoris	Case Study - A 59 y-o male looks for treatment of occasional chest pain for over 9 months. He has smoked 1 pack per day for over 36 years. Other sx: HA & dizziness at times, cough with brownish thick sputum each morning, hair loss, reduced memory, stifling sensation in the chest while overwork. Medical Hx: high cholesterol, very high LDL. - A dusky tongue with blue spots on the sides; a wiry pulse. - Dx: - Tx: • Think & Review - Why are qi-moving herbs often added to formulas that invigorate Blood? - What is the function of Gui Zhi in Tao he cheng qi tang? NCCAOM - ZZJ Formula, likes to use Gui Zhi ☐ Release remaining EPI (Tai Yang Syndrome) ☐ Conditions caused by wind cold) - Warm & acrid ☐ Break up blood stasis - Promote urination ☐ Open up lower jiao, urinary tract (Qi Hua fxn) [Release stagnation] - Warm: help control cold nature of Da Huang & Mang Xiao - What formulas are included in Xue fu zhu yu tang? Why is Sheng di used here instead of Shu di? Why is Chi shao used here instead of Bai shao? - Bai Shao: Yin herb, Blood tonic ☐ Nourish blood, enter Chong, soften LV (good for LV Qi Stagnation) ☐ Treat spasmodic muscle pain - Chi Shao: Move blood, much more moving than bai shao, cools blood, good for blood inflammation (Hepatitis B/C), HIV •

Rank	Herb	Amount	Properties	Channels	Notes

Formulas That Warm Meridians & Reduce Blood stagnation 温经化瘀	
- Blood stagnation & stasis caused by cold – delayed menstruation with dark-colored blood and clots, lower abdominal cold and pain that intensifies with coldness and responds favorably to warmth; a dusky tongue, and a slow, choppy pulse. - Formulas in this section focus on warming Meridians to move Blood, dispelling Blood stasis, unblocking the Blood vessels.	

Gui Zhi Fu Ling Wan [桂枝茯苓丸] (Cinnamon Twig & Poria Pill) Source: Jin Gui Yao Lue	
- Actions: moves Blood, reduces Blood stasis & fixed abdominal masses - Preparation & administration: grind equal amounts of the herbs into powder, form into pills the size of rabbit droppings with honey, take 3 times daily before meals. Or decoction with the dosage specified above. - Safe to use during pregnancy - Pill form instead of decoction □ More mild, slower - Small dosage, rabbit dropping - With honey □ neutralized - Indications: Blood stasis in the uterus [mild, persistent uterine bleeding of purple or dark blood during pregnancy accompanied by abdominal pain that increases with pressure. Also for such disorders as immobile masses in the lower abdomen with pain and tenderness, abdominal spasms and tension, amenorrhea with abdominal distension and pain, dysmenorrhea, and retention of the lochia; or restless fetus sx. T: purple or red tongue with lateral spots, white or yellow coating; P: choppy, or wiry pulse. - Restless fetus because of blood stasis - Fibroids, then pregnancy Applications - Blood stasis in the uterus - Blood stasis during pregnancy (mildly reduce fixed abd. Masses w/o threatening the well-being of fetus) - Uterine fibroids - Ovarian cysts - Endometriosis - Incomplete abortion - Infertility - Chronic prostatitis - Dead fetus in uterus	Patent Modern Research Case Study - A 41 y-o female looks for help for her 14-18 days bleeding with dark-red blood and purple clots for over 3 years. She tells you that she was diagnosed as uterine fibroid 2 and half years ago. Other sx: abd. Cramping for 5 days at the beginning of each mense, low energy, poor digestion. - A dusky tongue with purple spots on sides, white moist coating - A slightly slippery pulse, pronounced at left Chi position. - Dx: - Tx: Think & Review

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Gui Zhi	9-12			Acrid (sweet) & warm to open Meridians [open exit/sewer], reduce Blood stasis, promote Qi Hua [Function of the Qi in the uterus] Pair: Gui Zhi & Fu Ling
	Fu Ling	9-12			Tonifies Sp, dries damp, calms Spirit to help calm fetus, promotes urination. With gui zhi to treat Blood stasis due to damp accumulation
Deputy	Chi Shao Yao	9-12			Moves Blood, regulates menses, clear heat from blood stagnation
Assistant	Tao Ren	9-12			Moves Blood, reduces Blood stasis, clears heat Pair: Tao Ren & Mu Dan Pi
	Mu Dan Pi	9-12			Moves Blood, breaks up and dispels blood stasis, disperses accumulation, reduces abdominal masses

Modifications			
+ xiang fu, chen pi	Qi stagnation		
+ dang shen, huang qi	Severe qi xu		
+ shu di, shou wu	Blood xu		
+ zao jiao ci, san leng, e zhu, da huang	Severe blood stasis		

Sheng Hua Tang [生化汤] (Generation & Transformation Decoction) Source: Fu Qing Zhu Nu Ke	
● Actions: moves Blood to dispel Blood stasis, warms Meridians, relieves pain. ● Preparation & administration: as a decoction with a mixture of equal parts of yellow wine and the urine of boys under 12 y-o of age. Also decocted with water, with the optional addition of wine. ● Indications: Blood & cold stagnation causing postpartum lochial (lochia: vaginal discharge after giving birth (puerperium) containing blood, mucus, and uterine tissue) retention [retention of the lochia accompanied by cold and pain in the lower abdomen; T: pale-purple with purple spots, P: thin, deep and wiry/choppy. ● (If the Blood stasis is not transformed, then new blood cannot be generated) ● Post partum lady with dark purple clotted discharge & lower abdominal pain Applications ● Postpartum condition with lochial retention & lower abd. pain ● Abnormal vaginal discharge ● Retention of tissue fragments in Uterus ● Painful postpartum uterine contractions ● Endometritis ● Postpartum Bi sx ● Postpartum urine retention ● Infertility d/t fallopian obstruction	Patent ● Modern Research ● Case Study ● Think & Review ●

Formulas That Invigorate Blood in the Treatment of traumatic injury	
- The formulas in this section are for severe swelling & pain d/t traumatic injuries resulting in injury to Blood collaterals, the small vessels causing hemorrhage and thereafter obstruction from Blood stasis.	- These formulas include Blood-movers, Qi-movers, pain-killers, and often applied orally as well as topically. Wine is usually added into the formulas to reinforce the blood-moving and meridian-dredging functions. - For severe cases, bloodstasis-crackers are also included such as san leng, e zhu, wu gong... [Animals: Tu Bie, cockroach (move blood for severe stasis), centipede, scorpion, snakes □ Stronger to Move blood, break blood stasis]

Fu yuan huo xue tang [复元活血汤] (revive health by invigorating Blood decoction) source: yi xue fa ming	
- Actions: invigorates Blood & reduces Blood stasis to relieve pain, spreads Lr Qi, unblocks Meridians. - Preparation & administration: coarsely grind herbs & take 30g as a draft in a mixture of 3 parts water & one part wine. Or Decoction Indications: Hypochondriac Blood stagnation from traumatic injury causing pain [acute, fixed, stabbing hypochondriac and chest pain, large bruises, history of traumatic injury] A - T: purple, P: wiry or choppy Applications - Severe Blood stasis & Qi stagnation causing excruciating pain in the chest, hypochondriac, or flanks with a history of traumatic injury - Low back sprain, Intercostal neuralgia, Liver abscess - Costochondritis, Residual pain from shingles	Patent Modern Research Case Study Think & Review

Rank	Herb	Amount	Properties	Channels	Notes

Formulas That Stop Bleeding 止血剂	
- Bleeding (hemorrhage, spillage of blood) manifestations varies – vomiting of blood (hematemesis), nosebleeds (epistaxis), coughing of blood (hemoptysis), blood in the stool (hemafecia), blood in the urine (hematuria), excessive menstruation, and uterine bleeding.	TCM bleeding types may be further differentiated in accordance with the various Zang & Fu organs involved; the etiological factors of cold, heat, xu, and shi; the location of the bleeding; and whether the disorder is acute or chronic. Among them, the most common causes of bleeding as the primary symptom are the reckless movement of hot blood, wherein the blood is forced out of the vessels, and Xu, wherein the body is unable to retain the blood within vessels.

	Heat in Zang-Fu	Blood heat	Yin xu	Qi xu
Etiology	Emotional imbalance spicy food, alcohol, external pathogens	Invasion of pathogenic heat	Overwork, dry from chronic dz or fever	Overwork, chronic illness, internal damage
Location	Lu, St, Lr, LI, uterus	Blood level	Yin & fluids	Sp
Nature	Acute, bright red or purple blood	Acute, severe, fresh red, dark	Scanty, pink/ fresh red blood	Pale thin blood
Symptoms	Nosebleed, vomiting /coughing of blood, blood in urine/stool..	Subcutaneous red/bleeding, uterine bleed...	Bleeding with dry mouth/ throat, thirst...	Bleeding with weakness, pale complexion
Tongue	Red	Scarlet red	Red, dry	Swollen, scalloped
Pulse	Rapid	rapid, forceful	Rapid, thin	Weak, thin, empty
Co. Tx	Stop bleeding			
Dif. Tx	Clear heat from the affected zang-fu	Cool Blood	Nourish Yin, moisten dry	Tonify Qi
	Heat in Zang-Fu	Blood heat	Yin xu	Qi xu

