

Formulas That Treat Both Exterior & Interior

表里双解剂

1. Exterior condition with interior excess – treated with formulas that release exterior and drain
 2. Exterior condition with interior heat – treated with formulas that release exterior and clear
 3. Exterior condition with interior cold – treated with formulas that release exterior and warm
- Notes: Please differentiate the intensity and severity of the exterior and interior to help proportionate herbs of each group.

Release the exterior and drain 解表攻里

- These formulas are used to treat the exterior condition (either w-c or w-h) simultaneously with interior heat accumulation.
- These formulas often contain exterior-releasing herbs (ma huang, gui zhi, jing jie, fang feng, chai hu, bo he) and downward-draining herbs(da huang, mang xiao) as well

Da chai hu tang (major bupleurum decoction)

source: shang han lun

大柴胡汤

- Chai hu 15 c
- Huang qin 9 d
- Zhi shi 9 d
- Da huang 6 d
- Bai shao 9 a
- Ban xia 9 a
- Sheng jiang 15 e
- Da zao 5 pieces e

- Refer to [*xiao chai hu tang* 小柴胡汤:chai hu, huang qin, ren shen, ban xia, zhi gan cao, sheng jiang, da zao]
- Actions: harmonizes and releases Shaoyang, drains internal clumping heat.
- Preparation and administration: decoction, taken warm.

Indications

- Concurrent Shaoyang and Yangming disorder – alternating fever and chills, fullness in the chest and hypochondria (with or without pain), a bitter taste in the mouth, nausea, continuous vomiting, hard focal distention or fullness and pain in the epigastrium, burning diarrhea or no bowel movements, despondency, slight irritability; a yellow tongue coating, and a wiry, forceful pulse.