Treatment Principle	
- Acute bleeding: priority is to first stop bleeding & resolve disharmony later - Chronic bleeding: treat symptom (bleeding) & the underlying condition simultaneously - Formulas include astringent, hemostatic ingredients as chief, and heat-clearing or qi-tonifying or other ingredients to address associated sx/underlying factors. - Use stop-bleeding formulas short-term - For bleeding from the upper jiao: - shi heat: add niu xi, zhi shi to guide blood down; - xu cold in middle jiao: add ban xia, pao jiang to warm & descend Blood [Excess pushes blood up □ guide back to where it's supposed to be] - For bleeding from the lower jiao: add jing jie, sheng ma, huang qi, ren shen to raise the Yang and tonify Qi [chronic uterine bleeding, hemorrhoids, colitis], tonify Qi so that blood stays in vessels, raise Qi so that it doesn't collapse down	- For bleeding from the upper jiao, avoid ma huang, gui zhi, sheng ma, chai hu [ascending herbs □ disperse] - For bleeding from the lower jiao, avoid niu xi, zhi shi, da huang, mang xiao [descending herbs, purging] Dang Gui, Chuan Xiong, Dan Shen are often chosen to arrest bleeding d/t blood stasis, to prevent blood stasis from forming as the stop-bleeding ingredients are often astringent & may stagnate Blood flow - For prolonged bleeding, Dang Gui Bu Xue Tang [Dang Gui (1) & Huang Qi (5)] should be given to tonify qi & blood or added into the basic formula if not already included

Clear heat & stop bleeding 清热止血 [Excess causes bleeding]	
Hot blood – rashes, nosebleeds, vomiting, coughing, or spitting up blood, and blood in the urine or stool; accompanied by sx of heat such as a dry throat, flushed face, red eyes, dry stools, dark & scanty urine; a yellow tongue coating, a rapid pulse.	- Treated with formulas that address the reckless movement of hot blood, including stop-bleeding and heat-clearing herbs as well. - Cool Blood & stop bleeding

Shi Hui San [十灰散] (Ten Partially-Charred Substances Powder) Source: Shi Yao Shen Shu [10 Ashes Powder]	
- Actions: cools Blood, stops bleeding. - Preparation & administration: partially char equal amounts of the herbs, grind into a fine powder, take 9-15g of the powder mixed with Chinese ink that is ground with lotus root juice or turnip juice. - Also as a decoction - All ingredients equally important [no chief, etc.] - Indications: LV & ST fire blazing with Blood heat that injures Blood vessels causing acute bleeding [coughing, spitting or vomiting of blood] - T: Red tongue, P: full, rapid & wiry or rapid & slippery Applications - Fire blazing in Upper & Middle Jiaos leads to blood heat and reckless blood flow causing acute bleeding with sudden onset - Liver & St fire with blood heat causing acute bleeding - Uterine bleeding during menopause - Pulmonary TB, Bronchiectasis, Peptic ulcer - Hemorrhagic esophagitis/gastritis	Patent Modern Research Case Study Think & Review

Formulas That Treat Wind 治风剂

- **Wind syndromes** are conditions involving signs & symptoms that present the characteristics of wind –
- 1) wind is a Yang pathogenic factor that tends to disperse, moving upward & outward. It can therefore easily invade Yang, Exterior.
- 2) the nature of wind is to arise quickly, migrate & change rapidly.
- 3) wind tends to make things move.
- 4) wind is the initial exogenous pathogenic factor in causing disorders
-

Treatment Principles & considerations

- **External Wind:** use acrid, dispersing & diaphoretics as chief ingredients to disperse pathogens from Surface
- When treating E-W, do not use sweet nourishing or sedating herbs since they may cause EPI to transfer to the interior
- **Internal Wind:** use nourishing or sedating ingredients as the chief according to specific etiology
- When treating I-W, do not use acrid dispersing herbs since they may cause Lr Yang to rise & impair Yin, Blood & Fluids, thus aggravating symptoms
- When treating I-W, herbs that invigorate & tonify Blood are often added since “to treat Wind, first treat Blood. Once Blood is moving, Wind will stop by itself.”
- Because wind invasion is often associated with other pathogens such as heat, damp, cold, or dry, it is important to address these

	External wind	Internal wind
<i>Etiology</i>	External wind invasion	Internal Zang-fu dysfunction
<i>Zang-fu</i>	Skin, muscles, meridians, bones, Lu	Lr, K
<i>Symptom</i>	Chills+fever, HA, cough, itchy skin, joint pain & stiffness	Tremors in the hands & feet, vertigo, hemiplegia, convulsions
<i>Tongue</i>	No significant changes	Red or pale
<i>Pulse</i>	Floating	Wiry
<i>Tr.Pr.</i>	Expel wind	Extinguish / pacify wind
<i>Relations</i>	External wind can generate internal wind, internal wind may accompany external wind	

Formulas That Dispel External Wind 疏散外风

- Formulas in this section are primarily composed of acrid herbs that produce a dispersing action, they must be used with caution & appropriate modification in cases with injury to the **Fluids or Yin**.
- External Wind invades the body when the normal qi is xu, the interstices & pores are open, or the protective qi is weak. Some of these formulas are used in treating E-W that enters the flesh, meridians, sinews, joints & bones; Others treat disorders in which E-W induces internal movement of wind

●

Xiao Feng San (Eliminate Wind Powder) [消风散 (13 Wei)] Wai Ke Zheng Zong [Very Important Formula □ Need To Know ALL Ingredients]	
• Topical or oral • Main formula for dermatological issues • Actions: disperses wind, eliminates damp, clear heat, and cools Blood • Preparation & administration: decoction. May be taken orally on an empty St, or applied topically while decoction cools down. • Avoid alcohol, coffee, spicy foods, seafood, & smoking [Avoid Fa Wu] • Wind cause itchiness, can combine with other pathogens (cold, damp, etc.) □ Grab the top gangster & everyone else dissipates • Adjust dosage based on presentation [more wind, damp, heat, etc] • Treat blood to treat wind (very comprehensive formula, can modify) • Indications: Wind-heat or wind-damp causing skin conditions [red, itchy skin rashes, oozing fluids after rash is broken, purpura (subcutaneous bleeding), eczema, urticaria] • T: red or normal with yellow or white coating, P: floating, rapid or full Applications • Invasion of W-D/W-H contends with preexisting D-H resulting in trapped pathogens between flesh, skin, interstices & pores, & settles in vessels, moving about, presenting as skin sx • Eczema, Urticaria, Psoriasis, IBS • Allergic purpura, Diaper rash, Meds-induced rashes	Case Study • A 26 y-o male comes in for his comes-and-goes flat rashes. The rash started during his travel to Midwest last summer and has been coming 1-2 times almost every week, mostly with heat, cold and damp, or pressure stimulations. The rash started with itchiness and becomes red and larger in various shapes, often expands with scratches; subsides in 2-3 hours with distraction or focus on something else. However, he usually can't help scratching. [Typical urticaria] • A normal tongue with thin yellow coating; a floating & rapid pulse, pronounced while itching. • Dx: • Tx: • Think & Review • What are the cautions & contraindications associated with formulas that treat wind? • Why are sheng di, dang gui, hei zhi ma included in xiao feng san? ◊ Treat blood to treat wind • Why does xiao feng san incorporate the therapeutic approaches of dispelling wind, expelling damp, clearing heat, nourishing Blood & moistening dry? •

Formulas That Treat Dryness治燥剂	
• Dryness (zao燥) – one of the 6 excesses, may be external or internal. • Formulas that treat external dryness include herbs that have a gentle, dispersing action, such as zi su ye, sang ye, xing ren, qian hu. •	• Formulas that treat internal dryness include herbs that enrich Yin and moisten dryness, such as mai dong, xuan shen, sheng di, shi hu. • These formulas contain many enriching, cloying substances that can easily obstruct Qi, generate dampness. Use with caution in cases with diarrhea due to Sp xu, or where there is marked Qi stagnation.

Xing Su San [杏苏散] (Apricot Kernel & Perilla Leaf Powder) Source: Wen Bing Tiao Bian	
• Actions: gently disperse cool-dryness, disseminates Lu Qi, and transforms congested fluids • Preparation & administration: grind herbs into powder & take as a draft. Or decoction • Indications: External cool-dryness (凉燥) interfering with the disseminating & descending functions of LU [slight HA, chills without sweating, cough with watery mucus, stuffy nose, dry throat] • T: dry, white coating, P: wiry pulse Applications • Cool-dryness in late autumn • Coughs due to colds contracted during autumn with Fluids injury • Relatively superficial conditions with cough during any time of the year • Flu, Chronic bronchitis with exterior sx, Cough from allergy • Cough due to laryngeal disorders	Patent • Modern Research • Case Study • Think & Review • Please compare xing su san with shen su yin from Chapter 1 (<i>ren shen, zi su ye, chen pi, fu ling, jiang ban xia, qian hu, ge gen, gan cao, jie geng, mu xiang, sheng jiang, da zao</i>) in terms of their ingredients, actions & indications. •

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Zi Su Ye	9	Acrid & warm		W/o dry nature, releases exterior, unblocks the congested Lu qi

Da Huang [12] [ANE]

Mang Xiao [9]

Xuan Shen

Mai Dong [+fluid]

Sheng Di Huang [+ fluid]

Formulas That Expel Dampness祛湿剂	
- Damp syndromes involve either an invasion of exogenous pathogenic damp or an internal dysfunction of fluids metabolism, i.e. distribution & transformation, arising from impaired SP (transporting & transforming), LU (dispersing, descending & purifying) or KD (warming & transforming) functions.	- Damp is heavy, turbid & stagnant by nature. It tends to sink & stubbornly linger. Damp is thus classified as a Yin pathogen that tends to obstruct qi function & impair the flow of the body's Yang qi. - Sp is Zang most affected by damp. - Tongue coating reflects GI system - GI Endoscopes indicate amount of inflammation in GI system

Damp location	symptoms	Damp type	symptoms
Skin	Edema, a feeling of heaviness & tightness	Cold-damp	Heaviness in the body & head, joint stiffness & pain, edema (especially in the lower part of the body), loose stools
Meridians & collaterals	Joint pain, stiffness or numbness, swollen joints, heaviness of the extremities	Damp-heat	Jaundice, painful & burning urination, low-grade fever, thirst with no desire to drink, itchy skin, fetid leucorrhea
Middle Jiao	Abdominal distension, nausea, vomiting, loose stools, poor appetite, sweet or greasy taste in the mouth	Wind-damp	Chills & fever, heaviness in the body & head, stiffness & pain in the joints, superficial edema
Lower Jiao	Difficult urination, leucorrhea	Water-damp	Pitting edema, difficult urination
		Summer-heat with damp	Fever, sweating, vomiting, fullness in the abdomen & epigastrium, diarrhea, anorexia, feeling of heaviness in the body

Treatment Principles & Considerations	
- Since damp conditions vary widely, treatment should be based on the nature & location of the condition, the particular Zang-fu involved, and whether there are other pathogenic factors complicating the condition. The specific Tx methods are: Damp in Upper Jiao/Exterior: diaphoretic herbs to release damp from surface Damp in Middle Jiao: bitter &/or aromatic herbs to resolve damp, awaken SP Damp in Lower Jiao: herbs to promote urination & drain water-damp	- Damp with cold – herbs to warm Yang, dispel cold & resolve water-damp - Damp with heat – herbs to clear heat & dry damp - Water-damp accumulation – harsh herbs to strongly purge water-damp (only in patients with a strong constitution) [ascites], short period of time - Damp with wind – herbs to dispel wind & expel damp [Bi syndrome] - Nei Jing: Open Ghost Door & Cleansing Palace

Cautions & contraindications	
- Herbs that expel damp are pungent, warming & drying on the whole. Damp-expelling formulas are consequently contraindicated in medium to severe Yin & Fluids xu, unless modified by adding fluid-generating, dryness-relieving herbs such as hua shi & lu gen	- In cases where edema accompanies with chronic dz or pregnancy, tonifying herbs should be added to the formula to support upright qi, e.g. bai zhu, huang qi - Add qi-regulating herbs to the formula because damp is a heavy, cloying pathogen that can easily generate qi stagnation

Transform damp & harmonize stomach 燥湿和胃	
- When damp lingers in the interior, stagnation & turbidity ensue. Damp turbidity severely interferes with the transporting function of Sp, producing Sp & epigastric & abdominal sx, which require the use of aromatic herbs that cut through the turbidity and revive Sp as well as regulate Middle Jiao.	

Ping Wei San [平胃散] (Calm The Stomach Powder) Source: Tai Ping Hui Min He Ji Ju Fang	
- Action: resolves damp, strengthens Sp, activates & regulates qi, harmonizes St - Preparation & administration: grind herbs into powder, add sheng jiang & da zao, take as a draft in 6-9 doses on an empty St. Also as decoction with dosage in parentheses - Indications: Damp-cold stagnating in SP & ST [Middle jiao □ Aromatic □ transform, dry, vent damp] distention & fullness in the epigastrium & abdomen, loss of taste & appetite, a heavy sensation in the limbs, loose stool or diarrhea, easy-fatigued, increased desire to sleep, nausea & vomiting, belching, acid regurgitation - T: swollen tongue with a thick, white & greasy coating - P: slow or slippery pulse. Applications - Middle Jiao damp(-cold) stagnation with a thick white greasy tongue coating - Peptic ulcers - Chronic gastritis/enteritis - Infantile indigestion - Anorexia with bad breath - Excessive sleep - Chronic pancreatitis - GI reactions to chemotherapy	Patent Modern Research Case Study Think & Review

Rank	Herb	Amount	Properties	Channels	Notes

Indications	Damp stagnation in Middle Jiao [Aromatic □ treat damp]	Middle Jiao xu with cold
Co. sx	Poor appetite, abdominal distension, indigestion, nausea, vomiting, loose stool	
Dif. sx	Heaviness of limbs; flabby tongue w/ thick greasy co, soggy/slippery pulse	Abd. Pain better w/ warmth & pressure; pale wet tongue w/ thin white co, deep weak slow pulse

Huo Xiang Zheng Qi San [藿香正气散 (11 Wei)] (Agastache Powder To Rectify Qi) Source: Tai Ping Hui Min He Ji Ju Fang	
• Actions: releases exterior, transform damp, regulates qi, harmonizes Middle Jiao • Preparation & administration: grind herbs into powder, take in 3-6g doses as a draft with 3-6g of sheng jiang & one piece of da zao. Also as decoction with the dosage specified in parentheses • Small formulas: Ping Wei San (almost) • Indications: Middle jiao damp stagnation with external wind-cold [Exterior (wind cold damp)/interior (middle jiao damp stagnation)] chills & fever, HA, nausea & vomiting, a sensation of fullness & stifling oppression in the chest and epigastrium, abdominal distension & pain, appetite loss, taste loss, borborygmus, diarrhea; a slightly pale tongue with white greasy coating; a soggy, slippery or floating, tight pulse. • Good for Seattle winter time Applications • Externally-contracted wind-cold with concurrent internal damp stagnation • Vomiting above w/ diarrhea below and chills & fever, white tongue coating [damp cold] • Summer wind-cold • Stomach flu • Acute gastroenteritis • Chronic hepatitis B • Morning sickness Small formulas • Open all 3 jiaos □ cause big vent: chen pi, da fu pi, and jie geng • Damp: Zi su ye, Bai zhi, bai zhu	Patent • Modern Research • Case Study • A 32 y-o female complains of heavy & sore joints & heavy head. Other sx: aversion to cold, nausea, no appetite, epigastric fullness & abdominal bloating, loose stools (already 3 times today). She tells us she went to her son's school to do volunteer job and noticed a few kids sneezing and sniffing in the classroom. • A swollen tongue with thick white coating • A slightly soggy & floating pulse • Dx: • Tx: Think & Review • Please compare <i>huo xiang zheng qi san</i> with <i>xiang ru san</i> (in chapter 1: xiang ru, bai bian dou, hou po) in terms of their similarities and differences. ◊ All aromatic □ summer ◊ Get rid of wind cold, wind damp • Please compare <i>huo xiang zheng qi san</i> with <i>ping wei san</i>. ◊ Both 1st degree formulas ◊ • Please compare <i>huo xiang zheng qi san</i> with • <i>jing fang bai du san</i> (in chapter 1: jing jie, fang feng, qiang huo, qiang hu, chai hu, zhi ke, fu ling, jie geng, chuan xiong, gan cao). ◊ Wind cold & toxins, without damp accumulation in middle jiao ◊ Wintertime, catch cold, no damp, no ST symptoms ◊ Toxic symptoms

More su ye	Severe wind-cold		
- Gan cao, da zao + ji nei jin, shen qu	Food stagnation		
+ cang zhu	Severe damp		
+ ze xie, mu tong	Scanty urination		

Formulas That Clear Damp-heat 清热祛湿	
- Damp-heat sx develop from invasion of external damp-heat, or from damp which transforms into heat in the interior. When damp combines with heat, it is just like that oil mixed with dough, which makes it hard to separate & treat. - Yin pathogen (treat damp with warm things □ make heat worse) & Yang pathogen (treat heat with cool things □ make damp worse) □ hard to treat	- Main manifestation: a yellow greasy tongue coating, a slippery (and /or rapid) pulse, a heavy sensation, fever that worsens in the afternoon - Heavy smokers, drinkers, drug users, junk food junkies - Hard to get rid of, Like oil mixed into dough - Hepatitis patients

Yin Chen Hao Tang [茵陈蒿汤] (Artemisia Yinchenhao Decoction) Source: Shang Han Lun	
- Yang jaundice, acute hepatitis, acute GB infections Indications: Damp-heat or yang-type (阳黄) jaundice –(severe yang type) [jaundice of the whole body with a fresh yellow hue (resembles a fresh tangerine), some abdominal fullness & distension, thirst (with the ability to take only sips), dark scanty & difficult urination; sweating from the head only; a yellow greasy tongue coating, a slippery, rapid or deep, full pulse. - Allergic jaundice - Clear damp & dump it - Well designed Applications - Lr & GB damp-heat causing jaundice, especially those types in which heat is the predominant factor - Acute hepatitis, Chronic cholecystitis, Liver cirrhosis - Typhoid fever, New-born-baby jaundice - Viral infectins, very stubborn bacterial infections	Case Study - A noisy 1 week new-born baby appears fresh bright yellow jaundice (on the sclera & skin). Other sx: constipation, yellow urine, slightly feverish, irritability. - Red lips & tongue - Dark-red index finger veins extend from the Wind to Qi region - Dx: yang type jaundice () - Tx: yinchenhao tang (1/5-1/6 in dosage) + che qian cao, bai mao gen, fu ling. Cured in 4 days - Can also use normal dose & let mom drink □ milk Think & Review

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Yin Chen Hao	30	bitter, Slt cold	SP/ST, LV/GB	Clears heat, leaches out damp, reduces jaundice. The rather large dosage of this herb increases its efficacy. [Cousin of moxa]
Deputy	Zhi Zi	15	bitter, cold	HT, LV, LU, ST, SJ	Clears heat from 3 Jiaos, more specifically drains damp-heat through the urine
Assistant	Da Huang	9			Purges heat through the bowels, moves Blood to help Lr for its sooner recovery. These 3 herbs act synergistically to drain damp-heat & encourage the fading of jaundice

formulas	Ingredients	Indications	
Yin Chen Si Ni Tang 茵陈四逆汤	Yin chen hao, pao jiang, fu zi, gan cao	Yin-type 阴黄 or damp-cold jaundice with K yang xu	Warm KD & SP yang □ restores functions □ transform damp (mild yin type)
Zhi Zi Bai Pi Tang 栀子柏皮汤	Zhi zi Huang bai Zhi gan cao	Fever & jaundice as sequela of cold-induced disorder in cases heat > damp	Milder □ treats mild yang type jaundice
Yin Chen Zhu Fu Tang 茵陈术附汤	Yin chen hao, bai zhu, gan jiang, fu zi, rou gui, zhi gan cao	Yin-type 阴黄 jaundice with more Sp yang xu (some K yang xu as well)	Severe yin type □ stronger than Yin Chen Si Ni Tang [Si Ni Tang: Gan jiang, raw fu zi, etc □ rescue yang] Cooked fu zi: transform damp & drive it away

San Ren Tang [三仁汤] (Three-Nut Decoction) Source: Wen Bing Tiao Bian	
• Actions: disseminates Qi, facilitates Qi mechanisms, & clears damp-heat • Preparation & administration: decoction, with the dosage of the ingredients reduced by one-half to two-thirds • Indications: Early-stage damp warm-febrile disease or summer heat warm-febrile disease in which damp predominates & the pathogens are lodged in the Qi level (湿温初起及暑温夹湿, 邪在气分) HA, chills, afternoon fever, a heavy sensation in the body, generalized pain, pale-yellow complexion, a stifling sensation in the chest, loss of appetite, an absence of thirst • White tongue coating, a wiry thin & soggy pulse.	• Good example to show us how to treat damp heat ◊ Upper jiao: evaporate, diaphoretic ◊ Middle Jiao: transform aromatically ◊ Lower Jiao: drain damp • Damp heat all over, all 3 jiao, Speed up or reset system Applications • Damp warm-febrile disease in the early stage • Damp-heat condition in which damp > heat • Morning sickness, Fever of unknown origin • Biliary ascariasis 胆道蛔虫, Diarrhea in summer, Pyelonephritis

Rank	Herb	Amount	Properties	Channels	Notes

Ba Zheng San [八正散] (Eight-Herb Powder For Rectification) Source: Tai Ping Hui Min He Ji Ju Fang	
• Actions: clears heat, quells fire, drains damp, promotes urination, unblocks painful urinary dysfunction (lin) • Preparation & administration: grind equal amounts of the ingredients into powder, take as a draft in 9g doses with deng xin cao. Or as decoction • Indications: Hot or bloody painful urinary dysfunction [Bloody Lin] due to damp-heat in Lower Jiao (湿热下注) frequent, urgent, painful, burning dark urination, distension & fullness in Lower abdomen, thirst, dry mouth; or scanty and turbid urine, dribbling or difficult urination, or urinary retention; a • T: red tongue with yellow greasy coating, P: slippery, rapid pulse. Applications • Lower jiao damp-heat with acute heat Lin • Heart meridian heat, Acute UTI, Glomerulonephritis • Cystitis, Urethritis, Prostatitis, Stomatitis, Urinary Calculi • Acute Excess	Case Study • A 24 y-o female has suffered from urgent, painful & frequent urinations since yesterday. She also feels a distending pain in the lower abdomen that she describes as a fire ball blocked in the lower tummy, and a burning sensation while urinating. Other sx: thirst with preference to drink cold water, feels feverish & tired. She just made a new boyfriend last week and started an intimate relationship a couple of days ago. • A red tongue with yellow coating; a rapid & forceful pulse. Think & Review • Why does <i>ba zheng san</i> (which treats Lin sx) contain da huang, even though there is no constipation present? ◊ Drain the heat down & dump heat through stool & urination [2 exits better than one], ◊ Da Huang: Conducts heat down & moves blood (Purging & moving). Blood beyond meridians & vessels □ blood stasis forms. Bleeding & blood stasis go together. Treat possible blood stasis. [2 reasons use da huang] • What are the differences between <i>ba zheng san</i> and <i>dao chi san</i>, even though these 2 formulas all can be used to treat Lin sx? • Please compare <i>ba zheng san</i> [damp heat blazing] with <i>xiao ji yin zi</i> [damp heat with bleeding] (xiao ji, sheng di, hua shi, mu tong, dan zhu ye, dang gui, zhi zi, chao pu huang, ou jie, zhi gan cao) since these both formulas treat painful urinary dysfunction

	Che qian zi	9			
	Qu mai	9			
	Bian xu	9			
Assistant	Zhi zi	9			Drains heat from 3 jiaos through urine
	Zhi da huang	9			Drains heat through stool
	Deng xin cao	9	Sweet, slightly cold, bland	HT, SI, LU	[rush stem pith □ ancient wick] Very light, cook not long, Guides heat down
Envoy	Gan cao (shao)	9			Guide effect of whole formula into urethra & dump damp heat away from there
					Harmonizes formula, relieves abdominal pain

	Ba zheng san	Dao chi san [Designed for Kids □ Milder]
Co. indication	Hot painful urinary dysfunction	
Dif. Focuses	Lower jiao sx – Urinary retention with lower abdominal distension and pain	Upper jiao sx – Irritability, mouth sores
Actions	Strongly unblocks Lin w/o nourishing Yin	Weaker effect on Lin, but nourishes Yin

	Ba zheng san	Long dan xie gan tang
Co. indication	Acute Lin sx due to damp-heat in the Lower Jiao	
Dif. indication	Lin sx due to damp-heat in UB	Lin sx due to damp-heat in Lr & GB meridians
Actions	Promotes urination & clears damp-heat	Clears damp-heat from Lr & GB
	Focus on lower jiao damp heat, urinary difficulty	Wider indications, many symptoms

Er Miao San [二妙散] (Two-Marvel Powder) Source: Dan Xi Xin Fa

- **Actions:** clears heat, dries dampness
- Preparation & administration: fry equal amounts of both herbs, grind into powder, take 3-6g twice a day with ginger juice. Or as decoction
- Both treat damp heat □ very balanced
- **Indications:** Damp-heat lodged in Lower Jiao – scanty, yellow urine, or a thick yellow & foul-smelling vaginal discharge; a yellow greasy tongue coating
- Damp-heat in the sinews & bones of Lower Jiao – red, hot, swollen & painful feet/knees, especially in LB or extremities, sinews or bones, or sores on lower extremities due to dampness; or interfere with nourishment of tissues, resulting in weakness/atrophy
-

Applications

- Atrophy disorders due to damp-heat (+ wu jia pi, xi xian cao)
- UTI, Vaginitis/cervicitis, Hepatitis, Gouty arthritis
- Beriberi (+ yi yi ren, bing lang), RA

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Huang Bai	15			Bitter & cold to treat damp-heat in Lower Jiao
Deputy	Cang Zhu	15			Bitter & warm to dry and disperse dampness These two herbs form an elegant & powerful formula for drying & clearing damp-heat lodged in Lower Jiao

Related Formula			
New formulas	Based on er miao san	Indications	
San miao wan 三妙丸	+ chuan niu xi	Damp-heat in Lower jiao: numbness or burning pain or weakness in feet	
Si miao wan 四妙丸	+ chuan niu xi, yi yi ren	Damp-heat in Lower jiao: atrophy, severe numbness & weakness in lower limbs with painful & swollen feet	Stronger to treat damp, more comprehensive
Jia wei er miao wan 加味二妙丸	+ chuan niu xi, yi yi ren, dang gui wei (small roots of dang gui), han fang ji, bei xie, zhi gui ban	damp-heat in Lower jiao with yin damage: heaviness & discomfort in limbs with atrophy & weakness, edema, numbness.	Strongest

Formulas That Warm & Transform Water Damp 温化水湿	
- Formulas in this section for water or damp caused by cold or Yang xu – edema, urinary difficulty/Lin, lower abdominal numbness; or tan yin; or Bi syndrome. - Formulas often include fu zi, gui zhi, fu ling, bai zhu...	
Zhen Wu Tang [真武汤] (True Warrior Decoction) Source: Shang Han Lun	
- Actions: warms Yang, promotes urination. - Preparation & administration: decoction - KD Yang Xu: Cold water upward invading heart □ ht doesn't work well Indications: KD & SP Yang xu causing water accumulation [difficult urination, aching & heaviness in the extremities, generalized edema, dislike of cold, abdominal pain, watery diarrhea, absence of thirst, palpitations, dizziness, head heaviness] (Urinary difficulty, lower jiao edema) - T: pale, flabby tongue with moist white coating - P: deep, thin, weak pulse. - Overuse of diaphoretics in Taiyang syndromes [fever, abnormal sweating, dizziness, palpitations in the epigastrium, trembling, shivering, unsteady appearance] [Too much sweating □ yin damage □ damages yang □ trembling, twitching (clear yang can't reach top □ severe symptoms)] - T: pale tongue with moist white coating - P: thin deep forceless pulse ◊ Applications - Yang xu with urinary difficulty, edema & heavy sensation in the body & limbs, deep pulse, white tongue coating - Edema from congestive heart failure, Chronic nephritis - Intestinal TB caused diarrhea, Hypothyroidism, Meniere's disease - Uremia, RA, Urinary retention from enlarged prostate, IBS, Restless leg	Patent Modern Research Case Study - A 74 y-o male presents with coughing with white copious mucus, sob, palpitations, stifling sensation in the chest, reduced appetite, lassitude, edema in lower limbs, cold extremities, scanty urination. His wife tells us that he is unable to lie flat at sleep. MD's diagnosis: heart failure from pulmonary heart disease. - A dusky tongue with white moist coating; a deep rapid & thin pulse - Dx: - Tx: Think & Review - Please compare <i>zhen wu tang</i> with <i>fu zi tang</i> in terms of their ingredients, actions, indications. <i>Si ni tang</i> also use fu zi & ginger as <i>zhen wu tang</i>, what is difference of this combination between these 2 formulas?

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Fu Zi	9			Very acrid very hot to warm K yang, restore collapsed yang
Deputy	Bai Zhu	6			Tonifies Sp, dries damp With fu ling, sheng jiang to boost Earth to control water Bai Zhu & Fu Zi combo: tonify SP yang by tonifying KD yang (below waist edema) SE: Bai Zhu □ strengthen SP (earth) to control water (like dam) [NCCAOM]
	Fu Ling	9			Helps bai zhu tonify Sp, drains damp
Assistant	Sheng Jiang	9			Warms Middle jiao, dispels cold & water
	Bai Shao	9			[very special] Relieves abdominal pain, prevents dry hot herbs from injuring yin Sour: Nourish & stabilize yin □ Soften spasmodic muscles & tendons Coldness in lower jiao □ cold pain □ bai shao deal with that

Modifications			
+ gan jiang, xi xin, wu wei zi	Wheezing or coughing with copious watery sputum	+ wu zhu yu, ban xia	With vomiting
- Bai shao + gan jiang, yi zhi ren	Severe diarrhea	+ ren shen	With palpitations

Related Formula			
Formula	Ingredients	Indication	
Fu zi tang (shang han lun) 附子汤	Fu zi 15, bai zhu 12, ren shen 6, fu ling 9, bai shao 9	Yang xu with internal damp-cold stagnation: Aching bones & joints, cold limbs, aversion to cold, white moist tongue coating, deep faint weak or choppy slow pulse	Classic formula Ren Shen: stronger function to treat yang deficiency (tonifies Qi & yang) Coldness deep in bones, like ice Ren Shen: tonify yin, yang, Qi, blood

	Zhen wu tang	Si ni tang
Co. herbs	Aconite, ginger	
Dif. aconite	Zhi fu zi Warms meridians, expels damp	Sheng fu zi Warms meridian, dispels cold
Dif. ginger	Sheng jiang Warms to remove damp	Gan jiang Warms to dispel cold
Indications	Water accu d/t K & Sp yang xu	K yang xu with cold & K yang collapse
Therapeutic emphasis	Expels damp	Warms the interior

Formulas That Promote Urination & leach out dampness利水渗湿	
- Dampness clogs the water pathways – edema, urinary obstruction癃闭, painful urinary dysfunction (Lin sx淋证), diarrhea - Treated by promoting urination since urination is an effective method for leaching out dampness, usually by fu ling, ze xie, zhu ling, hua shi	5 formulas treat jaundice

Wu Ling San [五苓散] (Five-Ingredient Powder With Poria) Source: Shang Han Lun	
- Actions: promotes urination, drains dampness, strengthens Sp, warms Yang, promotes Qi-hua气化. - Preparation & administration: as a powder in 3-6g doses 1-3 times a day. As decoction taken warm - Many pairs to restore Qi Hua function (urinary function) - Treat external conditions that cause urinary difficulty Indications: 1. Lower Jiao cold-water accumulation (with possible external wind-cold) – difficult urination, HA, fever, irritability, thirst with vomiting immediately after drinking water; a thick/greasy white tongue coating, a floating rapid pulse - thirst is fake symptom, actually have internal water accumulation - UTI or nephritis caused by URI, transmitted by blood [Observed thousands of years ago] 2. Sp qi xu causing water-damp accumulation – general edema with a general feeling of heaviness, diarrhea, difficult urination, vomiting; a thick white or greasy white tongue coating, a slippery pulse 3. Tan-yin syndrome – throbbing or pulsing just below the umbilicus, vomiting of frothy saliva, dizziness, SOB, coughing, possible expectoration of copious white sputum; a thick white or thick greasy white tongue coating, a slippery pulse - too much phlegm & mucus blocked in middle jiao □ dizziness, SOB Applications - Taiyang water buildup (xu shui 蓄水) - Sp xu with damp & water accumulation - Retention of congested fluids in Lower Jiao (tan yin 痰饮) - Small intestine fails in its task of separating the clear from turbid - Damp Bi, Accumulation of fluids invades Lu causing coughing & wheezing - Meniere's disease, Chronic renal failure, Congestive heart failure - Pleural effusion, Ascites from liver cirrhosis, Chronic hepatitis - Postpartum/post-genitourinary surgery urine retention	Case Study - A 49 y-o fluffy female looks for Tx for her vertigo along with tinnitus, decreased hearing, nausea & vomiting. Other sx: a heavy sensation on the head & extremities, scanty urine. The GP's impression for her was Meniere's disease. - A flabby tongue with thick white coating, a slippery & forceful pulse. - Dx: - Tx: Think & Review - What is the function of gui zhi in wu ling san? - Tao He Cheng Qi Tang: Treat blood buildup

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Ze xie	15	sweet, bland, cold	KD, UB	Sweet, bland & cold to leach out damp, clear heat & promote urination by entering UB directly
Deputy	Fu ling	9	sweet, bland, neutral	SP, HT, LU, UB	Leaches out damp by promoting urination & strengthening Sp (with bai zhu) & assisting Yang
Assistant	Zhu ling	9	sweet, bland, neutral	KD, UB	With fu ling, eliminates damp, promotes urination, drains heat from UB Often used pair for water retention in middle & lower jiao
Envoy	Bai zhu	9			Resolves damp by strengthening Sp with aiding in its transformation & transportation [SE: Strengthen earth to control water]
	Gui zhi	6	acrid, sweet, warm	LU, HT, UB	Releases EPI, warms Mingmen fire to aid UB in transforming & discharging urine, raises Sp qi to transform damp (with fu ling)

Co. indication	Superficial edema		
Dif. indication	Protective qi & Sp xu causing wind-damp Bi or wind edema (feng shui 风水)	Sp xu with water-damp accumulation causing superficial edema (pi shui 皮水)	
manifestations	Sweating, dislike of wind, body heaviness, floating pulse	Generalized edema, epigastric & abdominal fullness or distension, difficult urination, deep pulse	

Qiang Huo Sheng Shi Tang [羌活胜湿汤] (Notopterygium Decoction To Overcome Dampness) Source: Nei Wai Shang Bian Huo Lun

- Actions: expels wind-damp from Exterior to relieve pain.
- Preparation & administration: grind the herbs into a coarse powder, take as a draft, preferably before meals. This should promote mild sweating. Or as decoction
- **Indications:** Wind-damp obstructing Meridian & muscle levels causing pain, acute Bi – neck & shoulder pain with limited range of motion, HA, a generalized sensation of heaviness, generalized pain, difficulty in rotating or bending the trunk, possible chills & fever without sweating; a thin white coating, a floating tight pulse.
- Upper body, excess, acute

Applications

- Wind-damp in exterior/superficial and muscle levels with pain & HA
- Mild exterior sx with relatively severe generalized pain & heaviness (*this formula is stronger than jiu wei qiang huo tang (1st chapter) in treating systemic wind-damp, focusing less on releasing Exterior*)
- URI with pain, Rheumatic fever, Neck pain

San bi tang 三痹汤	- Sang ji sheng + huang qi, xu duan, sheng jiang	Similar to du huo ji sheng tang with more focus on qi xu predominant cases presenting spasms & limited motions of extremities. Du huo ji sheng tang more focuses on Blood xu predominant cases presenting Bi sx in LB & lower extremities	

Formulas That Treat Phlegm 祛痰剂	
- Phlegm is both the result of pathological processes and a cause of further pathology. - Phlegm is a yin evil of a cloying nature that interferes with the proper flow of qi and may affect all parts of the body. Its manifestations are diverse and include coughing & wheezing, nausea, dizziness or vertigo, nodules or lumps, and seizures.	- Phlegm can be classified into – substantial & formless - Substantial phlegm: visible, palpable & audible; and can be further divided into mucus (yin 饮-thin & clear) and phlegm (tan 痰-thick & turbid). - Formless phlegm: seen through symptoms only, also treated by eliminating phlegm
Etiology & pathogenesis - Exogenous: pathogenic factors invading Lu, improper diet weakening Sp - Endogenous: emotional disharmony, K qi xu, san jiao dysfunction - Lu: dysfunction of dispersing & descending functions. When Fluids are not distributed properly, phlegm may form. Lu stores phlegm	- Sp: dysfunction of transformation & transportation functions. Water circulation is impeded, causing damp to accumulate and form phlegm. Sp is the source of phlegm - K: dysfunction of dominating water metabolism. Damp & water accumulate to form phlegm. KD is the root of phlegm. SP Yang is supported by KD Yang - SJ: dysfunction of the metabolism of water between SJ, resulting in water accumulation in one jiao & a subsequent development of phlegm, which can obstruct the water pathways
Treatment Principles - Herbs that resolve phlegm as Chief herbs - Add herbs that tonify & regulate Zangfu to treat the source/root of phlegm. Phlegm is the branch or symptom, not the root of the condition. To treat the root, treat the Zangfu - Add herbs that activate & descend Qi. When qi circulates, phlegm will resolve	

	Damp (shi)	Water (shui)	Mucus (yin)	Phlegm (tan)
Location	Lower body	superficial	Locally internal	anywhere
Natures	Yin, often accomp by another evil	Both yin & yang evil	Yin, caused by cold, leading to fluids accu	Yang, caused by heat consuming fluids
quality	Vapor	Thin	Slightly thick	Thick
Interrelationship	Under certain conditions, these pathogens can transform into one another			

Location	Symptoms
Lung	Cough with profuse sputum & dyspnea
Ht	Palpitations, chest oppression, mental confusion, depression, coma, manic psychosis
St	Epigastric fullness, vomiting, nausea
Meridians	Numbness or stiffness of the limbs, hemiplegia
Skin/muscles	Subcutaneous nodules, suppurative tissue inflammation, lymph node enlargement, cervical lymph node TB
Head	Dizziness, vertigo, blurred vision, loss of consciousness
Throat	Plumpit syndrome
Intestines	borborygmus

Damp-phlegm	Profuse thin white sputum, easy to expectorate, worse at night & in late summer, often seen in overweight patients	Sp qi xu leads to accumulation of damp, which transforms into phlegm
Cold- phlegm	Thin white or thin clear sputum, easy to expectorate, worse at night & in winter, often seen in elderly patients	Sp or K yang xu causes dysfunction of water metabolism
Hot-phlegm	Thick yellow sputum, difficult to expectorate	Intense fire scorches Fluids & transforms into phlegm
Dry-phlegm	Viscous white sputum, possibly blood-streaked, very difficult to expectorate, worse in autumn, most seen in older patients or in yin xu conditions	Lu dryness or Lu & K yin xu with empty heat, which consumes Fluids & produces phlegm
External wind-phlegm	Copious, foamy white sputum, easy to expectorate, cough, chills, fever	External wind invades Lu which disrupts Fluids distribution and produces phlegm
Internal wind-phlegm	Copious, foamy white sputum, dizziness, vertigo	Sp xu causes phlegm that accumulates with the stirring of Lr wind

Formulas That Dry Damp & Expel Phlegm 燥湿化痰	
- Formulas in this section are used in treating disorders of damp-phlegm. Often include herbs such as ban xia, tian nan xing & chen pi - Drying dampness serves to strengthen the transportive function of Sp, which in turn will reduce phlegm	

Er Chen Tang [二陈汤] (Two-Cured Decoction) Source: Tai Ping Hui Min He Ji Ju Fang	
- Actions: dries damp, transforms phlegm, regulates qi, harmonizes Middle. - Preparation & administration: coarsely grind herbs, take 12g as a draft with 7 pieces of sheng jiang & 1 piece of wu mei. Now sub chen pi for ju hong, decoct with sheng jiang. - Old chen pi is better - Indications: Damp-phlegm from SP failing to properly transport Fluids [epigastric/chest fullness & distension, nausea, vomiting, coughing with copious, white sputum that is easily expectorated, palpitations, dizziness] - T: Flabby, tooth-marked tongue with white greasy thick coating, - P: slippery Applications - Basic phlegm-treating formula - Chronic/infantile gastritis - URI - Meniere's disease - Acid reflux - Chronic bronchitis/asthma - hyperlipemia	Case Study - A pale-look 5 y-o boy presents with recurrent tummy ache along with vomiting (sometimes with mucus, sometimes with indigested food), poor appetite, loose stools, weight loss. - A pale-red tongue with moist thick white coating, more in the middle part. He is not willing to get his pulses checked. - Dx: - Tx: Think & Review - Why are qi-regulating herbs often added to formulas that resolve phlegm? - Phlegm slows down Qi flow □ causes Qi stagnation □ add Qi regulating herbs to make phlegm go away sooner - So far, in how many formulas can you find out the image of <i>er chen tang</i>? 4 formulas based on Er chen Tang +1: Huo Xiang Zheng Qi San - What is the pathogenesis of <i>er chen tang</i> syndrome?

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Ban Xia	15			Warm & acrid to dry damp, expel phlegm, conduct rebellious St qi downward
Deputy	Chen Pi (Ju Hong)	15			Fragrant to revive Sp & facilitate Middle qi flow Now Chen Pi, used to be Ju Hong
Assistant	Fu Ling	9			Leaches out damp, strengthens Sp, resolves palpitations & dizziness caused by upward-rising phlegm
Envoy	Zhi Gan Cao (Sheng Jiang)	4.5			Tonifies Sp, harmonizes the formula Reinforce ban xia's action in controlling nausea, kills ban xia's toxicity, disperses damp

Modifications			
+ tian na xing, zhu li	Wind-phlegm

Related Formula			
New formula	Based on er chen tang	Indications	
Dao Tan Tang 导痰汤	+ tian nan xing, zhi shi, sheng jiang	Severe phlegm disorders – Lr wind-phlegm, tan jue, phlegm blocked in chest & diaphragm	
Di Tan Tang 涤痰汤	+ dan nan xing, zhi shi, ren shen, shi chang pu, zhu ru	Stroke with phlegm misting shen, unable to speak	
Jia Wei Er Chen Tang 加味二陈汤	+ huang qin, huang lian, bo he	Phlegm-fire – incessant, cicada-like tinnitus/ hearing loss, head heaviness, chest fullness	
Jin Shui Liu Jun Jian 金水六君煎	+ dang gui, sheng di	Lu & K yin xu with rising phlegm. Chronic bronchitis in the elderly	

Formulas That Clear Heat & Transform Phlegm 清热化痰	
- Heat-phlegm – a condition which usually arises when vigorous fire scorches Fluids & transforms them into phlegm. Manifestations include: coughing of thick, yellow, viscous sputum that is difficult to expectorate, a red & flushed face, a red tongue with yellow coating, and a rapid pulse - Treated with formulas that clear heat & transform phlegm, which include gua lou, dan nan xing, huang qin...	

Wen Dan Tang [温胆汤] (Warm The Gallbladder Decoction) Source: Yi Zong Jin Jian	
- Actions: clears heat from GB, harmonizes ST, regulates Qi, transforms phlegm. - Preparation & administration: add sheng jiang 5 pieces, make as a decoction - Er Chen Tang + Zhu Ru & Zhi Shi • Indications: GB & ST disharmony with heat-phlegm [nausea, vomiting, acid regurgitation, palpitations, anxiety, indeterminate gnawing hunger, insomnia, dizziness, or seizures accompanied by copious sputum, focal distension of the chest, a bitter taste in the mouth, slight thirst] • T: red tongue with greasy yellow coating, • P: slippery rapid or wiry • GB 2nd biggest meridian after UB. In 3 jiao, involved in many organs • GB is Judge. If judge has trouble, can't make decisions □ decision-making problems [• Indeterminate gnawing hunger: You hungry or not? I don't know, just feel discomfort in middle jiao [GB doesn't work □ can't make decisions] (special) Applications - Disharmony between GB & ST with heat-phlegm internal disturbance with timidity & hyper-sensitivity, irritability & gnawing, insomnia or dream-disturbed sleep, nausea & vomiting, or seizures (with copious sputum) - Insomnia: timid, easily frightened, especially when home alone - GB cause - Damp-phlegm with a tendency/initial sx of heat-transforming presenting with a slightly yellow or white greasy thick tongue coating, a wiry slightly rapid or slippery slightly rapid pulse - Wind damp phlegm locked in middle jiao - Aftermath of serious illness with irritability, insomnia, depression, loss of appetite. - Meniere's disease, Gastritis due to bile reflux, Chronic hepatitis - Chronic gastritis, Anxiety/panic attack, Seizures/epilepsy, - Mei he qi (plum pit Qi), Early stages of schizophrenia	Case Study - A slightly-fluffy 34 y-o female comes in with complaint of restlessness & irritability, perturbation & intenseness. Other sx: chest & epigastric fullness and distension, nausea with a feeling of vomiting, palpitations, insomnia, anxiety. - A slightly flabby tongue with [white sticky coating □ GB sign] - Thick white □ heat - Powdery white □ even more heat - A slightly rapid & slippery pulse - Dx: - Tx: Think & Review - Insomnia Differentiation - Gui Pi Tang: HT Blood xu & SP Qi xu - Tian Wang Bu Xin Dan: HT Xu & KD yin xu - Why are zhu ru & zhi shi included in <i>wen dan tang</i> (phlegm heat caused by disharmony)? - Please compare <i>wen dan tang</i> with <i>zhu ye shi gao tang</i>? - Chronic inflammation causes GB problems □ walls thinner, stones, parasites, high cholesterol, high calcium - Huang Lian is next herb star, price getting higher & higher

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Zhu Ru	6	Sweet, cold	LU, ST, GB	Clears heat & resolves phlegm [at same time] in GB and St, reverses rebellious qi flow to address nausea & vomiting, relieves restlessness
Deputy	Zhi Shi	6			Assists Chief in reversing rebellious qi flow, relieves focal distension, resolves phlegm, breaks up accumulation
Assistant	Ban Xia	6			Er Chen Tang: Dries damp, transforms phlegm, regulates qi, and harmonizes St
	Chen Pi (Ju Hong)	9			
	Fu Ling	5			
Envoy	Gan Cao	3			

Modifications			
- Ban xia + mai dong, tian hua fen	With dry mouth & tongue		
+ dan nan xing, gou teng, quan xie	Tinnitus, hearing loss, seizures		
+ suan zao ren, mai dong	Severe insomnia from xu		

Related Formula			
New formula	Based on wen dan tang	Indication	
Huang lian wen dan tang 黄连温胆汤	+ huang lian	Severe heat-phlegm – more restlessness & irritability, more intensely bitter taste in the mouth	

Qing Qi Hua Tan Wan [清气化痰丸] (Clear The Qi & Transform Phlegm Pill) Source: Yi Fang Kao	
• Actions: clears heat, transforms phlegm, directs rebellious qi downward, and stops coughing. • Preparation & administration: grind the herbs into powder, form into pills with sheng jiang juice, take 6-9g twice a day. Or as decoction with a proportionate reduction in dosage. Or patent form (often used in this format) • 3 Toxic ingredients to treat this very strong phlegm • Indications: Heat-phlegm accumulation in Lu causing cough – coughing of yellow, viscous sputum that is difficult to expectorate, focal distension, a feeling of fullness in the chest & diaphragm, nausea, wheezing, or difficult breathing; a red tongue with greasy yellow coating, a rapid slippery pulse. • Flu that has gotten into Yang Ming & Qi stage □ take as pill Applications • Cough from heat-phlegm presenting with sticky yellow sputum, yellow coating, & rapid pulse • Acute/chronic bronchitis, Pneumonia, Pulmonary heart disease, • Vocal cord polyp • Hypertension • Alcoholism • Nicotine addiction	Patent • Modern Research • Case Study • Think & Review •

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Dan nan xing	45	Toxic		Strongly clears and breaks fire-phlegm, opens chest, stops coughing
Deputy	Gua lou ren	30			Clears heat, resolves phlegm, opens chest [Lubricating □ move down to LI]
Assistant	Huang qin	30			Clears Lu heat, dries damp. With gua lou ren drains Lu fire
Envoy	Zhi shi	30			Moves qi, dissipates fire-phlegm clumps, dispels focal distension
	Xing ren	30	Toxic		Facilitates Lu qi flow, stops coughing (treats rebellious LU Qi)
	Er chen tang - gan cao				Transforms phlegm, regulates qi, harmonizes Middle
	• Ban Xia	45	Toxic		
	• Chen Pi	30			
	• Fu Ling	30			

Xiao Xian Xiong Tang [小陷胸汤] (Minor Sinking Into The Chest Decoction) Source: Shang Han Lun	
• Da Xian Xiong Tang (Major Sinking Into The Chest Decoction) • Actions: clears heat, transforms phlegm, expands the chest, & dissipates clumps. • Preparation & administration: decoct gua lou for 20'-30' before adding the other herbs. Or decoct together • Indications: Clumping in the chest (xiao jie xiong 小结胸) – a feeling of stuffiness & distension in the chest and epigastrium that is painful with pressure, coughing with expectoration of viscous yellow sputum; a yellow greasy tongue coating, a rapid slippery or floating slippery pulse. Applications • Xiao jie xiong (heat-phlegm clumping in the chest & epigastrium) • Improper purging of Taiyang sx [Caused by Treating Tai Yang with Cheng Qi tang] causing the sinking of pathogenic heat into chest & epigastrium where mixes with phlegm and forms clumps • Tender & focal distension of the chest and epigastrium, constipation, & a yellow greasy tongue coating • Pleurisy, Cholecystitis • Esophagitis from acid reflux, Acute erosive or chronic gastritis • Angina pectoris • Intercostal neuralgia • Morning sickness • Inflammation in lungs	Patent • Modern Research • Case Study • Think & Review • Please compare <i>xiao xian xiong tang</i> with <i>da xian xiong tang</i> (for da jie xiong). •

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Gua lou				Clears heat, dissipates clumps, dispels phlegm, expands the chest Can use Gua Lou Pi (chest), Ren (LI), whole thing □ for all symptoms
Deputy	Huang lian				Clears heat, dries damp
Assistant	Jiang ban xia				Directs rebellious downward, transforms phlegm, eliminates focal distension, dissipates clumps, harmonizes St

Formulas That Moisten Dryness & Transform Phlegm 润燥化痰

- Dry-phlegm: viscous, sticky sputum that is difficult to expectorate, & often a raspy voice, dry throat...
- Treated with herbs that moisten Lu & transform phlegm (bei mu [LU, HT, bitter], gua lou)
-

•

Bei Mu Gua Lou San [贝母瓜蒌散] (Fritillaria & Trichosanthes Fruit Powder) Source: Yi Xue Xin Wu

- **Actions:** moistens Lu, clears heat, regulates qi, & transforms phlegm
- Preparation & administration: decoction
- **Indications:** LU dry-phlegm causing cough [dry cough/cough with deep-seated, viscous, difficult to expectorate sputum, wheezing, dry & sore throat]
- T: red/dry with little coating
- P: thin rapid/slippery thin pulse
-

Applications

- Cough from dry-phlegm or sticky viscous deep-seated sputum
- Pulmonary TB, Pneumonia, Pleurisy from TB
- Good for elderly patients

Think & Review

- When treating dry-phlegm in Lu, treatment aims to moisten without adding to the phlegm and eliminating phlegm without damaging Yin. How is this achieved?
 - ◊ Bei Mu + Tian Hua Fen
- And what is the best formula?
-

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Chuan Bei Mu	5	Bitter, sweet	LU, HT	Times 2-3 to get normal dose. Gentle (unlike Ban Xia, Dan Nan Xing) □ gradually soften, yin preserving □ eliminate phlegm without damaging the yin fluids Moistens Lu, clears heat, transforms phlegm, stops coughing
Deputy	Gua Lou	3			Clears heat, moistens dry, regulates qi, expels phlegm
Assistant	Tian Hua Fen	2.5			[Gua Lou Root] Clears heat, generates fluids, transforms phlegm
	Fu Ling	2.5			Strengthens Sp to help transport fluids to Lu
	Ju Hong	2.5			Regulates qi, vents phlegm
	Jie Geng	2.5			Encourages Lu qi flow, treats throat problems [Guide function into Lung] Add Gan Cao □ better for throat symptoms

Modifications			
+ qian hu, niu bang zi	Itchy & scratchy throat		
- Ju hong	Raspy voice, coughing with streaked-sputum		
+ sha shen, mai dong, xian he cao	Severe heat with Dry & sore throat		
+ sheng di, xuan shen, mai dong, lu gen	Wheezing & coughing		
+ xing ren			

Related Formula			
Er mu san 二母散	Bei mu, Zhi mu	Cough with copious yellow thick sputum; or cough d/t dryness & heat in Lu	Usually add into bigger formulas to nourish yin

Formulas That Warm and Transform Cold-Phlegm 温化寒痰	
● Cold-phlegm/congested Fluids – caused by Sp yang xu leading to internal cold & a reduction in fluids metabolism that results in Fluids stagnation, which presents with coughing of clear thin white sputum, a sensation of cold in the body, a white moist tongue coating. ◊ Cold constitution & phlegm □ Cold phlegm ◊ More susceptible to cancers ▪ Sputum with blood or change color □ check for lung cancer ▪ Rectal bleeding □ check for GI cancers ▪ Vaginal discharge □ check for gynecological cancers ● Treated with formulas that warm & transform phlegm, often include such herbs as gan jiang, xi xin, ban xia, bai zhu, bai jie zi...	● Neurological disorder causing constipation □ extra meridians ◊ Chronic problems □ Extra meridians involved ● Chong, Ren, Dai, Du □ 3 times/week ● Extra, abnormal water □ phlegm [original material for phlegm] ● Difficult, chronic cases often phlegm ● Age 40: Lost half yang Qi □ start puffing up, gain weight

Ling Gan Wu Wei Jiang Xin Tang [苓甘五味姜辛汤] (Poria, Licorice, Schisandra, Ginger, & Asarum Decoction) Source: Jin Gui Yao Lue	
● Actions: warms Lu, transforms phlegm-damp, & relieves cough ● Preparation & administration: decoction ● Indications: Congested fluids in the chest with Lu cold-phlegm – coughing with profuse sputum that is thin, watery, and white [not colorful] accompanied by a feeling of discomfort in the chest and diaphragm, wheezing, difficult breathing, profuse salivation with inclination to spit; a ● T: pale/flabby tongue moist white coating, P: slow slippery or deep wiry pulse ● SP Yang Xu ● Phlegm: Produced in middle jiao, stored in lung ● Get rid of resource of phlegm □ SP & LU ● More Lung symptoms	Applications ● Cold congested Fluids from yang xu & ascendant yin ● Congested Fluids due to cold ● Asthma, Chronic obstructive pulmonary disease Think & Review ● Please compare <i>ling gan wu wei jiang xin tang</i> with <i>xiao qing long tang</i>. ●

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Gan jiang	9	Very warm		Warms Lu, dispels cold, dries damp, resolves phlegm Focused on middle jiao (Sheng Jiang: Middle Jiao & Lung) If middle is warm, everything else good □ connect top & bottom
Deputy	Fu ling	12			Strengthens Sp, leaches out damp
Assistant	Xi xin	9	Very warm		Warms & disperses cold-phlegm, Disperse phlegm from LU Gan Jiang + Xi Xin = very warm [1+1 > 2]
Envoy	Wu wei zi	6	Astringent, sour, cold		Restrains Lu qi leakage, prevents other herbs' dispersing & depletion side effects 5 flavor, but major flavor is sour
	Gan cao	9			Harmonizes formula, tonifies Sp

Ling Gui Zhu Gan Tang [苓桂术甘汤] (Poria, Cinnamon Twig, Atractylodes Macrocephalae, & Licorice Decoction) Source: Shang Han Lun	
● Actions: warms & transforms cold-phlegm, strengthens Sp. ● Preparation & administration: decoction ◊ Make tea, fine powder, draft ● Indications: Lu phlegm-damp/congested Fluids (tan yin 痰饮) syndrome – fullness of the chest & hypochondria, coughing up clear & watery sputum, SOB, dizziness or vertigo, palpitations; a pale flabby tongue with white moist or greasy coating, a slippery and wiry or soggy pulse. ● Phlegm produced but hasn't moved yet (still in manufacturing center) ● Mostly focused on middle jiao (not LU) to restore SP/ST function ● Good for people with phlegm constitution [Drink every day □ stop production □ Change phlegm constitution] taste not bad	Applications ● Congested Fluids in the epigastrium from Sp yang xu, Chronic gastritis ● Chronic bronchitis/asthma, Emphysema [mild cases] ● Pulmonary heart failure, Edema during menstruation, Bi sx Think & Review ● The combination [fu ling, gui zhi] included in both □ can you tell the difference between these two formulas? ◊ <i>ling gui zhu gan tang</i> (focus on middle jiao & ◊ <i>wu ling san: ze xie</i> (chief □ drain damp down & promote urination), <i>zhu ling, bai zhu, fu ling, gui zhi</i>, ● Grab chief □ difference is clear

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Fu ling	12			Strengthens Sp, leaches out damp. Paired with gui zhi, they're very effective for promoting urination Fu Ling + Gui Zhi: get rid of phlegm through lower jiao (descend & urinate)
Deputy	Gui zhi	9			Warms & resolves cold-phlegm, moves yang qi
Assistant	Bai zhu	6			Tonifies Sp, dries damp
Envoy	Zhi gan cao	6			Tonifies Middle

San Zi Yang Qin Tang (Three-Seed Decoction To Nourish One's Parents) Source: Han Shi Yi Tong

- Actions: warms & transforms cold-phlegm, directs qi downward, relaxes the diaphragm, reduces food stagnation.
- Preparation & administration: crush the seeds & place in a cheesecloth bag. Decoct with sheng jiang in winter, take with honey for constipated patients.
 - ◊ Powder & put in tea bag
 - ◊ Honey & ginger ☐ warm up, protect SP/ST
 - ◊ Honey: lubricate GI
- **Indications:** Lu cold-phlegm with food stagnation – coughing & wheezing, copious sputum, focal distension & heaviness in the chest & epigastrium, loss of appetite, indigestion; a white greasy tongue coating, a slippery pulse.
- Old age (90s) ☐ Digestion slow down
- Phlegm in lung (coughing)
- Phlegm in middle jiao
- All the seeds good for constipation

Applications

- Lu cold-phlegm with food stagnation
- Lu cold-phlegm accumulation with middle jiao qi stagnation (+ dang shen, bai zhu)
- Chronic bronchitis/bronchial asthma
- Mei he qi (plum pit Qi), Emphysema, Spasms of the diaphragm

Case Study

- A bundled-up 69 y-o male suffers from coughing & wheezing with huge amount of white foamy watery mucus accompanied by SOB & a stifling sensation in the chest & diaphragm. Other sx: a cold feeling in the abdomen, loose stools with indigested food chunks. His MD diagnosed him as chronic bronchitis 12 years ago, as emphysema 3 years ago, as duodenal ulcer 24 years ago.
- A pale flabby tongue with moist white slippery coating; a tight full pulse.
- Dx:
- Tx:
-

Think & Review

- all can be used for phlegm accumulation from Middle jiao xu, can you tell the differences among these 3 formulas?
- **San zi yang qin tang: no tonify function, just treat symptoms ☐ lubricate & conduct down**
- **er chen tang: + ren shen & bai zhu, slight tonify middle jiao function, dry damp & stop production of phlegm**
- **liu jun zi tang:** tonify SP
-
-

Rank	Herb	Amount	Properties	Channels	Notes
None	Bai jie zi		Acrid, warm	LU	[mustard seed] Warms & transforms cold-phlegm, moves Lu qi LU stagnant phlegm
	Zi su zi		Acrid, warm	LU	Warms & transforms cold-phlegm, descends Lu qi Focus on descending, for cold phlegm causing coughing
	Lai fu zi		Acrid, sweet, neutral	LU, SP, ST	[Turnip seeds] Reduces food stagnation, descends qi, warms & transforms cold-phlegm, very good for bloating, conduct Qi down from middle to lower, may cause gas because bloating is moving down & out

Formulas That Transform Phlegm & Extinguish Wind 治风化痰	
• Wind-phlegm – • 1) external wind-phlegm: aversion to wind & fever, coughing with copious sputum; • 2) internal wind-phlegm: (phlegm follows Lr wind upward & disturbs the head & sensory orifices) dizziness, vertigo, headache, or in more severe cases, seizures, loss of consciousness... ◊ harder to treat • Treated with formulas that disperse wind & transform phlegm (for external w-ph), that extinguish wind & transform phlegm (for internal w-ph). •	•

Zhi Sou San [止嗽散] (Stop Coughing Powder) Source: Yi Xue Xin Wu	
• Actions: stops coughing (from exterior condition); transforms phlegm, releases Exterior, disseminates LU qi. • Preparation & administration: grind the herbs into powder, take 6-9g after meals. Also as a decoction with a proportionate reduction in dosage. • Indications: External wind-phlegm causing cough [Coughing with sputum, itchy sore throat, possible slight chills & fever, aversion to wind] • T: thin white tongue coating, P: floating pulse. • Springtime, fall ☐ more allergies, no rain ☐ more allergies • Treats symptoms ☐ coughing (including residual cough) • Applications • Cough due to Exterior conditions • Lingering cough starting with EPI • Intractable cough with Exterior condition • URI with cough • Whooping cough • Cough in children/seniors •	Case Study • A 38 y-o male comes in with chronic cough secondary to a cold 14 weeks ago. His cough often starts with exposure to wind or itchy throat and occurs 5-7 times per day. By the end of each episode he usually coughs of slightly thick yellow sputum. He has been treated by xiao qing long tang then sang ju yin at the beginning of his cold. He smoked for over 20 years and just quit 5 weeks ago. • A normal tongue with thin white coating; a slightly floating pulse • Dx: • Tx: • Think & Review • Please compare <i>zhi sou san</i> with <i>sang ju yin</i>. •

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Zi Wan, Bai Bu, Bai Qian	1 kg			Disseminate Lu qi, stop coughing
Deputy	Jie Geng	1 kg			Releases external wind + Gan Cao: good for itchy, scratchy throat
	Chen Pi	500 g	Acrid, warm	SP/ST	Opens & disseminates Lu qi, transforms phlegm, relieves sore throat Phlegm deep rooted in middle jiao
Assistant	Jing Jie	1 kg			Moves qi, resolves phlegm Main herb to treat allergies
Envoy	Gan Cao	375 g			Harmonizes the formula; relieves sore throat with jie geng, jing jie

Ban Xia Bai Zhu Tian Ma Tang [半夏白术天麻汤] (Pinellia, Atractylodis Macrocephalae & Gastrodia Decoction) Source: Yi Xue Xin Wu	
• Actions: strengthens SP, dries damp, transforms phlegm, extinguishes LV wind. • Preparation & administration: decoct with sheng jiang 1 slice & da zao 2 pieces. • Includes Er Chen Tang • Indications: Internal wind-phlegm causing headache & dizziness [dizziness or vertigo, HA, nausea, vomiting, copious expectoration of sputum, fullness & distension in the chest & epigastrium; hypertension, eye or mouth deviation] • T: flabby (scalloped) tongue white greasy; • P: wiry/slippery pulse. Applications • Wind-phlegm up-disturbance • Meniere's disease, Hypertension • Epilepsy, Bell's palsy, Chaliasia of cardia 贲门弛缓	Case Study • A 7 y-o boy has been suffering from seizures since he was scared by his brother. During the seizures he clenches his teeth with eyes staring upward, muscle twitching in the hands & foamy mucus drooping. He often comes back feeling headachy and heaviness. • A normal tongue with white moist slimy coating. He refuses to be checked at his pulses. • Dx: • Tx: Think & Review • Have you found a formula hidden in <i>ban xia bai zhu tian ma tang</i>? If yes. What is it? Er Chen Tang (add Tian Ma & Bai Zhu) □ 9 formulas with Er Chen Tang • Please make comparison of <i>er chen tang</i>, <i>wen dan tang</i> & <i>ban xia bai zhu tian ma tang</i>. • Describe the different functions of ban xia in the following formulas: • ban xia xie xin tang: Focal distention under heart in upper epigastric area □ ban xia for regulate & dispersing (acrid) Qi □ Ban Xia & Gan Jiang ◊ Heat/cold clumping ◊ Review 3 Xie Xin Tangs • ban xia hou po tang: Plum pit Qi due to LV Qi stagnation with Qi & phlegm clumping together in throat □ Descend Qi ◊ Resolve phlegm & reduce accumulation ◊ Regulate & descend Qi □ Descend phlegm & Qi • ban xia bai zhu tian ma tang: Treat internal wind blowing phlegm to cause headaches, dizziness, vertigo ◊ Dries damp, transforms phlegm, relieves nausea & vomiting ◊ w/ Tian Ma: calm LV wind

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Ban Xia				Dries damp, transforms phlegm, relieves nausea & vomiting
	Tian Ma				Transforms phlegm, extinguishes wind, relieves HA & dizziness/vertigo Treat internal wind [Substitute: Gou Teng]
Deputy	Bai Zhu,				Strengthen Sp, dry damp, transform phlegm
Assistant	Fu Ling				
	Ju Hong (Chen Pi)				Moves qi, transforms phlegm
Envoy	Gan Cao				Tonifies Middle, harmonizes the formula
	Sheng Jiag, Da Zao				Harmonize St & Sp

Modifications			
+ ze xie, gui zhi	Severe damp-phlegm		
+ gou teng, dai zhe, shi	Lr yang rising		
+ jiang can, dan nan xing	Severe dizziness/vertigo		

Formulas That Reduce Food Stagnation 消食剂	
- Food stagnation – accumulation & stagnation of food in the Middle Jiao: epigastric & abdominal focal distension and fullness, an aversion to food, rotten-smelling belching, nausea/vomiting, abdominal pain, & sometimes diarrhea with undigested food. Or acute disorders that result from gross overeating. - Treated with formulas that include digestive herbs (shan zha, shen qu, mai ya...) and qi-movers (chen pi, lai fu zi, zhi shi, hou po...), or Sp tonics (bai zhu, dang shen, gan cao...) in conditions of Sp xu	

Bao He Wan [保和丸] (Preserve Harmony Pill) Source: Dan Xi Xin Fa	
- Actions: reduces food stagnation & harmonizes ST - Preparation & administration: grind them into powder, form into pills with water, take 6-9g bid with water or a decoction made from mai ya. Also decoction with proportionate reduction of dosage. - Er Chen Tang image (almost □ missing gan cao) Indications: Food stagnation [focal distension & fullness in the chest and epigastrium, abdominal distension (bloating) with occasional pain better with BM, rotten-smelling belching, acid regurgitation, nausea/vomiting, aversion to food, diarrhea with undigested food, or constipation] - T: thick whitish-yellow or sticky yellow coating; - P: slippery pulse. - Bring for thanksgiving, treat excess eating too much food Applications - Food stagnation - Overeating with damp and qi stagnation - Childhood nutritional impairment - Chronic atrophic gastritis - Pancreatitis - Chronic cholecystitis - Low gastric juice	Patent - Yes Modern Research Case Study - A 48 y-o male comes in complaining with an epigastric fullness & distension, worse one hour after eating, accompanied with abdominal bloating and dull pain at times. Other sx: poor appetite, poor digestion, loose stools. He was diagnosed as chronic atrophic gastritis 5 months ago. - A slightly yellow, thick & sticky tongue coating; a full pulse with a little slippery at right Guan section. - Dx: - Tx: Think & Review

Rank	Herb	Amount	Properties	Channels	Notes
Chief	Shan Zha	180	sour, sweet, Slt warm	SP, ST, LV	[hawthorne berry] Reduces food (esp.meat & fat) stagnation, improve digestion
Deputy	Shen Qu	60			(alcohol & fermented foods)
	Lai Fu Zi	30			(starch)
	Mai Ya				(starch)
Assistant	Chen Pi	30			Moves qi, dries damp, stops nausea/vomiting
	Ban Xia,	90			Transform damp-phlegm, stop nause/vomiting
	Fu Ling	90			
	Lian Qiao	30	bitter, Slt cold	LU, HT, GB	Clears heat from stagnation, reduces clumping [detox]
